PECB NIS-2-Directive-Lead-Implementer Test Fee - NIS-2-Directive-Lead-Implementer Guaranteed Success

The committed team of the ActualCollection is always striving hard to resolve any confusion among its users. The similarity between our PECB NIS-2-Directive-Lead-Implementer exam questions and the real PECB NIS-2-Directive-Lead-Implementer certification exam will amaze you. The similarity between the ActualCollection NIS-2-Directive-Lead-Implementer pdf questions and the actual NIS-2-Directive-Lead-Implementer certification exam will help you succeed in obtaining the highly desired PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) certification on the first go. You will notice the above features in the PECB NIS-2-Directive-Lead-Implementer Web-based format too. There is no need to go through time-taking installations or agitating plugins to use this format.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q47-Q52):

NEW QUESTION # 47

Scenario 6: Solicure is a leading pharmaceutical company dedicated to manufacturing and distributing essential medications. Thriving in an industry characterized by strict regulations and demanding quality benchmarks, Solicure has taken proactive steps to adhere to the requirements of the NIS 2 Directive. This proactive approach strengthens digital resilience and ensures the continued excellence of product offerings.

Last year, a cyberattack disrupted Solicure's research and development operations, raising concerns about the potential compromise of sensitive information regarding drug formulation. Solicure initiated an immediate investigation led by its cybersecurity team, gathering technical data to understand the attackers' methods, assess the damage, and swiftly identify the source of the breach. In addition, the company implemented measures to isolate compromised systems and remove the attackers from its network. Lastly, acknowledging the necessity for long-term security improvement, Solicure implemented a comprehensive set of security measures to comply with NIS 2 Directive requirements, covering aspects such as cybersecurity risk management, supply chain security, incident handling, crisis management, and cybersecurity crisis response planning, among others.

In line with its crisis management strategy, Solicure's chief information security officer, Sarah, led the initiative to develop a comprehensive exercise plan to enhance cyber resilience. This plan was designed to be adaptable and inclusive, ensuring that organizational decision-makers possessed the essential knowledge and skills required for effective cybersecurity threat mitigation. Additionally, to enhance the efficacy of its crisis management planning, Solicure adopted an approach that prioritized the structuring of crisis response.

A key aspect of Solicure's cybersecurity risk management approach centered on the security of its human resources. Given the sensitive nature of its pharmaceutical products, the company placed utmost importance on the employees' backgrounds. As a result, Solicure implemented a rigorous evaluation process for new employees, including criminal history reviews, prior role investigations, reference check, and pre-employment drug tests.

To comply with NIS 2 requirements, Solicure integrated a business continuity strategy into its operations. As a leading provider of life-saving medicines and critical healthcare products, Solicure faced high stakes, with potential production and distribution interruptions carrying life-threatening consequences for patients. After extensive research and consultation with business management experts, the company decided to utilize a secondary location to reinforce the critical operations at the primary site. Along with its business continuity management strategy, Solicure developed a set of procedures to recover and protect its IT infrastructure in the event of a disaster and ensure the continued availability of its medications.

Which of the following crisis management planning approaches did Solicure adopt? Refer to scenario 6.

- A. Resource-based approach
- **B. Crisis-driven approach**
- C. Resilience-based approach

Answer: B

NEW QUESTION # 48

According to Article 7 of the NIS 2 Directive, what is one of the aspects that the national cybersecurity strategy adopted by Member States must include?

- A. Plans for infrastructure development
- **B. A list of authorities and stakeholders**
- C. Policies on foreign trade agreements

Answer: B

NEW QUESTION # 49

What information does NOT have to be included in an asset inventory for effective asset management?

- A. Value of assets to the organization
- **B. Market value of assets**
- C. Location of asset

Answer: B

NEW QUESTION # 50

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

SafePost's risk management team has developed and approved several cybersecurity risk management measures intended to help the company in minimizing potential risks, protecting customer data, and ensuring business continuity. Is this in compliance with Article 20 of the NIS 2 Directive?

Refer to scenario 3.

- A. Yes, the risk management team is responsible for developing and approving cybersecurity risk management measures
- **B. No, the company's management body is responsible for approving cybersecurity risk management measures**
- C. No, the IT Department is solely responsible for developing and approving cybersecurity risk management measures

Answer: B

NEW QUESTION # 51

Which type of vulnerability assessment scans is primarily focused on evaluating websites and mobile applications of known software vulnerabilities and incorrect configurations?

- **A. Application scans**
- B. Network-based scans
- C. Web-based scans

Answer: A

NEW QUESTION # 52

.....
