#### NEW QUESTION # 46

Which of the following are prerequisites for using the "RISE with SAP system transition workbench"? Note: There are 2correct answers to this question.

- A. The SAP Host Agent has been correctly configured.
- B. All custom ABAP code have been removed from the system.
- C. A migration server has been provisioned.
- D. The user received permission to access the operating system of the target system.

**Answer: A,C**

Explanation:

Step 1 - Understanding the question

This question relates to the RISE with SAP System Transition Workbench, a tool designed to support system conversions and migrations to SAP S/4HANA Cloud, Private Edition.

It helps automate and monitor the transition process, providing visibility and control during system migration.

Step 2 - Evaluate each option

Option A: A migration server has been provisioned.

This is correct.

Before using the System Transition Workbench, a migration server must be provisioned to serve as the technical environment where migration and transition activities are executed.

This server handles data transfer, configuration, and monitoring tasks during the transition.

Option B: The user received permission to access the operating system of the target system.

This is incorrect.

RISE with SAP environments are managed cloud environments, and users (including consultants) do not receive operating system-level access.

All activities are performed using SAP-provided tools and interfaces, not through direct OS access.

Option C: The SAP Host Agent has been correctly configured.

This is correct.

The SAP Host Agent is required for the System Transition Workbench to communicate with the systems involved in the migration.

It must be properly configured to enable the workbench to read system information, manage services, and perform health checks.

Option D: All custom ABAP code have been removed from the system.

This is incorrect.

Custom ABAP code is not required to be removed before using the workbench. Instead, it should be analyzed and remediated using the Custom Code Migration app or ABAP Test Cockpit (ATC), but its existence does not block the use of the workbench.
