問題 #60

You are recording actions for custom process steps in a test automate. When do you press the "Read" button on the recording panel?

Note: There are 2 correct answers to this question.

- A. To capture a static label on the screen that should be checked during test execution
- B. To capture a value in a text field that should be stored as a variable
- C. To capture an error message on the screen that can be used later
- D. To capture text in a message screen that can be used for data binding later

答案: A,B

解題說明:

Comprehensive and Detailed in Depth Explanation:

In SAP S/4HANA Cloud's Test Automation Tool (available via SAP Cloud ALM), the "Read" button is used during test script recording to capture screen elements for validation or variable assignment during automated test execution.

Option A (To capture a static label on the screen that should be checked during test execution): Correct. Static labels (e.g., field names or titles) are often captured to verify UI consistency or screen navigation during test runs. This ensures the test validates expected screen content.

Option B (To capture a value in a text field that should be stored as a variable): Correct. The "Read" function can extract dynamic values (e.g., an invoice number) from text fields, storing them as variables for use in subsequent steps, such as validations or inputs.

Option C (To capture an error message on the screen that can be used later): Incorrect. While error messages can be validated, the "Read" button is not typically used for this; instead, assertions or specific error-handling steps are recorded separately.

Option D (To capture text in a message screen that can be used for data binding later): Incorrect. Message screens (e.g., pop-ups) are handled differently, often via specific actions like "Confirm" or "Check Message," not the generic "Read" function.

問題 #61

Note: There are 2 correct answers to this question.

- A. Customer reconciliation account
- B. Supplier account
- C. Fixed asset number
- D. G/L account

答案: A,D

解題說明:

Comprehensive and Detailed in Depth Explanation:

Posting period variants in SAP S/4HANA Cloud control account-specific restrictions.

* B: Correct. Customer reconciliation accounts can be restricted.

* C: Correct. G/L accounts are controlled by period variants.
