

# Palo Alto Networks SSE-Engineer New Braindumps Pdf | Trustworthy SSE-Engineer Source

DOWNLOAD the newest Real4Prep SSE-Engineer PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1uWUwFBRYLKgyaCaRVf5\\_JGzudIDjKMRQ](https://drive.google.com/open?id=1uWUwFBRYLKgyaCaRVf5_JGzudIDjKMRQ)

Our SSE-Engineer study materials will be very useful for all people to improve their learning efficiency. If you do all things with efficient, you will have a promotion easily. If you want to spend less time on preparing for your SSE-Engineer exam, if you want to pass your SSE-Engineer exam and get the certification in a short time, our SSE-Engineer Study Materials will be your best choice to help you achieve your dream. Only studying with our SSE-Engineer exam questions for 20 to 30 hours, you will be able to pass the SSE-Engineer exam with confidence.

Revealing whether or not a man succeeded often reflect in the certificate he obtains, so it is in IT industry. Therefore there are many people wanting to take Palo Alto Networks SSE-Engineer exam to prove their ability. However, want to pass Palo Alto Networks SSE-Engineer Exam is not that simple. But as long as you get the right shortcut, it is easy to pass your exam. We have to commend Real4Prep exam dumps that can avoid detours and save time to help you sail through the exam with no mistakes.

**Latest SSE-Engineer New Braindumps Pdf, Ensure to pass the SSE-Engineer Exam**

The SSE-Engineer certification is the way to go in the modern Palo Alto Networks era. Success in the Palo Alto Networks Security Service Edge Engineer exam of this certification plays an essential role in an individual's future growth. Nowadays, almost every tech aspirant is taking the test to get SSE-Engineer certification and find well-paying jobs or promotions. But the main issue that most of the candidates face is not finding updated Palo Alto Networks SSE-Engineer Practice Questions to prepare successfully for the Palo Alto Networks SSE-Engineer certification exam in a short time.

## Palo Alto Networks SSE-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Prisma Access Services: This section of the exam measures the skills of Cloud Security Architects and covers advanced features within Prisma Access. Candidates are assessed on how to configure and implement enhancements like App Acceleration, traffic replication, IoT security, and privileged remote access. It also includes implementing SaaS security and setting up effective policies related to security, decryption, and QoS. The section further evaluates how to create and manage user-based policies using tools like the Cloud Identity Engine and User ID for proper identity mapping and authentication.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Prisma Access Troubleshooting: This section of the exam measures the skills of Technical Support Engineers and covers the monitoring and troubleshooting of Prisma Access environments. It includes the use of Prisma Access Activity Insights, real-time alerting, and a Command Center for visibility. Candidates are expected to troubleshoot connectivity issues for mobile users, remote networks, service connections, and ZTNA connectors. It also focuses on resolving traffic enforcement problems including security policies, HIP enforcement, User-ID mismatches, and split tunneling performance issues.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Prisma Access Administration and Operation: This section of the exam measures the skills of IT Operations Managers and focuses on managing Prisma Access using Panorama and Strata Cloud Manager. It tests knowledge of multitenancy, access control, configuration, and version management, and log reporting. Candidates should be familiar with releasing upgrades and leveraging SCM tools like Copilot. The section also evaluates the deployment of the Strata Logging Service and its integration with Panorama and SCM, log forwarding configurations, and best practice assessments to maintain security posture and compliance.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Prisma Access Planning and Deployment: This section of the exam measures the skills of Network Security Engineers and covers foundational knowledge and deployment skills related to Prisma Access architecture. Candidates must understand key components such as security processing nodes, IP addressing, DNS, and compute locations. It evaluates routing mechanisms including routing preferences, backbone routing, and traffic steering. The section also focuses on deploying Prisma Access service infrastructure for mobile users using VPN clients or explicit proxy and configuring remote networks. Additional topics include enabling private application access using service connections, Colo-Connect, and ZTNA connectors, implementing identity authentication methods like SAML, Kerberos, and LDAP, and deploying Prisma Access Browser for secure user access.</li> </ul>

## Palo Alto Networks Security Service Edge Engineer Sample Questions (Q44-Q49):

### NEW QUESTION # 44

Which two actions can a company with Prisma Access deployed take to use the Egress IP API to automate policy rule updates when the IP addresses used by Prisma Access change? (Choose two.)

- A. Download a client certificate to authenticate to the Egress IP API.
- B. Enable the Egress IP API endpoint in Prisma Access.
- C. Configure a webhook to receive notifications of IP address changes.
- D. Copy the Egress IP API Key in the service infrastructure settings.

**Answer: A,C**

Explanation:

Configuring a webhook allows the company to receive real-time notifications when Prisma Access changes its egress IP addresses,

ensuring that policy rules are updated automatically. Downloading a client certificate is necessary for authentication to the Egress IP API, allowing secure API access for retrieving updated IP addresses. These actions ensure that security policies remain effective without manual intervention.

#### NEW QUESTION # 45

Which feature within Strata Cloud Manager (SCM) allows an operations team to view applications, threats, and user insights for branch locations for both NGFW and Prisma Access simultaneously?

- A. Log Viewer
- **B. Command Center**
- C. SASE Health Dashboard
- D. Branch Site Monitor

**Answer: B**

Explanation:

The Command Center within Strata Cloud Manager (SCM) provides a centralized view of applications, threats, and user insights across both NGFW (Next-Generation Firewall) and Prisma Access simultaneously. This feature enables the operations team to monitor branch locations, analyze security events, and detect anomalies in real time, offering a comprehensive visibility and threat intelligence interface for proactive network and security management.

#### NEW QUESTION # 46

When configuring Remote Browser Isolation (RBI) with Prisma Access (Managed by Strata Cloud Manager), which element is required to define the protected URLs for mobile users?

- A. A Security policy with the target URL categories and set the action to "Isolate"
- B. A DNS Security profile applied to a Security policy with the action of "Isolate" for the target remote browser DNS categories
- **C. A URL access management profile with site access set to "Isolate" applied to a Security policy**
- D. An RBI profile applied to the URL access management profile

**Answer: C**

Explanation:

When configuring Remote Browser Isolation (RBI) in Prisma Access (Managed by Strata Cloud Manager) for mobile users, a URL access management profile must be created with the site access action set to "Isolate". This profile is then applied to a Security policy to enforce isolation for specific URLs. This ensures that web traffic to designated high-risk or untrusted sites is redirected to a remote, secure browser instance, protecting endpoints from potential web-based threats.

#### NEW QUESTION # 47

A customer using Prisma Access (Managed by Panorama) wants to monitor traffic patterns across all remote networks and use Strata Logging Service to gather insights on network usage. An engineer notices that some network data is missing from the Application Command Center (ACC).

What should the engineer do to ensure complete data visibility?

- A. Reconfigure the Prisma Access remote networks to log directly to Panorama instead of using Strata Logging Service.
- **B. Ensure that log forwarding profiles are applied to all Prisma Access policies and directed to Strata Logging Service.**
- C. Enable the 'Use Data for Pre-Defined Reports' setting in the Logging and Reporting configuration on Panorama.
- D. Verify that the Panorama web interface has been configured to aggregate logs from both the Panorama data and RN-SPNs.

**Answer: B**

Explanation:

For complete data visibility in Prisma Access (Managed by Panorama), log forwarding profiles must be applied to all security policies to ensure that traffic logs are correctly sent to Strata Logging Service. If log forwarding is missing or misconfigured, some traffic data may not appear in the Application Command Center (ACC), leading to incomplete insights. Verifying and correctly assigning log

forwarding ensures that all relevant network activity is captured and available for analysis.

#### NEW QUESTION # 48

An engineer configures User-ID redistribution from an on-premises firewall connected to Prisma Access (Managed by Panorama) using a service connection. After committing the configuration, traffic from remote network connections is still not matching the correct user-based policies.

Which two configurations need to be validated? (Choose two.)

- **A. Ensure the Service\_Conn\_Template is selected when adding the User-ID Agent in Panorama.**
- B. Confirm there is a Security policy configured in Prisma Access to allow the communication on port 5007.
- C. Confirm the Collector Pre-Shared Keys match between Prisma Access and the on-premises firewall.
- **D. Ensure the Remote\_Network\_Template is selected when adding the User-ID Agent in Panorama.**

**Answer: A,D**

Explanation:

Ensuring that the Remote\_Network\_Template is selected when adding the User-ID Agent in Panorama is crucial because User-ID information must be associated with the correct Remote Network configuration for policies to apply properly. Additionally, the Service\_Conn\_Template must be selected when adding the User-ID Agent in Panorama, as the service connection is responsible for distributing User-ID mappings between the on-premises firewall and Prisma Access. If either of these configurations is incorrect, the user information will not be properly mapped, and traffic will not match user-based policies.

#### NEW QUESTION # 49

.....

We are a group of IT experts to provide professional study materials to people preparing Palo Alto Networks certification exam. There are free demo you can download to check the accuracy of our SSE-Engineer Braindumps. It just needs to take one or two days to practice Real4Prep SSE-Engineer dumps torrent and review the key points of our pass guide. Clearing exam is 100% guaranteed.
