## CSI Canadian Securities Course Exam2 Sample Questions (Q89-Q94):

### NEW QUESTION # 89

What industry stocks tend to have lower betas than the market?

- A. Transportation
- B. Automobiles and components
- C. Capital goods
- D. Utilities

**Answer: D**

Explanation:

Beta is a measure of a stock's volatility compared to the overall market. Stocks with lower betas tend to experience smaller price fluctuations relative to the market.

\* Utilities: Utility companies generally have stable and predictable revenue streams because they provide essential services like electricity, water, and gas, which are always in demand regardless of economic cycles. As a result, utility stocks have lower betas, reflecting their lower sensitivity to market movements.

\* Why Other Options Are Incorrect:

\* A. Transportation: Stocks in this sector are more sensitive to economic changes and fuel prices, leading to higher betas.

\* B. Capital Goods: This sector involves investments in industrial equipment and machinery, which fluctuate with economic cycles and have higher betas.

\* D. Automobiles and Components: This industry is cyclical and highly dependent on economic trends, leading to higher betas.

References:

\* CSC Volume 2, Chapter 13: Risk and return in specific industries.

### NEW QUESTION # 90

When considering the overall investment objectives of liquid alternatives, what time horizon is the most appropriate for retail investors when investing in these funds?

- A. Short-to medium-term
- B. Medium-term
- C. Long-term
- D. Short-term

**Answer: C**

Explanation:

Liquid alternatives, also known as alternative mutual funds, combine features of traditional mutual funds with hedge fund-like strategies. They provide access to alternative investments such as derivatives, short-selling, and leverage while adhering to stricter regulations for retail investors. These funds are designed to achieve diversification and risk-adjusted returns that are less correlated with traditional stock and bond markets.

When considering liquid alternatives, a long-term investment horizon is most appropriate for retail investors.

The key reasons include:

\* **Volatility and Complexity:** Liquid alternatives can be more volatile than traditional funds due to their use of sophisticated strategies like leverage or derivatives. This requires a long-term outlook to weather short-term fluctuations.

\* **Objective of Absolute Returns:** Liquid alternatives are often structured to provide positive returns over a full market cycle, which typically spans several years.

\* **Diversification Benefits:** The risk mitigation offered by these funds unfolds over time as they reduce the portfolio's overall exposure to specific market conditions.

Investors seeking short-term gains may not benefit as much due to the time required for the strategies employed to materialize their intended results. Long-term objectives align better with the nature of liquid alternatives and their ability to smooth returns.

:

CSC Volume 2, Chapter 20: "Alternative Investments: Strategies and Performance," discusses the structure and time horizon considerations for liquid alternatives.

#### NEW QUESTION # 91

A client recently sold her holdings in JKL Equity Fund. The client's transactions in the fund are Summarized below:

Year	Description	Amount (\$)
1	Bought 500 JKL Equity Fund @ \$10.50 per unit (no load)	5,250.00
2	Reinvested distribution (75% capital gains; 25% Canadian dividends) Bought 20.5 JKL Equity Fund @ \$11.50 per unit	235.75
3	Reinvested distribution (80% capital gains; 20% Canadian dividends) Bought 35.5 JKL Equity Fund @ \$12.25 per unit	434.88
4	Sold 556 JKL Equity Fund @ \$12.75 per unit	7,089.00

What is the client's capital gain from the sale of the fund in Year 4?

- A. \$1,168.37
- B. \$1,839.00
- C. \$1,155.25
- D. \$2,509.63

**Answer: A**

#### NEW QUESTION # 92

An advisor to explain the benefits of labour sponsored funds (LSVCC) to some of his clients.

With which client should the advisor have this discussion?

Client 1	The client is in their prime earning years. They are looking to add risk in their portfolio and is comfortable with investments with prolonged lockup periods. Tax benefits in the form of federal tax credits would certainly be a plus.
Client 2	The client is in their early earning years. While there's an appetite for more risk, the client cares a great deal about liquidity.
Client 3	The client is seeking investments that can provide offsetting tax credits for their income. The client is generally willing to take on risk and is willing to tolerate lower liquidity. The client is insistent that the tax credits can be carried forward.
Client 4	The client has a fairly stable income, but has indicated a willingness to add risk to their portfolio. While tolerant of lower liquidity, the client is particularly sensitive to high fees.

- A. Client 2
- B. Client 4
- C. Client 3
- **D. Client 1**

**Answer: D**

Explanation:

Labour Sponsored Venture Capital Corporations (LSVCCs), or labour-sponsored funds, are high-risk investments designed to stimulate job creation and economic growth. They provide tax benefits in the form of federal and, in some cases, provincial tax credits, making them attractive to investors in higher income brackets who are comfortable with the following:

- \* Increased portfolio risk
- \* Reduced liquidity due to long lockup periods
- \* High potential tax incentives

Analysis of Clients:

\* Client 1:

- \* In their prime earning years and comfortable with higher risk and long lockup periods.
- \* Interested in tax benefits in the form of federal tax credits.
- \* Matches the profile of an ideal candidate for LSVCCs.

\* Client 2:

- \* In early earning years and prioritizes liquidity over other factors.
- \* LSVCCs are unsuitable due to their lack of liquidity (e.g., lockup periods).

\* Incorrect

\* Client 3:

- \* Focused on investments with offsetting tax credits but insists on tax credits being carried forward.
- \* LSVCC tax credits cannot typically be carried forward, making them unsuitable.

\* Incorrect

\* Client 4:

- \* Stable income but sensitive to high fees.
- \* LSVCCs generally have high management fees, making them unsuitable.

\* Incorrect

References to Canadian Securities Course Exam 2 Study Materials:

- \* Volume 2, Chapter 22 - Labour Sponsored Venture Capital Corporations
- \* Discusses LSVCCs, their tax advantages, high-risk nature, and reduced liquidity.
- \* Volume 2, Chapter 24 - Canadian Taxation
- \* Explains federal and provincial tax credits applicable to LSVCCs and their suitability for higher- income clients.

### NEW QUESTION # 93

What risk of investing in split shares is specific to a preferred shareholder?

- A. Reinvestment
- B. Volatility
- **C. Dividend cuts**
- D. Leverage

**Answer: C**

## NEW QUESTION # 94

.....
