Revised and updated according to the syllabus changes and all the latest developments in theory and practice, our Oracle Manufacturing Cloud 2025 Implementation Professional dumps are highly relevant to what you actually need to get through the certifications tests. Moreover they impart you information in the format of 1z0-1075-25 Questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge but also find the opportunity to practice real exam scenario. For consolidation of your learning, our Oracle Manufacturing Cloud 2025 Implementation Professional dumps PDF file also provide you sets of practice questions and answers. Doing them again and again, you enrich your knowledge and maximize chances of an outstanding exam success.

The experts in our company have been focusing on the 1z0-1075-25 examination for a long time and they never overlook any new knowledge. The content of our 1z0-1075-25 study materials has always been kept up to date. We will inform you by E-mail when we have a new version. With our great efforts, our 1z0-1075-25 practice dumps have been narrowed down and targeted to the 1z0-1075-25 examination. We can ensure you a pass rate as high as 99%!

Interactive 1z0-1075-25 Testing Engine & Latest 1z0-1075-25 Test Voucher

As the content of the 1z0-1075-25 exam is changing from time to time, you may feel anxious that it seems too hard to know the

changes. Now, all complicate tasks have been done by our experts. They have rich experience in predicating the 1z0-1075-25 exam. Then you are advised to purchase the study materials on our websites. Also, you can begin to prepare the 1z0-1075-25 Exam. You are advised to finish all exercises of our 1z0-1075-25 preparation questions and pass the exam by the first attempt very easily.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

A Manufacturing Engineer in a plant is creating an alternate manufacturing process for an item using its existing work definitions. After copying from the existing work definition, WD1, to the alternate work definition, WD2, the engineer finds that the operation items were not copied in the alternate manufacturing process WD2.

What is the reason for this?

- A. Start Date was not populated in the new WD2 during creation.
- B. Item and Structure Name in the existing WD1 were retained in the new WD2 during creation.
- C. Production Priority was not populated in the new WD2 during creation.
- D. Item and Structure Name were changed in the new WD2 during creation.

Answer: D

Explanation:

When creating an alternate work definition (WD2) by copying from an existing one (WD1), if the Item and Structure Name were changed during the creation of WD2, the operation items would not be copied. This is because operation items are tied to specific item structures. Changing the structure results in a disconnect between the original operation items and the new work definition. * Item and Structure Name are critical in ensuring that the operation items (components and materials) are transferred when copying work definitions. If these names are changed, the system does not assume the same items should be used. Oracle Manufacturing Cloud documentation explains that maintaining consistency in the Item and Structure Name is key when copying work definitions to ensure all operation items are carried over.

NEW QUESTION # 48

Which statement is NOT true about user-defined work order statuses?

- A. The system automatically updates user-defined work order statuses.
- B. All the new statuses are searchable so you can filter your job and manage the work order life cycle more easily.
- C. It is not recommended to update the name of the system status.
- D. They are displayed on work order reports.

Answer: A

Explanation:

User-defined work order statuses provide flexibility in managing the lifecycle of work orders in Oracle Manufacturing Cloud.

However, the following is not true :

* The system does not automatically update user-defined work order statuses . These statuses are manually updated by users to reflect the work order ' s progress through custom-defined states.

Correct statements:

* Displayed on work order reports : User-defined statuses are visible in work order reports, allowing users to track the status of different orders.

* Name changes to system status : It is not recommended to alter system-defined status names as it could disrupt core system processes and workflows.

* Searchability of new statuses : User-defined statuses are searchable, making it easier to manage and track work orders.

Oracle Manufacturing Cloud guide explains that user-defined statuses are not automatically updated and require manual input for lifecycle management.

NEW QUESTION # 49

Production operations need operators to execute the right steps to produce quality products, so want to use " View Document Items on a Dispatch List. " Which statement is NOT true?

- A. You can view the document item attachment in the dispatch list and on the Manage Supplier Operations page by using the attachment icon.
- B. You cannot view the document item attachment on the Manage Supplier Operations page.
- C. You will always see the active revision of the attachment from currently effective revision of the document from Master Organization.
- D. You can add attachments to the document item and invoke the engineering change order to release the latest revision of the document item and attachment.

Answer: C

Explanation:

When using the "View Document Items on a Dispatch List" functionality, production operators can view and access necessary document attachments to ensure correct steps in the manufacturing process. The statement that is not true is:

* Statement B is incorrect because you do not always see the active revision of the attachment from the currently effective revision in the Master Organization. The revision displayed in the dispatch list may depend on the specific version that was assigned to the work order or operation at the time of creation, not necessarily the most current revision in the Master Organization.

Correct statements:

* Statement A : Document attachments cannot be viewed on the Manage Supplier Operations page.

* Statement C : Attachments can be added to document items, and updates can be managed through engineering change orders.

* Statement D : Document item attachments are viewable both in the dispatch list and on the Manage Supplier Operations page via the attachment icon.

Oracle Manufacturing Cloud's "Dispatch List" functionality documentation outlines how document item attachments are handled and displayed.

NEW QUESTION # 50

An employee is responsible for dealing with different manufacturing practices and processes, machines, tools, and equipment that turn raw material into a product.

Which seeded job role must you assign to this employee?

- A. Manufacturing Engineer
- B. Production Engineer
- C. Production Supervisor
- D. Production Operator
- E. Manufacturing Supervisor

Answer: A

Explanation:

In Oracle Manufacturing Cloud, the Manufacturing Engineer role is responsible for dealing with various manufacturing practices, processes, machines, tools, and equipment that transform raw materials into finished products. This role focuses on defining and managing production processes, resources, and operations in manufacturing plants.

* Manufacturing Engineer : This role involves creating and maintaining manufacturing processes, production resources, and work instructions. It ensures that products are manufactured efficiently and in compliance with quality standards.

Oracle Cloud documentation for "Manufacturing Engineer" describes this role as the primary one for handling manufacturing setups, process definitions, and equipment management in the system.

NEW QUESTION # 51

Your client is planning to override the Plant Production Calendar with One or More Date-Effective Work Center Calendars. You need to explain the consideration when using the Override the Plant Production Calendar with One or More Date-Effective Work Center Calendars feature.

Which three statements are true when overriding the production calendar?

- A. While defining override calendars, you need to ensure that the date effective range for a work center calendar association can be overlapping and contiguous.
- B. The Work Execution Work Area Infolets and Manage Production Exceptions page are based on the plant calendar and not on work center calendars.
- C. When the user executes search action in the Review Dispatch List page, if more than one work center are selected and if the start date or completion date is based on Shift-based search, then the operations are queried based on the shifts of the plant calendar only.

- D. Even if there are override calendars, the lead time calculation in days for an item remains based on the plant calendar and not on work center calendars.
- E. Supplier operations used in outside processing use the work center calendar in work order scheduling.

Answer: B,C,D

Explanation:

Overriding the plant production calendar with date-effective work center calendars provides flexibility in scheduling specific work centers with different operating hours. However, certain aspects of production planning and execution remain tied to the plant-level calendar. Here are the details:

* Statement A : The Work Execution Work Area Infolets and Manage Production Exceptions page are based on the plant calendar and not on work center calendars - Even when work centers have their own calendars, the high-level overview and exception reporting remain based on the plant calendar.

* Statement C : Lead time calculation in days for an item remains based on the plant calendar - Lead times are calculated using the plant calendar, regardless of work center-specific calendars, ensuring consistency in planning.

* Statement D : Search actions in the Review Dispatch List page query operations based on the plant calendar shifts when multiple work centers are selected - For consistency in dispatching, the system references the plant calendar when shift-based search parameters are used across multiple work centers.

Incorrect Statements:

* Statement B : Date-effective ranges for work center calendars should not overlap for accuracy in scheduling.

* Statement E : Supplier operations in outside processing generally rely on the plant calendar for consistency unless explicitly configured otherwise.

Oracle Manufacturing Cloud documentation on " Calendar Overrides " explains how plant and work center calendars interact and the impact on work execution, scheduling, and reporting

NEW QUESTION # 52

.....

Our website offer you the latest 1z0-1075-25 dumps torrent in pdf version and test engine version, which selected according to your study habit. You can print our 1z0-1075-25 practice questions out and share the materials with your classmates and friends. The test engine version is a way of exam simulation that helps you get used to the atmosphere of 1z0-1075-25 Real Exam and solve the problems with great confidence.
