HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.
Topic 2	<ul style="list-style-type: none">Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 3	<ul style="list-style-type: none">Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.
Topic 4	<ul style="list-style-type: none">HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 5	<ul style="list-style-type: none">Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.

Topic 6	<ul style="list-style-type: none"> • Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.
Topic 7	<ul style="list-style-type: none"> • Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

Refer to the exhibit.

A junior engineer is expanding a StoreOnce deployment for a law firm with a hybrid environment. The customer already has Veeam backing up to StoreOnce 3660 Gen 4 at both primary and secondary sites. They want to add Cloud Bank Storage (CBS) to archive into AWS Glacier tier for compliance. The junior engineer has added Cloud Bank licenses for the 80TB onsite capacity at the primary office.

Question: What does the junior engineer need to add to enable this scenario?

- A. Cloud Bank Storage for AWS Glacier
- B. Catalyst License for StoreOnce-B
- **C. Detach License on StoreOnce-A**
- D. Federated Management

Answer: C

NEW QUESTION # 15

A financial services company is planning to upgrade its data center infrastructure. Their considerations are:

Budget Management: Prefer one-time expense, avoid variable costs.

Flexibility: Growth planned in yearly budget cycles.

Ownership: Want to own equipment outright.

Operational Control: Full control of equipment lifecycle and customization.

Which procurement option best meets these needs?

- A. Capital lease
- **B. Capital purchase**
- C. Operating lease
- D. Consumption model

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The requirements align with a Capital Purchase - outright ownership with a one-time CapEx expense. This provides complete lifecycle control and no ongoing payments, fitting the financial services company's budgeting and governance model.

Distractors:

A: Operating lease is OpEx, variable payments, and no ownership.
B: Capital lease provides eventual ownership but still requires periodic lease payments.
C: Consumption model (e.g., GreenLake) uses variable OpEx, opposite of the customer's request.
Key Concept: CapEx model = one-time purchase, ownership, full control.

NEW QUESTION # 16

Which statement is correct when enabling port trunking (FC ISL / Ethernet link aggregation)?

- A. Ports need to belong to the same port group of the switch.
- B. Port Trunking is supported by default on every B-Series FC switch.
- C. For optimal performance, no more than 100 meters of cable length difference is acceptable.
- D. The port speed of the trunk ports can be different based on the used switches in the ISL group.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In B-Series (Brocade) SAN switches, trunking requires that all ports in a trunk group belong to the same port group (same ASIC) and run at the same speed. This ensures frame ordering and load balancing across ISLs.

Distractors:

A: Incorrect - cable length differences must be minimal, but not stated in meters like this.

C: Incorrect - speeds must match across all trunked ports.

D: Trunking requires a license on some Brocade models; not always enabled by default.

Key Concept: Port trunking requires same port group and same speed.

Reference: HPE B-Series SAN Switch Trunking Best Practices.

NEW QUESTION # 17

Refer to the exhibit.

Your customer had an unexpected failure of their current storage array, causing them to lose some of their critical data. As a result, they are looking for a storage array with a guarantee of 100% data availability to prevent this failure and loss in the future.

They need 80TB raw and two new 25GbE top-of-rack switches to connect to their environment.

They expect 5% annual growth.

Which correction should be made to the configuration in the exhibit to meet the customer's requirements?

- A. Change to 25G networking
- B. Decrease to 20×3.84 TB drives
- C. HPE GreenLake financial model
- D. Add $2 \times$ Aruba 8325 switches

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The exhibit shows the use of 32Gb FC HBAs and 100GbE switches (Aruba 100G). However, the customer specifically requires 25GbE top-of-rack switches. Therefore, the configuration needs to be corrected to 25GbE networking. The HPE Alletra MP B10000 guarantees 100% data availability SLA, so the primary correction is networking alignment, not drives or financial model.

Distractors:

B: Reducing drives reduces raw capacity below 80TB requirement.

C: GreenLake is a consumption model but not the technical correction required.

D: Aruba 8325 is a core switch option; customer only asked for ToR 25GbE.

Key Concept: Networking alignment with requirements.

Reference: HPE Alletra MP Ordering and Configuration Guide.

NEW QUESTION # 18

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.
- B. Extended Journal Copies always come from the target site to avoid impact on the production site.
- **C. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.**
- D. An additional license is required to enable the Extended Journal Copy feature.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.
