Salesforce Certified Platform App Builder Sample Questions (Q250-Q255):

NEW QUESTION # 250

What type of data cannot be imported using the import wizard?

- **A. Users**
- B. Accounts and Contacts
- C. Leads
- D. Custom Objects

Answer: A

NEW QUESTION # 251

An app builder at Cloud Kicks has been working on changes to a custom Shoe Sales app in a sandbox and is ready to deploy their changes to production with a change set. Part of the work included updates to a permission set.

What should the app builder take into consideration when deploying the change set to production?

- A. Change to field-level security in the permission set will not be applied.
- B. The existing permission set will be completely overwritten.
- **C. The deployed permission set will merge with the existing permission set.**
- D. The deployed permission set will only contain changes related to the change set.

Answer: C

Explanation:

* The deployed permission set will merge with the existing permission set in production, meaning changes made in the sandbox will be added to the existing permission set after deployment. References:

* Salesforce Help - Permission Sets

NEW QUESTION # 252

What is true about unmanaged packages?

- **A. All of the above.**
- B. The developer who created and uploaded the unmanaged package has no control over the installed components, and can't change or upgrade them.
- C. Once the components are installed from an unmanaged package, the components can be edited in the organization they are installed in.
- D. Unmanaged packages should not be used to migrate components from a sandbox to production organization. Instead, use Change Sets.

Answer: A

NEW QUESTION # 253

Universal Containers wants to streamline its data capture process by linking fields together. UC wants to do this so that the available values on dependent fields are driven by values selected on controlling fields.

Which three considerations support the stated requirements? (Choose three.)

- **A. Multi-select picklists can be dependent picklists but not controlling fields.**
- B. The data import wizards only allow values to be imported into a dependent picklist if they match the appropriate controlling field.
- **C. Checkbox fields can be controlling fields but not dependent fields.**
- **D. Custom picklist fields can be either controlling or dependent fields.**
- E. Standard and custom picklist fields can be dependent fields.

Answer: A,C,D

NEW QUESTION # 254

Representatives at Cloud Kicks use Salesforce to record information for new Leads. When new prospects are added, an outbound

message is sent to the data warehouse with the Lead's information.
What automation tool should an app builder use to meet this requirement?

- A. Design an approval process that sends an outbound message.
- B. Create a workflow rule with an outbound message as the action.
- C. Create a process using Process Builder to send an outbound message.
- D. Use Lightning Flow to send an outbound message.

Answer: B
