# NIOS-DDI-Expert Test Tutorials | Latest Infoblox Exam NIOS-DDI-Expert Course: Infoblox Qualified NIOS DDI Expert - INE

P.S. Free 2025 Infoblox NIOS-DDI-Expert dumps are available on Google Drive shared by Lead1Pass:
https://drive.google.com/open?id=164eCh1FF1avKrO3bGHEQ52wJcv0-ntSd

For candidates who are going to buy the exam dumps for the exam, the quality must be one of the most standards while choosing the exam dumps. NIOS-DDI-Expert exam dumps are high quality and accuracy, since we have a professional team to research the first-rate information for the exam. We have reliable channel to ensure that NIOS-DDI-Expert Exam Materials you receive is the latest one. We offer you free update for one year, and the update version for NIOS-DDI-Expert exam materials will be sent to your automatically. We have online and offline service, and if you have any questions for NIOS-DDI-Expert exam dumps, you can consult us.

If you are not aware of your problem, please take a good look at the friends around you! Now getting an international NIOS-DDI-Expert certificate has become a trend. If you do not hurry to seize the opportunity, you will be far behind others! Now the time cost is so high, choosing NIOS-DDI-Expert Exam Prep will be your most efficient choice. You can pass the NIOS-DDI-Expert exam in the shortest possible time to improve your strength.

Exam NIOS-DDI-Expert Course, Reliable NIOS-DDI-Expert Exam Labs

Young people are facing greater employment pressure. It is imperative to increase your competitiveness. Selecting NIOS-DDI-Expert learning quiz, you can get more practical skills. First, you will increase your productivity so that you can accomplish more tasks. Second, users who use NIOS-DDI-Expert Training Materials can pass exams more easily. An international NIOS-DDI-Expert certificate means that you can get more job opportunities. Seize the opportunity to fully display your strength. Will the future you want be far behind?

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q13-Q18):

NEW QUESTION # 13
What protocol and port does DHCP Failover use to keep lease information synchronized between two peers?

- A. Default is UDP 1194, can be user configured
- B. Default is TCP 647, can be user configured
- C. Default is TCP 1194, can be user configured
- D. Default is UDP 647, can be user configured

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:Infoblox NIOS implements DHCP Failover based on the IETF DHCP Failover protocol (draft standard), usingTCP port 647by default for lease synchronization between peers. This port facilitates the exchange of lease data to ensure both the primary and secondary servers maintain consistent states (e.g., NORMAL, COMMUNICATIONS-INTERRUPTED). TCP is used for reliability, as lease sync requiresguaranteed delivery. The port can be changed by the administrator if needed (e.g., for firewall rules), making "user configured" accurate. Options A and B (port 1194) are incorrect-1194 is commonly associated with OpenVPN, not DHCP Failover. Option D is wrong because it's TCP, not UDP.
This is a key DHCP troubleshooting topic in the INE course.References:Infoblox NIOS Administrator Guide
- DHCP Failover; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 14
The Infoblox WAPI/RESTful API requires the administrator to use the Perl programming language.

- A. True
- B. False

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:The Infoblox Web API (WAPI) is a RESTful API that allows administrators to interact with the NIOS system programmatically for tasks like managing DNS records, DHCP leases, and Grid configurations. Contrary to requiring Perl, WAPI is language-agnostic-it uses HTTP-based requests (GET, POST, PUT, DELETE) and returns data in JSON format. While Infoblox provides sample scripts in Perl (and historically supported a Perl API), administrators can use any programming language (e.g., Python, Java, or even tools like cURL) that supports HTTP requests. The misconception might stem from older documentation emphasizing Perl examples, but the INE course, focusing on advanced NIOS management, clarifies that WAPI is not tied to Perl.References:Infoblox NIOS Documentation - WAPI Guide; INE Course Objective: NIOS Grid Troubleshooting (covers API usage).

NEW QUESTION # 15
From the CLI, the administrator must show the status of the DNS processes every 10 seconds for 1 minute.
Which command should the administrator use?

- A. show process refresh 10 run for 60 dns
- B. show process screen refresh 10 dns, then press enter after 6 refreshes to exit
- C. show process screen refresh 10 run for 60 dns
- D. show process refresh 10 dns, then press enter after 60 seconds to exit

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:Monitoring DNS processes via NIOS CLI requires the show process command:
* Goal:Display DNS status every 10 seconds for 60 seconds (6 refreshes).
* Actual Command:NIOS CLI doesn't have a single command with "refresh" and "run for" syntax as listed. Closest is:
* show process dns (displays DNS service status).
* No native auto-refresh exists-admins use external tools (e.g., watch -n 10 "show process dns") or repeat manually.
* Options:
* A:"refresh 10 run for 60" isn't valid syntax. Incorrect.
* B:"refresh 10" isn't supported, but manually running show process dns and repeating (e.g., via script or Enter) is closest. Incorrect syntax but feasible intent.
* C/D:"screen refresh" isn't NIOS CLI-sounds like UNIX screen. Incorrect.
* Workaround:SSH with while true; do show process dns; sleep 10; done and Ctrl+C after 60s.
* Practical Example:In an INE lab, you'd script this to monitor DNS during a failover, troubleshooting service uptime.
References:Infoblox NIOS CLI Reference Guide - Show Commands; INE Course Content: NIOS DDI DNS Troubleshooting.

NEW QUESTION # 16
What types of permissions can be assigned to a Group or Role in NIOS? (Select all that apply.)

- A. Object permissions
- B. Grid permissions
- C. Global permissions
- D. Member permissions

Answer: A,B,C

Explanation:
Comprehensive and Detailed In-Depth Explanation:NIOS uses a granular permission model for admin groups/roles (Administration > Administrators). Here's what applies:
* A (Global Permissions):Broad privileges across all objects (e.g., "All DNS Zones" read/write).
Applies to groups/roles for universal access. Correct.
* B (Object Permissions):Specific to individual objects (e.g., read-only on "zone1.example.com").
Assignable to groups/roles for fine control. Correct.
* C (Grid Permissions):Control Grid-wide settings (e.g., backup, upgrade permissions). Assignable to groups/roles, distinct from member-specific rights. Correct.
* D (Member Permissions):Permissions are tied to Grid members (e.g., restart services on "Member1"), but NIOS documentation classifies these under object or Grid permissions, not a separate "Member" category. Incorrect in this context.
* Setup:In Grid Manager, you assign these via group/role properties, selecting scopes (global, object- specific, Grid-level).
* Practical Example:In an INE lab, you'd assign a group global DNS write access and Grid backup rights, testing restricted troubleshooting scenarios.References:Infoblox NIOS Administrator Guide - Permissions; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 17
An administrator has both Avaya and Cisco VoIP phones that require the same DHCP option. What can the administrator do with these two different models of phones?

- A. Both device types can be online at the same time, but they must be on different subnets
- B. The administrator must contact the vendors to update the devices to use different DHCP options
- C. Only one type of device can be online at any given time
- D. Both device types can be on the same range through the use of separate Option Filters

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:NIOS supports advanced DHCP configuration, including Option Filters, which match client requests based on DHCP options (e.g., Option 60 for Vendor Class Identifier). If Avaya and Cisco VoIP phones require the same DHCP option (e.g., Option 66 for TFTP server), the administrator can use separate Option Filters to distinguish the devices by their unique identifiers (like Vendor Class IDs: "Avaya" vs. "Cisco") and assign them IPs from the same range with the shared option. This allows both device types to coexist on the same subnet and range, eliminating the need for segregation (Option B) or vendor intervention (Option D). Option A is overly restrictive and incorrect. This is a practical DHCP troubleshooting scenario in the INE course.References:Infoblox NIOS Administrator Guide - DHCP Option Filters; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 18
......

Those same people who need a conversational NIOS-DDI-Expert knowledge of networking also have lots of other things to do, and they really can'ttake the time to read all the details in a New NIOS-DDI-Expert ExamBootcamp book geared for a network engineer just to get a general idea about the technology.

NIOS-DDI-Expert Test Tutorials - 100% Pass First-grade Infoblox Exam NIOS-DDI-Expert Course

Some of you may have heard about it, and I imagine that many of you have not, You don't need to worry about safety in buying our NIOS-DDI-Expertexam materials, It is known that the DDI Professional Reliable NIOS-DDI-Expert Exam Labs Exam Question Certification has become a global standard for many successful IT companies.

By utilizing updated NIOS-DDI-Expert questions, you can easily pass the NIOS-DDI-Expert exam on your first attempt, Credit Card is our main paying tool when you buy NIOS-DDI-Expert in the site.

There are 24/7 customer assisting to NIOS-DDI-Expert Test Tutorials support you, please feel free to contact us if you have any questions.
