- A. Select the "Get latest" content option to retrieve the content in between automatic sync timers.
- B. An auto refresh of content list runs in the background every 15 minutes.
- C. The UI retrieves the content every time from the endpoint when opening the endpoint.

- E. The UI retrieves the content from the endpoint when listing the content for the first time.
- F. An auto refresh of content list runs in the background every 30 minutes.

Select the "Get latest" content option to retrieve the content in between automatic sync timers: If the administrator wants to manually sync and get the latest content between the auto-refresh intervals, they can select the "Get latest" option.

The UI retrieves the content from the endpoint when listing the content for the first time: When accessing the content for the first time, the UI will retrieve the content directly from the endpoint to populate the list.

NEW QUESTION # 27

An administrator is deploying vRealize Log Insight and needs to choose the most performant disk format option. Which option should the administrator choose?

- A. Deploy vRealize Log Insight using Raw Disk Mapping.
- B. Deploy vRealize Log Insight using the Thick Provision Lazy Zeroed disk format.
- C. Deploy vRealize Log Insight using the Thick Provision Eager Zeroed disk format.
- D. Deploy vRealize Log Insight using the Thin Provision disk format.

Answer: C
