

# New C\_ADBTP\_2601 Practice Questions & Exam C\_ADBTP\_2601 Vce

**CRW 2601 EXAM PRACTICE QUESTIONS 2024**  
**COMPILED BY: ST GABA**

*Note that red highlighted questions are problem type questions requiring you to apply the law. However, the blue highlighted questions are direct questions. The questions in this document are taken from assignments and past examinations.....*

- 1. X and Y decide to rob a liquor store. X stands watch outside, while, Y armed with a gun, goes inside. The store owner, Z, resists the robbery, and is shot by Y. Select the correct answer:**
  - A. Both X and Y will be guilty of murder as they had the direct intention to kill Z.
  - B. Only Y will be guilty of murder as he acted with *dolus eventualis* in killing Z.
  - C. Only Y will be guilty of murder as he had direct intention to kill Z.
  - D. Both X and Y will be guilty of murder as they acted with *dolus eventualis* in killing Z.
- 2. The appellant in *De Oliveira* 1993 (2) SACR 59 (R).....**
  - A. Did not succeed with his plea of putative self-defence.
  - B. Succeeded with his plea of private defence.
  - C. Succeeded with his plea of putative self-defence.
  - D. Did not succeed with his plea of private defence.
- 3. According to *De Blom* 1977 (3) SA 513 (A), the effect of a mistake of law is the same as a mistake regarding a material fact and it excludes.....**
  - A. Unlawfulness
  - B. Intention
  - C. Culpability
  - D. Negligence
- 4. In *Lungile* 1999 (2) SACR 597 (A), the three accused robbed a shop. A policeman (X) entered upon the scene, and in a wild shoot-out, X shot and killed A, the shopkeeper. On a charge of murder, the court decided that *Lungile* was.....**
  - A. Not guilty as the shot fired by X, killing A, constituted a *novus actus interveniens*.
  - B. Not guilty as there was no causal link between his conduct and A's death.
  - C. Guilty as there was a causal link between his conduct and A's death.
  - D. Guilty as there was a substantial difference between the foreseen and actual cause of events.
- 5. X and Z visit a bar and consume a number of drinks. X is very intoxicated and starts to fight with Y. X pulls out a**

As we all know, if the content of your exam materials is complex and confusing, then if you want to pass the exam, you will be quite worried. Our C\_ADBTP\_2601 study guide helps the candidates to easily follow the needed contents with simplified languages and skillfully explanations according the perfect designs of the professional experts. Preparing with the help of our C\_ADBTP\_2601 Exam Questions frees you from getting help from other study sources, and you can pass the exam with 100% success guarantee.

Great concentrative progress has been made by our company, who aims at further cooperation with our candidates in the way of using our C\_ADBTP\_2601 exam engine as their study tool. Owing to the devotion of our professional research team and responsible working staff, our C\_ADBTP\_2601 training materials have received wide recognition and now, with more people joining in the C\_ADBTP\_2601 Exam army, we has become the top-raking training materials provider in the international market. we believe our C\_ADBTP\_2601 practice materials can give you a timely and effective helping for you to pass the exam.

>> New C\_ADBTP\_2601 Practice Questions <<

**2026 New C\_ADBTP\_2601 Practice Questions | Latest SAP Exam  
C\_ADBTP\_2601 Vce: Administrating SAP Business Technology  
Platform(C\_ADBTP\_2601)**

Pass4Leader is intent on keeping up with the latest technologies and applying them to the exam questions and answers not only on

the content but also on the displays. That is why our pass rate is high as 98% to 100%. The data are unique-particular in this career. With our C\_ADBTP\_2601 study torrent, you can enjoy the leisure study experience as well as pass the C\_ADBTP\_2601 Exam with success ensured. For the content of our C\_ADBTP\_2601 preparation materials is simplified by our professional experts and the displays are designed effectually. Just try and enjoy it!

## **SAP Administrating SAP Business Technology Platform(C\_ADBTP\_2601) Sample Questions (Q10-Q15):**

### **NEW QUESTION # 10**

#### **SIMULATION**

Enable a Cloud Foundry Environment

Task 2: Enable and Configure a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, enable the Cloud Foundry environment in the cf-eu10-004 landscape. Set the instance name to cf-eu-hcm-dev and the org name to btpops#####-eu-hcm-dev.

In the EU HCM Dev subaccount, create a space with the name activity-recording.

In the EU HCM Dev subaccount, create a space quota with the name half-org-quot a. Halve the available org quota for memory, routes, service, and instance memory for an unlimited number of app instances. Assign the space quota to activity-recording.

#### **Answer:**

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed specifically in EU HCM Dev. SAP documents that Cloud Foundry is enabled at subaccount level, and the system creates a Cloud Foundry org linked to that subaccount.

Part 1 - Enable the Cloud Foundry environment

Step 1 - Open the subaccount overview

In EU HCM Dev, go to Overview.

Explanation:

SAP Help describes the cockpit flow for enabling Cloud Foundry from the subaccount Overview page.

What to verify

You should see a Cloud Foundry section on the overview page.

Step 2 - Start enabling Cloud Foundry

In the Cloud Foundry section, click Enable Cloud Foundry.

Explanation:

This starts creation of the Cloud Foundry organization for the subaccount. SAP notes that when you enable Cloud Foundry in a subaccount, the system automatically creates a Cloud Foundry org for it.

Step 3 - Enter the required Cloud Foundry values

In the enablement dialog, enter:

Landscape: cf-eu10-004

Instance Name: cf-eu-hcm-dev

Org Name: btpops#####-eu-hcm-dev

Then confirm by clicking Create or Enable.

Explanation:

The task gives you the exact landscape and naming values to use. SAP documentation shows that enabling Cloud Foundry in the cockpit requires naming the Cloud Foundry instance and org.

What to verify

After the process completes, the subaccount should show Cloud Foundry as enabled, with the org created for EU HCM Dev.

Part 2 - Create the space

Step 4 - Open Spaces

In EU HCM Dev, after Cloud Foundry is enabled, open:

Cloud Foundry

Spaces

Explanation:

SAP Help shows that spaces are created from the Spaces area after Cloud Foundry is enabled in the subaccount.

□ Step 5 - Create the space

Click Create Space.

Enter:

Space Name: activity-recording

Confirm by clicking Create.

□ Explanation:

This creates the required Cloud Foundry space inside the org for EU HCM Dev. SAP's cockpit documentation and setup guides show this as the standard next step after enabling the environment.

What to verify

You should now see:

activity-recording

in the list of Cloud Foundry spaces.

Part 3 - Create the space quota

Step 6 - Open Cloud Foundry Space Quotas

In EU HCM Dev, open:

Cloud Foundry

Space Quotas

Explanation:

SAP Help states that, in the Cloud Foundry environment, the quotas allocated to a subaccount can be further distributed by creating space quota plans, and these are managed from the Cloud Foundry Space Quotas area.

Step 7 - Create a new space quota

Click Create Space Quota or New Space Quota.

Enter the quota name:

half-org-quota

Explanation:

This creates a quota plan that you will assign to the required space. SAP Help describes creating space quota plans in the subaccount and then assigning them to spaces.

Step 8 - Set quota values to half of the org quota

In the quota form, set the values to half of the available org quota for:

Memory

Routes

Services

Instance Memory

For App Instances, set:

Unlimited

Then save the quota.

□ Explanation:

The simulation asks you to halve the available org quota for those four dimensions. SAP Help confirms that space quotas are used to limit resource consumption inside the org by defining values such as memory, routes, and service instances, and that these plans can then be assigned to spaces.

How to calculate "half"

Use the current org quota values shown in the Cloud Foundry quota screens and divide each by 2 before entering it.

Examples:

If org memory = 2 GB, enter 1 GB

If routes = 20, enter 10

If services = 200, enter 100

If instance memory = 2 GB, enter 1 GB

What to verify

The new quota plan should exist as:

half-org-quota

with the reduced values saved.

□ Part 4 - Assign the quota to the space

Step 9 - Assign the quota to activity-recording

Open the newly created quota:

half-org-quota

Choose Assign Spaces or Assign to Spaces

Select:

activity-recording

Save the assignment

Explanation:

SAP Help states that after creating a space quota, you assign it to one or more spaces from the space quota management flow.

What to verify

The quota half-org-quota should now be assigned to:

activity-recording

□

Final expected result

Inside EU HCM Dev:

Cloud Foundry is enabled

landscape is cf-eu10-004

instance name is cf-eu-hcm-dev

org name is btpops#####-eu-hcm-dev

space activity-recording exists

space quota half-org-quota exists

memory, routes, services, and instance memory are each set to half of the available org quota app instances are unlimited quota half-

org-quota is assigned to activity-recording Common mistakes to avoid Enabling Cloud Foundry in the wrong subaccount; it must be

EU HCM Dev.

Using the wrong landscape; the task explicitly requires cf-eu10-004.

Typing the wrong org name; use exactly btpops#####-eu-hcm-dev.

Forgetting to create the space before assigning the quota.

Entering full org quota instead of half.

Limiting app instances to a number instead of leaving them unlimited.

Creating the quota but not assigning it to activity-recording.

## NEW QUESTION # 11

### SIMULATION

Task 3: Create Subaccounts with Default Provider and Region

In the Human Resources directory, create the subaccount EU HCM Dev (Description: Human Resources Development) with subdomain btpops#####-eu-hcm-dev in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.2.

In the Human Resources directory, create the subaccount EU HCM Test (Description: Human Resources Testing) with subdomain btpops#####-eu-hcm-test using EU HCM Dev as source subaccount.3.

In the Human Resources directory, create the subaccount EU HCM Prod (Description: Human Resources Production) with subdomain btpops#####-eu-hcm-prod using EU HCM Dev as source subaccount. Set the subaccount as used in production.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

You must create these 3 subaccounts inside the Human Resources directory:

EU HCM Dev

EU HCM Test

EU HCM Prod

Important:

Replace ##### with your global account number

Enter names, descriptions, and subdomains exactly

EU HCM Prod must be marked as used in production

Task 3 - Create Subaccounts with Default Provider and Region

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Human Resources directory.

Why this matters:

All 3 subaccounts in this task must be created inside Human Resources. If you create them anywhere else, the result will be incorrect.

Step 1 - Open the Human Resources Directory

What to do

In the left menu, choose Directories.

In the list, select Human Resources.

Explanation:

This is the parent directory where the required HR subaccounts must be created.

What to verify

You should now be inside the Human Resources directory.

Step 2 - Start Creating EU HCM Dev

What to do

Inside Human Resources, open Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the form to create the first HR subaccount.

Step 3 - Enter Values for EU HCM Dev

What to do

Enter the following:

Display Name / Name: EU HCM Dev

Description: Human Resources Development

Subdomain: btpops#####-eu-hcm-dev

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the development subaccount for HR and defines the required provider and region.

This first subaccount is important because it will be used as the source subaccount for the next two subaccounts.

What to verify

After creation, you should see:

EU HCM Dev

under the Human Resources directory.

Step 4 - Confirm EU HCM Dev Exists

What to do

Check the subaccounts list in Human Resources.

Explanation:

You must make sure EU HCM Dev is available before you create the next subaccounts, because both EU HCM Test and EU HCM Prod must use it as the source subaccount.

What to verify

You should see:

EU HCM Dev

If it is missing, create it correctly before moving on.

Step 5 - Start Creating EU HCM Test

What to do

Still in the Human Resources directory, click Create → Subaccount again.

Explanation:

This opens the form for the test subaccount.

Step 6 - Enter Values for EU HCM Test

What to do

Enter:

Display Name / Name: EU HCM Test

Description: Human Resources Testing

Subdomain: btpops#####-eu-hcm-test

Then select:

Source Subaccount: EU HCM Dev

Then click Create.

Explanation:

This creates the testing subaccount by using EU HCM Dev as the source subaccount.

This helps keep the configuration aligned with the development subaccount.

What to verify

After creation, you should see:

EU HCM Test

under Human Resources.

Step 7 - Start Creating EU HCM Prod

What to do

In Human Resources, click Create → Subaccount once more.

Explanation:

This opens the form for the production subaccount.

Step 8 - Enter Values for EU HCM Prod

What to do

Enter:

Display Name / Name: EU HCM Prod

Description: Human Resources Production

Subdomain: btpops#####-eu-hcm-prod

Then select:

Source Subaccount: EU HCM Dev

Enable:

Used in Production: Yes

Then click Create.

Explanation:

This creates the production HR subaccount based on EU HCM Dev and marks it as a production system.

The production setting is mandatory here.

What to verify

After creation, you should see:

EU HCM Prod

under Human Resources, and it should be marked as used in production.

Final Expected Result for Task 3

Inside the Human Resources directory, you must have these 3 subaccounts:

1. EU HCM Dev

Description: Human Resources Development

Subdomain: btpops#####-eu-hcm-dev

Region: Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10

2. EU HCM Test

Description: Human Resources Testing

Subdomain: btpops#####-eu-hcm-test

Source Subaccount: EU HCM Dev

3. EU HCM Prod

Description: Human Resources Production

Subdomain: btpops#####-eu-hcm-prod

Source Subaccount: EU HCM Dev

Used in Production: Yes

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong directory

All 3 must be created inside:

Human Resources

Not under:

Global Account

Americas

Eurasia

Partner

2. Wrong subdomain values

Use exactly:

btpops#####-eu-hcm-dev

btpops#####-eu-hcm-test

btpops#####-eu-hcm-prod

Only replace ##### with your global account number.

3. Wrong region for EU HCM Dev

It must be:

Amazon Web Services (AWS)

Europe (Frankfurt)

cf-eu10

4. Wrong source subaccount

For both:

EU HCM Test

EU HCM Prod  
you must select:  
EU HCM Dev  
5. Forgetting the production flag  
For EU HCM Prod, make sure:  
Used in Production is enabled

## NEW QUESTION # 12 SIMULATION

Establish Shared Services

Task 2: Entitle and Subscribe a Service in a Shared Subaccount

In your SAP BTP cockpit, in your SH Dev subaccount, entitle one standard (Application) service plan for the SAP Build Work Zone, advanced edition.

In the SH Dev subaccount, establish a trust to the agvlamkzw.accounts.ondemand.com identity provider.

In your SH Dev subaccount, create a service subscription for SAP Build Work Zone, advanced edition with the standard service plan.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Shared Services directory.

Open the SH Dev subaccount.

This matters because all three required actions must be done inside SH Dev, not in the directory and not in another subaccount.

Part 1 - Entitle the service in SH Dev

Step 1 - Open the subaccount

In the cockpit, choose Directories.

Open Shared Services.

Select SH Dev.

You should now be on the SH Dev subaccount page.

Step 2 - Open Entitlements

In SH Dev, choose Entitlements.

SAP documents that service plans and quotas for a subaccount are added in the subaccount's Entitlements are a.

Step 3 - Add the required service plan

Click Configure Entitlements or Add Service Plans.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard (Application).

Set the quantity to 1 if a quota/amount field is shown.

Save the entitlement changes.

This task explicitly asks for one standard (Application) service plan. SAP Help also notes that SAP Build Work Zone usage depends on the correct entitlement being available in the subaccount first.

Verify

Under Entitlements, you should now see:

SAP Build Work Zone, advanced edition

plan: standard (Application)

quantity: 1 if shown

Part 2 - Establish trust to the identity provider

Step 4 - Open Trust Configuration

In SH Dev, go to Security.

Choose Trust Configuration.

SAP Help states that trust to a custom identity provider is established from Security > Trust Configuration in the SAP BTP cockpit.

Step 5 - Create the trust

Click Establish Trust.

Enter or select the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard.

Save the trust configuration.

SAP documents that to use a custom identity provider, the subaccount must have a trust relationship to that provider. SAP also highlights that apps such as SAP Build Work Zone rely on SAP Cloud Identity Services trust configuration.

Verify

On the Trust Configuration page, you should see:

agvlamkzw.accounts.ondemand.com

as a trusted identity provider.

Part 3 - Create the subscription

Step 6 - Open Instances and Subscriptions

In SH Dev, go to Services.

Choose Instances and Subscriptions.

Step 7 - Create the subscription

Click Create.

Choose Subscription if the cockpit asks for a type.

Search for SAP Build Work Zone, advanced edition.

Select the service.

Choose the plan standard.

Confirm the creation.

SAP Help for SAP Build Work Zone scenarios indicates that the subaccount needs the correct entitlements and subscription flow to expose and use SAP Build Work Zone content.

Step 8 - Confirm subscription status

Stay on Instances and Subscriptions.

Check that the new subscription appears and is active.

Verify

You should see:

SAP Build Work Zone, advanced edition

plan: standard

subscription created successfully

Final expected result

Inside SH Dev:

the entitlement for SAP Build Work Zone, advanced edition exists

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, advanced edition

the subscription uses the standard plan

Common mistakes to avoid

Doing the entitlement in Shared Services directory instead of SH Dev

Choosing SAP Build Work Zone, standard edition instead of advanced edition Choosing the wrong plan; the entitlement must be standard (Application) Forgetting the trust step to agvlamkzw.accounts.ondemand.com Trying to subscribe before the entitlement exists

## NEW QUESTION # 13

### SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Then choose the region:

Cloud Provider: Microsoft Azure

Region: US West (WA)

Environment / Technical Region: cf-us20

After checking all values, click Create.

Explanation:

This creates the development and testing subaccount for the Partner directory.

The important points are:

the subaccount name must match exactly

the subdomain must include your account number in place of #####

the region must be Microsoft Azure → US West (WA) cf-us20

What to verify

After creation, you should see the new subaccount:

AM PA Dev Test

inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists

What to do

Check the subaccounts list under Partner.

Explanation:

Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify

You should see:

AM PA Dev Test

If it is not there, do not continue until it is created correctly.

#### Step 5 - Start Creating the Second Subaccount

What to do

Still inside the Partner directory, click Create → Subaccount again.

Explanation:

This opens a new subaccount creation form for the production subaccount.

#### Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Then set:

Source Subaccount: AM PA Dev Test

Enable the production setting:

Used in Production: Yes

Then click Create.

Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

##### 1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

##### 2. AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Source Subaccount: AM PA Dev Test

Used in Production: Yes

Common Mistakes to Avoid

##### 1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account

Americas

Eurasia

Human Resources

##### 2. Wrong subdomain format

Use exactly:

btpops#####-am-pa-dev-test

btpops#####-am-pa-prod

Replace only ##### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

##### 3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

##### 4. Forgetting the source subaccount for AM PA Prod

You must select:  
AM PA Dev Test  
as the source subaccount.  
5. Forgetting the production flag  
For AM PA Prod, make sure:  
Used in Production is enabled

## NEW QUESTION # 14

.....

Failing to address these issues can result in wasted time and money. The ideal solution to overcome these challenges is to prepare with the latest and authentic C\_ADBTP\_2601 Exam Questions. Fortunately, there are trusted platforms like Pass4Leader that provide up-to-date and Real C\_ADBTP\_2601 Questions for your preparation.
