# SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q56-Q61):

## NEW QUESTION # 56

How can you define the relationship between business roles and business catalogs?

- A. A business role is a collection of one or more business catalogs.
- B. A business role restricts access to one or more business catalogs.
- C. A business catalog is a collection of one or more business roles.
- D. A business catalog restricts access to one or more business roles.

**Answer: A**

## NEW QUESTION # 57

What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Download learning content from SAP Learning Hub
- B. Interact with SAP easily
- C. Get full transparency into your SAP product portfolio
- D. Access the SAP ONE Support Launchpad

**Answer: B,C**

## NEW QUESTION # 58

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Communication interface
- B. Communication arrangement
- C. Communication system
- D. Communication API

**Answer: B,C**

Explanation:

When you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition, you must create a communication system and a communication arrangement.

A communication system represents the communication partner within a communication, such as the system that calls or provides services. A communication arrangement defines the settings for a specific communication scenario, such as the authentication method, the communication user, and the service URL.

You can use the Communication Systems app and the Communication Arrangements app to create and manage these objects in the SAP Fiori launchpad. ## NEW QUESTION # 59

What is the correct release code for the second feature delivery in February 2025?

- A. 2502.2
- B. 0
- C. 2025.2.2
- D. 2025.2

**Answer: A**

Explanation:

The release code for SAP S/4HANA Cloud Public Edition follows the format YYYY.MM.X, where YYYY is the year, MM is the

month, and X is the feature delivery number. The first feature delivery is always in February, and the second feature delivery is always in May. Therefore, the release code for the second feature delivery in February 2025 is 2502.2. References = Navigating Release Upgrades, SAP S/4HANA Cloud, Public Edition 2308 Release

### NEW QUESTION # 60

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. System consistency checks
- **B. The selected deployment target**
- C. Added partner content
- **D. The selected scope**

**Answer: B,D**

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.
