

VMware 3V0-23.25 Latest Braindumps Files & Reliable 3V0-23.25 Test Preparation

P.S. Free & New 3V0-23.25 dumps are available on Google Drive shared by Actual4Exams: <https://drive.google.com/open?id=1BOo-yxcRH7w3P2uMROCHm7QzQqKMFPgJ>

The 3V0-23.25 Mock Exams not just give you a chance to self-access before you actually sit for the certification exam, but also help you get an idea of the VMware exam structure. It is well known that students who do a mock version of an exam benefit from it immensely. Some VMware certified experts even say that it can be a more beneficial way to prepare for the Advanced VMware Cloud Foundation 9.0 Storage exam than spending the same amount of time studying.

Through the stimulation of the 3V0-23.25 real exam the clients can have an understanding of the mastery degrees of our 3V0-23.25 exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way. In the answers, our experts will provide the authorized verification and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times. All we do is to integrate the most advanced views into our 3V0-23.25 Test Guide.

Reliable 3V0-23.25 Test Preparation | 3V0-23.25 Standard Answers

We keep raising the bar of our 3V0-23.25 real exam for we hold the tenet of clientele orientation. According to former exam candidates, more than 98 percent of customers culminate in success by their personal effort as well as our 3V0-23.25 study materials. So indiscriminate choice may lead you suffer from failure. As a representative of clientele orientation, we promise if you fail the practice exam after buying our 3V0-23.25 training quiz, we will give your compensatory money full back.

VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q70-Q75):

NEW QUESTION # 70

A Compliance Auditor is reviewing an air-gapped VCF Workload Domain used for classified operations. The Customer Experience Improvement Program (CEIP) and vCenter internet access are permanently disabled. The vSAN Health Check constantly reports "vSAN HCL DB is outdated".

...

[vSAN Cluster Configuration]

vSAN Edition: Enterprise Plus (vSAN 8.0 U2)

CEIP: Disabled

Internet Access: None (Air-gapped)

...

How must the administrator resolve this compliance alert in this specific restricted environment?

- A. The administrator must download the all.json HCL file from the VMware public portal onto an internet-connected workstation, transfer it to the internal network, and manually upload it via the "Update from file" option in the vCenter vSAN Health UI.

- B. The update occurs automatically whenever the administrator applies a new vSphere Lifecycle Manager (vLCM) cluster image, as the latest HCL JSON is hard-coded into the ESXi installation ISO.
- C. SDDC Manager automatically bypasses the air-gap by establishing a secure dark-fiber connection to the VMware cloud to stream the HCL database directly into ESXi memory.
- D. The administrator must disable the "Controller Firmware" health checks in Skyline Health, as HCL updates are strictly unsupported in non-CEIP environments.

Answer: A

NEW QUESTION # 71

A VCF Architect is designing a new vSAN Express Storage Architecture (ESA) cluster. The architect is comparing how Objects and Components are handled in the new ESA log-structured filesystem compared to the legacy VMFS-L block structure of vSAN OSA.

...

[Log Snippet: vmkernel.log - vSAN ESA Component Instantiation]

2026-11-20T10:00:00Z INFO vsan-lsom - Object 5543... placed on Storage Pool (NVMe namespace).

2026-11-20T10:00:01Z INFO vsan-dom - Snapshot created. B-Tree metadata updated. Zero delta components generated.

...

Which of the following statements accurately describe the evolution of Object and Component mechanics in vSAN ESA? (Select all that apply.)

- A. ESA Native Snapshots update the object's B-Tree metadata directly, meaning a snapshot no longer generates a new physical SEsparse "Delta Component" object, vastly reducing component bloat and VM Stun time.
- B. In ESA, standard VMDK objects are converted into Raw Device Mappings (RDMs) that bypass the DOM layer to achieve NVMe line-rate speeds.
- C. ESA eliminates the 255 GB physical component size limit, allowing a single 62 TB VMDK to exist as a single physical NVMe component.
- D. In ESA, components are no longer bound by the rigid "Disk Group" construct; components span the unified NVMe Storage Pool, allowing the loss of a single NVMe drive to degrade only the components on that drive, rather than failing the entire pool.
- E. ESA enables highly efficient Erasure Coding (RAID-5/6) at native RAID-1 performance, meaning architects can configure component layouts using fewer components for parity without sacrificing IOPS.

Answer: A,D,E

NEW QUESTION # 72

An L3 Support Engineer is called into a war room. A vSAN ESA Stretched Cluster (Site A and Site B, with Witness at Site C) has suffered a complex cascade failure.

Current State:

1. Site B suffered a total power loss.
2. Simultaneously, the Witness Appliance network link at Site C was severed.
3. Site A remains fully operational with no hardware faults.

The VMs originally running on Site B are unreachable. The VMs originally running on Site A are frozen.

The Storage Policy configuration is shown below:

...

```
# Stretched Cluster Policy
```

```
[Site-Disaster-Tolerance]
```

```
Rule = "Dual site mirroring (stretched cluster)"
```

```
[Failures-to-Tolerate]
```

```
Rule = "1 failure - RAID-5 (Erasure Coding) [Local]"
```

```
[Advanced-Rule]
```

```
ForceProvisioning = 0
```

...

Based on the integration of Object Health states and Stretched Cluster topology, why are the VMs on Site A frozen, and what is the exact status of their storage objects? (Select all that apply.)

- A. The objects for Site A VMs are "Inaccessible" because Site A holds only the local replica (1 vote), while the Site B replica

- (1 vote) and the Witness (1 vote) are both unavailable, resulting in a loss of cluster quorum (<50%).
- B. The local RAID-5 policy rule on Site A cannot override the primary Stretched Cluster quorum; both site-level components and local components must be evaluated.
 - C. Restoring network connectivity to the Witness at Site C is the fastest operational path to restore object accessibility for the VMs on Site A.
 - D. The objects are in "Reduced Availability" (ABSENT state) because the Dual Site Mirroring policy allows Site A to maintain independent quorum using its local RAID-5 parity blocks.
 - E. The ForceProvisioning = 0 rule prevents vSphere HA from restarting the VMs on Site A until Site B is recovered.

Answer: A,B,C

NEW QUESTION # 73

An administrator is preparing to enable vSAN Data-at-Rest Encryption and must verify that the identity and key provider prerequisites are met before proceeding with the configuration.

Which two requirements must be met? (Choose two.)

- A. OSA requires a trusted KMS identity before encryption can be enabled.
- B. OSA does not support external KMS integration.
- C. ESA requires a trusted KMS identity before encryption can be enabled.
- D. OSA requires Trusted Platform Modules (TPMs).
- E. ESA requires Trusted Platform Modules (TPMs).

Answer: A,C

Explanation:

Both vSAN OSA and vSAN ESA require a trusted key provider before Data-at-Rest Encryption can be enabled. With a standard external KMS, the configuration process includes adding the KMS to vCenter and establishing trust with the KMS. vCenter then provisions encryption keys from the key provider. The vSAN encryption workflow uses a Key Encryption Key from the KMS to protect Data Encryption Keys used by ESX hosts. This requirement applies to vSAN encryption generally and is not limited to a specific vSAN architecture. OSA supports external KMS integration, so the option stating that OSA does not support external KMS integration is incorrect. Trusted Platform Modules are not mandatory prerequisites for either OSA or ESA. The vSphere key provider requirements state that TPM is not required for a standard key provider or for vSphere Native Key Provider, although Native Key Provider availability can optionally be restricted to hosts with TPMs. Therefore, the mandatory prerequisite is a trusted KMS identity for both OSA and ESA. Reference topics: vSAN Data-at-Rest Encryption, Standard Key Provider, KMS Trust, OSA and ESA Encryption Support, TPM Requirements.

NEW QUESTION # 74

A SOC Analyst observes a security event regarding Data-in-Transit (DIT) encryption on a vSAN ESA cluster managed via SDDC Manager.

...

```
[Log Snippet: vmkernel.log - ESXi Network Stack]
2026-11-20T11:00:00Z INFO vsan-dom - DOM Client payload compressed
(Ratio 4:1).
2026-11-20T11:00:01Z INFO vsan-dit - Payload encrypted.
2026-11-20T11:00:02Z INFO tcp_ip - Transmission over vmk2.
...
```

How does the vSAN ESA I/O pipeline sequence compare to OSA, and why is this specific sequence critical for both Security and Network Performance? (Select all that apply.)

- A. ESA eliminates Data-in-Transit encryption because the log-structured namespace is natively unreadable to network sniffers.
- B. In legacy OSA, uncompressed data was sent over the network and compressed only at the bottom of the stack (LSOM) just before hitting the disk.
- C. The ESA pipeline sequence generates 4x more network traffic than OSA because the DOM client must replicate standard parity bits.
- D. If the pipeline encrypted the data first, compression would fail because encrypted data consists of high-entropy ciphertext that cannot be compressed.
- E. In ESA, data is compressed at the TOP of the stack (DOM Client) before being encrypted and sent over the network.

Answer: B,D,E

NEW QUESTION # 75

.....

VMware 3V0-23.25 study guide files will help you get a certification easily. Let's try to make the best use of our resources and take the best way to clear exams with VMware 3V0-23.25 Study Guide files. If you are an efficient working man, purchasing valid study guide files will be suitable for you.

Reliable 3V0-23.25 Test Preparation: <https://www.actual4exams.com/3V0-23.25-valid-dump.html>

We can make sure that we must protect the privacy of all customers who have bought our 3V0-23.25 test questions, The VMware 3V0-23.25 certification exam offers a great opportunity for professionals to demonstrate their expertise and knowledge level, VMware 3V0-23.25 Latest Braindumps Files All small buttons are designed to be easy to understand, 3V0-23.25 study guide of us will help you pass the exam successfully.

One Year Older, He guides you through every feature and technique 3V0-23.25 you need to write quality CoffeeScript code and shows how to take advantage of CoffeeScript's increasingly robust toolset.

Ace Your VMware 3V0-23.25 Exam with Actual4Exams

We can make sure that we must protect the privacy of all customers who have bought our 3V0-23.25 Test Questions, The VMware 3V0-23.25 certification exam offers a great opportunity for professionals to demonstrate their expertise and knowledge level.

All small buttons are designed to be easy to understand, 3V0-23.25 study guide of us will help you pass the exam successfully, Unlike the traditional way of learning, the great benefit of our 3V0-23.25 learning material is that users can flexibly adjust their learning plans.
