

# NSE6\_FSR-7.3考古題介紹|高通率|立即下載

P.S. VCESoft在Google Drive上分享了免費的、最新的NSE6\_FSR-7.3考試題庫：<https://drive.google.com/open?id=1AZ37Pmescx9VptzIocsWMVS7CzQ5ftAH>

常常一次偶然的IT考試，會成為你奮鬥的力量，會改變你一生的命運。作為 Fortinet 一重要認證科目，NSE6\_FSR-7.3 考試是 Fortinet 公司的認證考試官方代號。我們的NSE6\_FSR-7.3 題庫參考資料是根據最新的考試動態變化而更新，VCESoft 會在第一時間更新。如果你還為了要不要使用這個網站的培訓資料而感到困惑或者猶豫不決，那麼你可以先在我們網站裏下載部分 NSE6\_FSR-7.3 試題及答案，免費試用，如果它很適合你，你可以再去購買也不遲，保證你絕不後悔。

## Fortinet NSE6\_FSR-7.3 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>• SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.</li></ul>
主題 2	<ul style="list-style-type: none"><li>• System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.</li></ul>
主題 3	<ul style="list-style-type: none"><li>• System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.</li></ul>
主題 4	<ul style="list-style-type: none"><li>• System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.</li></ul>
主題 5	<ul style="list-style-type: none"><li>• Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.</li></ul>

## Fortinet NSE6\_FSR-7.3 考古題介紹：Fortinet NSE 6 - FortiSOAR 7.3 Administrator 和資格考試的領導者

VCESoft 的 NSE6\_FSR-7.3 資料無疑是與 NSE6\_FSR-7.3 考試相關的資料中你最能相信的。如果你還是不相信，馬上親身體驗一下吧。這樣你肯定就會相信我說的了。你可以點擊 VCESoft 的網站下載考古題的 demo。PDF 版和軟體版都有，事先體驗一下吧。讓我們親自檢驗一下考古題的品質吧。

### 最新的 NSE 6 Network Security Specialist NSE6\_FSR-7.3 免費考試真題 (Q64-Q69):

#### 問題 #64

Which two statements about appliance users are true? (Choose two.)

- A. Appliance users use two-factor authentication for messages sent to the API.
- **B. Appliance users represent non-human users.**
- C. Appliance users use time-expiring tokens for primary authentication.
- **D. Appliance users do not have a login ID and do not add to the license count.**

答案：B,D

#### 解題說明：

In FortiSOAR, appliance users are accounts that represent non-human entities, such as system processes or integrations. These users do not require login IDs and therefore do not contribute to the licensing user count.

Appliance users are configured for backend tasks or to interact with external systems, enabling automated processes without consuming standard user licenses. This approach optimizes system resources and keeps licensing costs manageable.

#### 問題 #65

An administrator wants to collect and review all FortiSOAR log files to troubleshoot an issue. Which two methods can they use to accomplish this? (Choose two.)

- A. Review the contents of /var/log/messages.
- **B. Download the logs from the GUI.**
- C. Enter the `csacta services -status` command, and then copy the output.
- **D. Enter the `caacta log -collect directory` command.**

答案：B,D

#### 解題說明：

Administrators can collect and review FortiSOAR logs for troubleshooting in two primary ways. First, they can download logs directly from the GUI, which provides access to various logs through an intuitive interface. Secondly, using the command-line interface, the `csacta log --collect` command can be used to gather all logs within a specified directory, enabling more detailed offline analysis. Both methods offer comprehensive log collection to aid in diagnosing and resolving issues.

#### 問題 #66

Which two statements about Elasticsearch are true? (Choose two.)

- A. The minimum version of the Elasticsearch cluster must be 6.0.2, if you want to externalize the Elasticsearch data.
- B. To change the location of your Elasticsearch instance from the local instance to a remote location, you must update the `falcon.conf` file.
- **C. Elasticsearch allows you to store, search, and analyze huge volumes of data quickly. In near real time, and return answers in milliseconds.**
- **D. The global search mechanism in FortiSOAR leverages an Elasticsearch database to achieve rapid, efficient searches across the entire record system.**

答案：C,D

解題說明:

Elasticsearch in FortiSOAR is used for its robust data handling capabilities, allowing rapid storage, searching, and analysis of vast amounts of data in near real-time. Its integration with FortiSOAR's global search enables efficient querying across all records, providing quick response times and a seamless user experience. The Elasticsearch database is crucial for handling extensive datasets and delivering swift search results, making it integral to FortiSOAR's performance and data management capabilities.

問題 #67

Refer to the exhibit.

The screenshot shows the FortiSOAR configuration interface for the SMTP service. The 'Service' dropdown is set to 'SMTP'. The 'Email' field contains 'csadmin@internal.lab'. Below this, there is a note: 'Please ensure your SMTP service is configured.' The 'Monitoring Interval (Minutes)' is set to '5'. Under 'System Health Thresholds', the following values are configured: Memory Utilization (%) at 80, CPU Utilization (%) at 80, Disk Utilization (%) at 80, Swap Memory Utilization (%) at 50, Workflow Queue Threshold at 100, and WAL Files Size (GB) at 20. Under 'Cluster Health', the Missed Heartbeat Count is set to 3 and the Replication Lag (GB) is set to 3. A large watermark 'vcesoft.com' is overlaid on the image, and the 'FORTINET' logo is visible at the bottom.

How long after the syops-ha service goes down will the heartbeat missed notification be sent to the administrator?

- A. 3 minutes
- B. 60 minutes
- C. 15 minutes
- D. 5 minutes

答案: B

解題說明:

In FortiSOAR's high availability (HA) setup, if the cyops-ha service becomes unresponsive, the system is configured to send a "heartbeat missed" notification after a specified period, which in this case is 60 minutes. This delay allows for transient issues to be resolved without triggering immediate alerts, while also ensuring that administrators are informed of prolonged service disruptions. Timely notifications about the cyops-ha service's status help maintain the reliability and responsiveness of the HA environment.

問題 #68

What are three protocols that a Level 3 analyst must adhere to when developing a new SOC alert handling technique? (Choose three.)

- A. The analyst must update documentation to establish procedures for this type of incident.
- B. The analyst must identify the compromised indicators.
- C. The analyst must build SIEM rules or SOAR playbooks so that such incidents can be identified and indicators can be enriched.

- D. The analyst must be able to assign roles to teams based on their requirements.
- E. The analyst must be able to escalate alerts to incidents.

答案： A,B,C

解題說明：

Identifying compromised indicators is essential for determining the nature and scope of the alert and forming the basis for future detection.

Building SIEM rules or SOAR playbooks ensures that similar incidents can be automatically detected and indicators enriched for faster response.

Updating documentation establishes formal procedures for handling such incidents consistently in the future.

## 問題 #69

.....

VCESoft是一個可以成就很多IT人士的夢想的網站。VCESoft能為參加IT相關認證考試的考生提供他們想要的資料來助幫助他們通過考試。你還在為通過Fortinet NSE6\_FSR-7.3認證考試苦惱嗎？你有想過購買Fortinet NSE6\_FSR-7.3認證考試相關的課程來輔助你嗎？VCESoft可以為你提供這個便利，VCESoft提供的培訓資料可以有效地幫你通過認證考試。VCESoft提供的練習題幾乎真題是一樣的。有了VCESoft為你提供的精確的Fortinet NSE6\_FSR-7.3認證考試的練習題和答案，你可以以高分通過Fortinet NSE6\_FSR-7.3認證考試。
