Most customers reflected that our F5 exam questions cover most of questions of actual test. So if you decided to choose F5CAB4 as your study materials, you just need to spend your spare time to practice F5CAB4 Dumps PDF and remember the points of pass exam guide. Our latest vce dumps are the guarantee of clear exam.

DumpsFree BIG-IP Administration Control Plane Administration (F5CAB4) practice test material covers all the key topics and areas of knowledge necessary to master the F5 Certification Exam. Experienced industry professionals design the F5CAB4 exam questions and are regularly updated to reflect the latest changes in the BIG-IP Administration Control Plane Administration (F5CAB4) exam. In addition, DumpsFree offers three different formats of practice material which are discussed below.

Pass Guaranteed Quiz 2026 F5 Latest Exam F5CAB4 Materials

With our F5CAB4 study materials, all your agreeable outcomes are no longer dreams for you. And with the aid of our F5CAB4 exam preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our F5CAB4 learning questions. Come and buy our F5CAB4 practice engine, you will be confident and satisfied with it and have a brighter future.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q21-Q26):

NEW QUESTION # 21
A BIG-IP Administrator needs to restore a UCS file to an F5 device using the Configuration Utility. Which section of the Configuration Utility should the BIG-IP Administrator access to perform this task?

- A. System > Archives
- B. Local Traffic > Virtual Servers
- C. System > Configuration
- D. Local Traffic > Policies

Answer: A

Explanation:
Managing the state of a device often involves restoring configuration backups known as User Configuration Set (UCS) files These archives contain the full system configuration, including licenses and SSL certificates.

The Control Plane provides a dedicated management area for these files under System > Archives, where administrators can upload, create, and restore configuration snapshots

NEW QUESTION # 22

A BIG-IP Administrator defines a device Self IP. The Self IP is NOT reachable from the network. What should the administrator verify first?

- A. The correct Interface has been selected.
- B. The correct Trunk has been selected.
- C. Verify if auto last hop is disabled.
- D. The correct VLAN has been selected.

Answer: D

Explanation:
Connectivity management requires a proper logical-to-physical mapping within the BIG-IP Control Plane.
* VLAN Association: In TMOS, a Self IP address is not assigned directly to a physical interface. Instead, it is assigned to a VLAN (Virtual Local Area Network) object.
* Procedural Troubleshooting: If a Self IP is unreachable, the primary failure point is often that the IP was associated with the wrong VLAN, or the VLAN itself is not correctly associated with the intended physical interface or trunk.
* Layer 2 Mapping: The Control Plane requires the VLAN to be "up" and "untagged" or "tagged" on a valid interface for traffic to flow. If the administrator selects the incorrect VLAN, the Self IP will exist in the configuration but will be logically isolated from the physical network wire.

NEW QUESTION # 23

A BIG-IP Administrator needs to change the management IP address of a BIG-IP device. Where should the administrator perform this task?

- A. System > Platform
- B. Network > Interfaces
- C. Network > VLANs
- D. Network > Self IPs

Answer: A

Explanation:
Management of the device's identity and primary out-of-band connectivity is a central Control Plane responsibility.
* Platform Settings: The System > Platform section of the Configuration Utility is used to manage global hardware and system parameters, including the hostname, management IP address, and time zone.
* Management vs. Data Plane: It is critical to distinguish between the management interface and TMM data interfaces. While data plane IPs (Self IPs) are configured under Network > Self IPs, the dedicated management port settings are grouped with other platform-level configurations.
* Access Control: This area is also used to manage administrative security, such as restricting SSH or HTTPS access to specific management subnets or IP addresses.
* Impact of Change: Changing the management IP will immediately disconnect any active GUI or SSH sessions using the current management IP. The administrator must reconnect using the newly assigned address.

NEW QUESTION # 24

Which method is recommended for creating a new user from the CLI? (Choose one answer)

- A. Run useradd 'username' then passwd username from bash or tmsh
- B. Run f5adduser 'username' then f5passwd username from bash or tmsh
- C. Run tmsh create auth user username prompt-for-password from bash
- D. Edit bigip.conf to add the new user and the user's clear-text password

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:
The recommended and supported method for creating BIG-IP users from the CLI is through TMSH, using the authentication subsystem.
tmsh create auth user <username> prompt-for-password:
Properly creates the user within BIG-IP's AAA/authentication framework
Encrypts the password securely
Ensures the user is stored and managed correctly in the BIG-IP configuration database Is fully supported and documented Why the other options are incorrect:
B is unsafe and unsupported because editing bigip.conf directly and storing clear-text passwords violates security and configuration management best practices.
C (f5adduser / f5passwd) is deprecated and not recommended for modern BIG-IP versions.
D creates a Linux system user only, not a BIG-IP administrative user, and will not allow access to the Configuration Utility or TMSH roles.

NEW QUESTION # 25
An LTM device has a virtual server mapped to www.f5.com. Users report that when they connect to /resources/201.1.2h.1_l.com they are unable to receive content. What is the likely cause of the issue?

- A. The virtual address does not have route advertising enabled.
- B. The virtual address does not have ARP enabled.
- C. The pool associated with the virtual server is failing its health check.
- D. The pool associated with the virtual server does not have priority group activation enabled.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The Control Plane is responsible for ARP (Address Resolution Protocol) management for Virtual Addresses. For a Virtual Server to be reachable, the BIG-IP must respond to ARP requests for that IP. If the "ARP" setting is disabled on the Virtual Address properties, upstream routers cannot resolve the MAC address of the BIG-IP, leading to connectivity failure even if the service itself is "Available."

NEW QUESTION # 26
......

Our test-orientated high-quality F5CAB4 exam questions would be the best choice for you, we sincerely hope all of our candidates can pass F5CAB4 exam, and enjoy the tremendous benefits of our F5CAB4 prep guide. Helping candidates to pass the F5CAB4 Exam has always been a virtue in our company's culture, and you can connect with us through email at the process of purchasing and using, we would reply you as fast as we can.

F5CAB4 Latest Exam Materials: https://www.dumpsfree.com/F5CAB4-valid-exam.html

Build your Career Pathway to the Leading F5-CA Enterprises of F5 F5CAB4 Exam, F5 Exam F5CAB4 Materials Our refund policy is the commitment to your success, F5 F5CAB4 Latest Exam Materials F5CAB4 Latest Exam Materials exam,F5CAB4 Latest Exam Materials braindumps,F5CAB4 Latest Exam Materials certification,F5CAB4 Latest Exam Materials real Q&As - DumpsFree F5CAB4 Latest Exam Materials, So, you can easily face any change of the F5CAB4 exam test.

The java.util.concurrent package contains some really useful F5CAB4 classes that are flexible, lightweight, and fully tested, so there's no need to roll your own concurrent code.

This synchronizes your new notes with your online notebook so that you can make sure both notebooks reflect your most current entries, Build your Career Pathway to the Leading F5-CA Enterprises of F5 F5CAB4 Exam.
