最新L4M7考古題 - L4M7題庫最新資訊

L4M7資格認證考試是非常熱門的一項考試，雖然很難通過，但是你只要找准了切入點，考試合格並不是什麼難題。VCESoft就是你最好的選擇。VCESoft命中率高達100%的資料，可以幫你解決L4M7考試上的任何難題，只要你認真學習資料上的問題，相信一切難題都可以迎刃而解，你購買了考古題以後還可以得到一年的免費更新服務，一年之內，只要你想更新你擁有的資料，那麼你就可以得到最新版。快點來體驗一下吧。

最新的 Level 4 Diploma in Procurement and Supply L4M7 免費考試真題 (Q51-Q56):

問題 #51

The selection of the correct type of material handling equipment is important. If the width of the gangway between the racking in a warehouse is 2.4 meters (8 feet), what type of material handling equipment would be suitable?

- A. Counterbalance forklift truck
- **B. Narrow aisle forklift truck**
- C. Reach truck
- D. Hand pallet truck

答案： B

問題 #52

A barcode is a series of vertical bars of varying widths in which each of the digits 0 to 9 are represented by a different pattern of bars that can be read by a laser scanner. Which of the following are disadvantages of using barcodes? Select THREE that apply.

- * It requires optical line of sight (LOS) scanning to be effective
- * It does not allow real-time data to be collected accurately
- * Barcodes do not have read/write capabilities
- * Data entry is a slow operation and prone to errors
- * It is a new and unproven technology
- * It is labour-intensive as it requires individual scanning

- A. 2, 4, and 5
- B. 1, 2, and 3
- **C. 1, 3, and 6**
- D. 4, 5, and 6

答案： C

解題說明：

Barcode technology has several limitations:

- * Requires line-of-sight scanning (LOS): Barcodes must be directly visible to scanners, reducing flexibility in scanning items in bulk.
- * No read/write capabilities: Barcodes can only store static data, limiting functionality in dynamic inventory environments.
- * Labour-intensive: Each barcode must be scanned individually, making it time-consuming in high-volume environments.

Despite these limitations, barcodes are widely used due to their low cost. Whole-life asset management often considers RFID as a more efficient alternative to barcodes, especially in high-value asset tracking.

問題 #53

When decommissioning a piece of equipment, there may be an amount of contaminated hazardous waste that will need to be disposed of. Which of the following would need to be considered?

- * Whether it would be possible to recycle the waste and reuse it in another production process
- * Determining the most cost-effective method to dispose of the waste to minimize cost to the business
- * What the type of waste is and if it needs to be disposed of by a specialized organization
- * The applicable waste management legislation that applies in the country concerned

- A. 2 and 3 only
- B. 1 and 2 only
- **C. 3 and 4 only**
- D. 1 and 3 only

答案： C

解題說明：

When disposing of hazardous waste, it is essential to:

* Identify the type of waste: Some waste requires special handling and disposal by certified organizations.

* Comply with legislation: Proper disposal is mandated by local, national, or international waste management laws, ensuring public safety and environmental protection.

Whole-life asset management emphasizes responsible decommissioning practices to minimize environmental impact and adhere to regulatory compliance.

問題 #54

Extra units that are held in inventory to reduce the risks of stock-out are called...?

- A. Reorder point
- B. Demand variance
- C. Just-in-time
- D. Safety stock

答案： D

解題說明：

The safety stock (or buffer stock) is the stock level that limits stock shortages due to unforeseen events (forecasts not in line with demand, longer than expected supply time, etc...) Demand variance is the degree to which the demand in a fixed period deviates from the average demand of the same period.

A reorder point is the unit quantity on hand that triggers the purchase of a predetermined amount of replenishment inventory.

The just-in-time (JIT) inventory system is a management strategy that aligns raw-material orders from suppliers directly with production schedules.

LO 2, AC 2.1

問題 #55

A manufacturer has discovered that some of the stock in its storeroom is obsolete, and now wishes to take the appropriate action. Should the manufacturer write the stock off?

- A. No, the best approach would be to leave the stock where it is
- B. No, it should be included with the closing stock
- C. Yes, as it has no value it must be written off
- D. Yes, this will increase the sales for the period

答案： C

解題說明：

Writing off obsolete stock is standard practice as it no longer holds any value for the organization. This allows for accurate financial reporting by removing items that cannot be sold or used from the balance sheet.

Including it in closing stock would misrepresent asset values, while leaving it unsorted wastes valuable space.

Whole-life asset management emphasizes disposal or recycling options to avoid holding costs for unused assets, reducing storage costs and improving warehouse efficiency.

問題 #56

.....

人們相信需要一個標準化的、多國的、令人信服的考試來驗證個人在 CIPS 上技能的等級。同時，這個考試必須有利於公司雇用 CIPS 方面專業人才。為了實現這壹目的，CIPS 專家機構聯合多方力量設計和完善了 L4M7 認證考試。CIPS 專家機構通過全球的發展使之成為一個倍受公認和廣泛認可的 L4M7 認證考試體系。用戶應該可以自由選擇，在認證 CIPS 最高級工程師這壹關鍵領域不應固定於一個廠商。
