The language which is easy to be understood and simple, NetSec-Pro exam questions are suitable for any learners no matter he or she is a student or the person who have worked for many years with profound experiences. So it is convenient for the learners to master the NetSec-Pro Guide Torrent and pass the exam in a short time. The amount of the examinee is large. For the office workers, they are both busy in their job and their family life; for the students, they possibly have to learn or do other things.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.

Topic 2	<ul style="list-style-type: none"> • NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 3	<ul style="list-style-type: none"> • Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

New NetSec-Pro Dumps Pdf, Exam NetSec-Pro Revision Plan

For some difficult points of the NetSec-Pro exam questions which you may feel hard to understand or easy to confuse for too similar with the others. In order to help you memorize the NetSec-Pro guide materials better, we have detailed explanations of the difficult questions such as illustration, charts and referring website. Every year some knowledge of the NetSec-Pro Practice Braindumps is reoccurring over and over. You must ensure that you master them completely.

Palo Alto Networks Network Security Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which feature of SaaS Security will allow a firewall administrator to identify unknown SaaS applications in an environment?

- A. SaaS Data Security
- B. App-ID Cloud Engine
- C. App-ID
- D. Cloud Identity Engine

Answer: B

Explanation:

App-ID Cloud Engine (ACE) in SaaS Security uses cloud-based signatures to detect unknown and unsanctioned SaaS applications in the environment.

App-ID Cloud Engine (ACE) uses real-time cloud intelligence to identify SaaS applications, including previously unknown or newly introduced applications.

This feature is key for comprehensive SaaS visibility beyond static signatures.

NEW QUESTION # 44

A primary firewall in a high availability (HA) pair is experiencing a current failover issue with ICMP pings to a secondary device. Which metric should be reviewed for proper ICMP pings between the firewall pair?

- A. Link monitoring
- B. Heartbeat polling
- C. Bidirectional Forwarding Detection (BFD)
- D. Non-functional state

Answer: B

Explanation:

Heartbeat polling is a core HA function to monitor connectivity between HA peers, leveraging ICMP pings to determine link health and availability.

Heartbeat Polling uses ICMP pings to verify the connectivity and health of the HA peers. If heartbeat polling fails, the firewall considers the peer to be down and may initiate failover.

If ICMP pings fail, checking heartbeat polling logs helps identify if link or path monitoring triggers the failover.

NEW QUESTION # 45

Which set of practices should be implemented with Cloud Access Security Broker (CASB) to ensure robust data encryption and protect sensitive information in SaaS applications?

- A. Do not enable encryption for data-at-rest to improve performance.
- B. Perform annual encryption key rotations.
- C. Use default encryption keys provided by the SaaS provider.
- D. Enable encryption for data-at-rest and in transit, regularly update encryption keys, and use strong encryption algorithms.

Answer: D

Explanation:

CASB integration should focus on comprehensive data protection, which includes encryption for data-at-rest and in transit, frequent key updates, and using strong encryption algorithms to ensure confidentiality and data integrity.

CASB solutions should enforce encryption for data-at-rest and in transit, implement key rotation policies, and leverage robust encryption algorithms to protect sensitive SaaS application data.

NEW QUESTION # 46

Which feature of SaaS Security will allow a firewall administrator to identify unknown SaaS applications in an environment?

- A. SaaS Data Security
- B. App-ID Cloud Engine
- C. App-ID
- D. Cloud Identity Engine

Answer: B

Explanation:

App-ID Cloud Engine (ACE) in SaaS Security uses cloud-based signatures to detect unknown and unsanctioned SaaS applications in the environment.

"App-ID Cloud Engine (ACE) uses real-time cloud intelligence to identify SaaS applications, including previously unknown or newly introduced applications." (Source: ACE for SaaS Visibility) This feature is key for comprehensive SaaS visibility beyond static signatures.

NEW QUESTION # 47

Which two features can a network administrator use to troubleshoot the issue of a Prisma Access mobile user who is unable to access SaaS applications? (Choose two.)

- A. SaaS Application Risk Portal
- B. Autonomous Digital Experience Manager (ADEM) console
- C. GlobalProtect logs
- D. Capacity Analyzer

Answer: B,C

Explanation:

GlobalProtect logs

These logs provide detailed insights into the user's connectivity, tunnel status, and authentication events.

"GlobalProtect logs include detailed information about connection establishment, tunnel negotiation, and any errors that can prevent mobile users from accessing applications." (Source: GlobalProtect Troubleshooting) Autonomous Digital Experience Management (ADEM) ADEM helps visualize end-to-end performance and identifies network issues affecting SaaS app access for mobile users.

"ADEM provides real-time and historical visibility into user experience, enabling quick identification and resolution of connectivity or performance issues for SaaS applications." (Source: ADEM for Prisma Access)

NEW QUESTION # 48

.....

The product PrepAwayPDF provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the pass your NetSec-Pro exam by the method which is convenient for you. We check the update every day, and we can guarantee that you will get a free update service from the date of purchase. Once you have any questions and doubts about our NetSec-Pro Exam Questions we will provide you with our customer service before or after the sale.
