ExamCost has launched the HCL-DOM-AADM-12 exam dumps with the collaboration of world-renowned professionals.

HCL Software Academy HCL Software Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q50-Q55):

NEW QUESTION # 50

What happens when an administrator uses the Domino Administrator Client to register a new user?

- A. Only a mail file is created
- B. Only an internet password is generated
- C. An LDAP record is created in the Domino Directory
- **D. A Person document and Notes ID file are created**

Answer: D

Explanation:

The registration process automates the creation of the user's digital identity in the Domino domain. This includes adding a Person document to the Domino Directory (names.nsf) to store the user's configuration and public key, and generating a Notes ID file ,

which is the secure file containing the user's private key used for authentication.

NEW QUESTION # 51

The file used to automate a silent installation of Domino is called a _____.

- A. setup.ini
- **B. response file**
- C. notes.ini
- D. config.sys

Answer: B

Explanation:

During a silent installation, the installer reads configuration parameters from a response file . This file (typically created by recording a manual installation or editing a template) contains all the choices an administrator would normally make in the GUI, such as the installation directory, data directory, and components to be installed, allowing the process to run unattended.

NEW QUESTION # 52

Which two steps are required to reclaim space from DAOS after deleting large numbers of documents?
(Choose two)

- **A. Issue tell daosmgr resync command**
- **B. Issue tell daosmgr prune command**
- C. Enable Transaction Logging
- D. Run the Fixup task

Answer: A,B

Explanation:

The Domino Attachment and Object Service (DAOS) stores attachments separately from NSF files. When documents are deleted, the associated attachment files (.NLO) are not immediately removed from the storage.

To reclaim this physical disk space, an administrator must:

* Issue the tell daosmgr prune command : This identifies and deletes attachment files that are no longer referenced by any database and have exceeded the deferral interval.

* Issue the tell daosmgr resync command : This synchronizes the DAOS catalog (daoscat.nsf) with the physical files on disk to ensure the repository is accurate.

NEW QUESTION # 53

When a user is renamed, which AdminP request must complete to update ACLs across databases?

- A. Rename Person in Domino Directory
- B. Update User Certificate
- **C. Rename in ACL**
- D. Synchronize Replicas

Answer: C

Explanation:

The Administration Process (AdminP) handles user renames in several stages. After the user accepts the name change in their Notes client, AdminP triggers a series of requests. The specific request responsible for searching through every database on the server and changing the user's old name to the new name in the Access Control List is the Rename in ACL request. This ensures the user retains their permissions under their new identity.

NEW QUESTION # 54

What is the purpose of the Server > Status tab in the Domino Administrator Client?

- A. To reset user passwords
- B. To register new Domino servers
- C. To configure server security settings
- **D. To display real-time server activity and task status**

Answer: D

Explanation:

The Server > Status tab is the primary interface for active server monitoring. It allows administrators to display real-time server activity, view the current list of running tasks (such as AdminP or Router), and observe the server console to verify that the environment is running correctly and efficiently.

NEW QUESTION # 55

.....

We provide three versions of HCL-DOM-AADM-12 study materials to the client and they include PDF version, PC version and APP online version. Different version boosts own advantages and using methods. The content of HCL-DOM-AADM-12 exam torrent is the same but different version is suitable for different client.
