## Best PMI PMI-ACP Preparation Materials & PMI-ACP Learning Mode

As far as the PMI-ACP practice test are concerned, these PMI-ACP practice questions are designed and verified by the experience and qualified PMI PMI-ACP exam trainers. They work together and strive hard to maintain the top standard of PMI-ACP exam practice questions all the time. So you rest assured that with the PMI PMI-ACP Exam Dumps you will ace your PMI PMI-ACP exam preparation and feel confident to solve all questions in the final PMI PMI-ACP exam.

## PMI Agile Certified Practitioner Sample Questions (Q266-Q271):

### NEW QUESTION # 266

What Scrum event or artifact is the set of items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal?

- A. Product Backlog
- B. Sprint
- C. Scrum
- D. Working Product Increment
- E. Sprint Backlog

**Answer: E**

**NEW QUESTION # 267**

Spike solutions are small standalone programs that demonstrate what you've learned. Which of the following types of spike will you use if you need to test an approach to your production code?

- A. Scheduling Spikes
- B. Design Spike
- C. Development Spike
- D. Iteration Spikes

**Answer: B**

**NEW QUESTION # 268**

The Scrum Master for a large project must provide an estimate of what can be delivered in six months. What should the Scrum Master do?

- A. Explain that a commitment will be provided after planning
- B. Use the team's historical velocity to calculate a range of features that can be delivered
- C. Commit to a specific feature set for delivery
- D. Have the team estimate in story points to commit to a specific set of features

**Answer: B**

Explanation:

The correct answer is D - Use the team's historical velocity to calculate a range of features that can be delivered. Agile emphasizes forecasting over commitment, and this is achieved through empirical data such as velocity. Providing a range based on historical velocity allows for realistic planning while acknowledging uncertainty.

From the PMI Agile Practice Guide:

"Agile forecasting is based on empirical data. Teams use their past velocity to forecast how much work they can complete in a given time frame. This forecast is typically expressed as a range to account for variability." (PMI Agile Practice Guide, Section 5.3 - Adaptive Planning and Forecasting) Mike Griffiths supports this:

"Rather than commit to fixed scope, agile teams use historical velocity and prioritized backlogs to forecast delivery. Forecasts are probabilistic, not promises." (Mike Griffiths, PMI-ACP Exam Prep, Chapter 5 - Estimation and Forecasting) Incorrect options:

- \* A violates agile's core value of responding to change over following a fixed plan.
- \* B delays valuable forecasting data.
- \* C implies commitment rather than forecast.

**NEW QUESTION # 269**

When are acceptance tests typically written for a user story?

- A. After writing the story, but before coding begins
- B. After estimating the Product Backlog, but before Sprint planning begins
- C. At the start of Product Backlog prioritization planning
- D. After coding the story, but before user acceptance testing begins

**Answer: C**

Explanation:

Explanation/Reference:

## NEW QUESTION # 270

Iterations last between a couple of weeks to a couple of months, with a preference for the shorter time. What is the goal for each iteration?

- A. Complete the assigned tasks.
- **B. Deliver working software frequently.**
- C. Demonstrate the software to the customer.
- D. Provide a high-level timeline.

**Answer: B**

### Explanation:

The goal of each iteration in Agile is to deliver working software frequently, typically at the end of each iteration. This allows the team to gather feedback early and make improvements quickly. The emphasis is on delivering usable software that provides value to the customer, rather than just completing tasks or preparing timelines. This approach aligns with the Agile principle of delivering working software frequently to ensure continuous progress and customer satisfaction.

## NEW QUESTION # 271

• • • • •

If you want to be a more successful person and become the best, the first step you need to take is to have our PMI-ACP exam questions. Get an internationally certified PMI-ACP certificate to prove your strength. This is the best way. Your strength and efficiency will really bring you more job opportunities. And our PMI-ACP study braindumps will help you pass the exam easily and get the certification for sure.
