現実的Analytics-Con-201合格体験談 & 資格試験のリーダー & 権威のある Analytics-Con-201: Salesforce Certified CRM Analytics and Einstein Discovery Consultant

Salesforce Analytics-Con-201認定試験の難しさと近年にほとんどの受験生は資格認定試験に合格しなかったと良く知られます。だから、我々社の有効な試験問題集は長年にわたりSalesforce Analytics-Con-201認定資格試験問題集作成に取り組んだIT専門家によって書いてます。実際の試験に表示される質問と正確な解答はあなたのSalesforce Analytics-Con-201認定資格試験合格を手伝ってあげます。

Salesforce Certified CRM Analytics and Einstein Discovery Consultant 認定 Analytics-Con-201 試験問題 (Q97-Q102):

質問 #97

Universal Containers asks a CRM Analytics consultant to review the performance of its local data sync.

After removing unused objects and fields from connected data, what else should the consultant do to improve performance of the data sync?

- A. Evaluate connection mode for each connected object.
- B. Contact Salesforce Support to increase sync speed.
- C. Enable fast sync in analytics settings.

正解: A

解説:

To improve the performance of local data sync in Universal Containers, evaluating the connection mode for each connected object is a practical approach. Here's the rationale:

- * Optimization of Resources: Different connection modes (e.g., Full Sync, Incremental Sync) use different amounts of resources. Choosing the right mode for each object based on how frequently its data changes can optimize the sync process and reduce load times.
- * Efficient Data Handling: By tailoring the connection mode to the needs of specific data objects, the overall efficiency of the data sync process is improved, leading to faster refresh rates and more timely data availability.
- * Cost and Performance Balance: Evaluating and selecting the appropriate connection mode can also help balance performance needs with cost constraints, as some modes may consume more compute resources than others.

質問 # 98

CRM Analytics users at Cloud Kicks are granted access to an app with specific dashboards. When trying to download a specific widget, they are unable to do so.

- A. The users have access to the dashboard but not the dataset.
- **B. The permission set for the users is missing the download data permission.**
- C. The dashboard has been created for internal use and the users have a view only license.

正解: B

解説:

In CRM Analytics, even if users are granted access to view an app and its dashboards, their ability to download data is controlled by permissions assigned via permission sets. Specifically, users need the "Download Data" permission to download data from widgets or dashboards. If this permission is missing from their permission set, they will be unable to download the specific widget, even though they can view the data.

質問 # 99

A model created with a GLM algorithm produced unsatisfactory results.

When re-running the model, which type of algorithm should the consultant use to improve the results?

- A. K-Nearest Neighbors
- **B. XGBoost**
- C. Support Vector Machines

正解: B

質問 # 100

A CRM Analytics consultant has been asked to refactor a dashboard so that it loads quicker. After some analysis, the consultant found that most of the dashboard queries run in less than 5 seconds; however, the Opportunities Table takes more time to load when scrolled down from its initial view.

How should the consultant improve the performance of this dashboard?

- **A. Create a second page on the dashboard and move the table to this new page.**
- B. Create a Visualforce page and display a list view of the Opportunities on this new page.
- C. Create a second dashboard and move the table to this new dashboard.

正解: A

質問 # 101

A CRM Analytics consultant has been asked to add a custom object to existing recipe. When trying to locate the object, the consultant can see only Direct Data and NOT the SFDC Local data sync.

How should the consultant resolve this?
