Answer: D,E

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/ios-xml/ios/prog/configuration/171/b_171_programmability_cg/model_d

NEW QUESTION # 217

Which CI/CD tool is an automation tool used to build, test, and deploy software?

- A. Gradle
- B. Nagios
- C. Git
- **D. Jenkins**

Answer: D

Explanation:

Jenkins is a widely used automation tool for building, testing, and deploying software. It is an open-source CI/CD tool that supports the automation of various stages of software development through plugins, providing a robust platform for continuous integration and continuous deployment. Jenkins allows developers to integrate changes more frequently, improving collaboration and accelerating the development process.

Answer: A,D

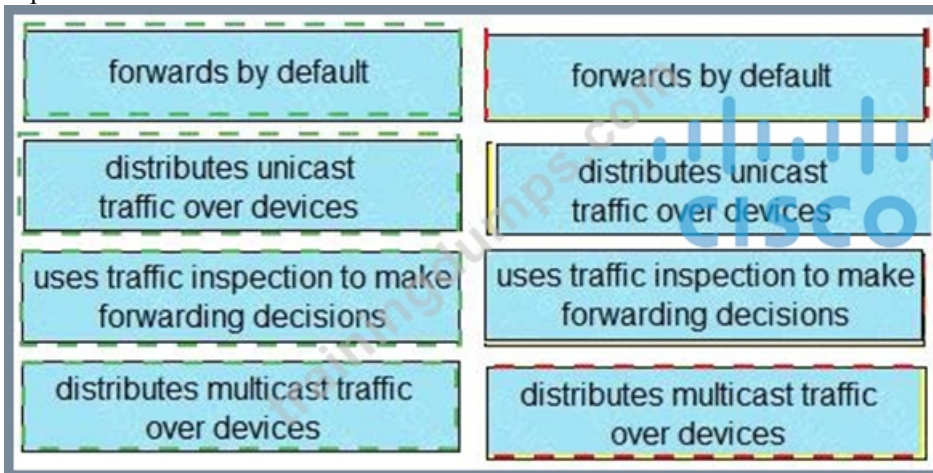

NEW QUESTION # 219

Drag and drop the functions from the left onto the networking devices on the right.

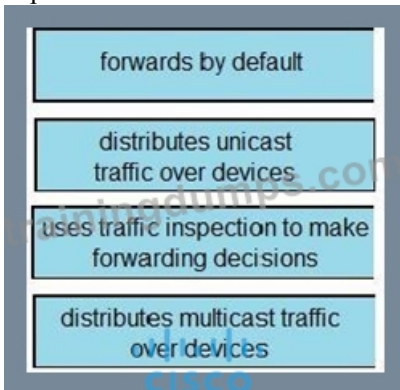

Answer:

Explanation:

Explanation:

NEW QUESTION # 220

What is the purpose of a MAC address?

- A. To uniquely identify a device on the internet
- B. To uniquely identify a network interface in a LAN
- C. To uniquely identify a router in a LAN
- D. To uniquely identify a switch in a LAN

Answer: B

Explanation:

A MAC (Media Access Control) address is a unique identifier assigned to a network interface card (NIC) for communications at the data link layer of a network segment. MAC addresses are used within local area networks (LANs) to ensure that data packets are delivered to the correct hardware device. Every network interface on a device, such as a computer, router, or switch, has a unique MAC address.
