## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q27-Q32):

### NEW QUESTION # 27

What does the Kerberos key tab file contain?

- A. Pairs of Kerberos principals and encryption keys
- B. Pairs of encryption and decryption keys
- C. Pairs of ktpass tools
- D. Pairs of authentication settings and un-authentication settings

**Answer: A**

### NEW QUESTION # 28

Which command in CLI session is used to check status of Check Point processes on Harmony Endpoint Management server?

- A. ps -aux | grep EPM
- B. show mgmt server state
- C. cpwd state
- D. cpwd\_admin list

**Answer: D**

Explanation:

The correct CLI command to check the status of Check Point processes on the Harmony Endpoint Management server is cpwd\_admin list. This command provides details of all Check Point-related processes and their operational status.

Exact Extract from Official Document:

"Use the CLI command 'cpwd\_admin list' to check the status of Check Point processes on the management server."

Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide, "Troubleshooting."

### NEW QUESTION # 29

What type of attack is Ransomware?

- A. Where an attacker encrypts files on a computer and demands payment for decryption key.
- B. Ransomware is not an attack.
- C. Where a victim encrypts files on a computer and demands payment for decryption key from an attacker.
- D. Where an attacker decrypts files on a computer and demands payment for encryption key.

**Answer: A**

Explanation:

Ransomware is a form of malicious software (malware) where an attacker encrypts the victim's data, rendering it inaccessible. The attacker then demands a ransom payment from the victim to provide the decryption key that will restore access to the data.

Exact Extract from Official Document:

"Before a Ransomware attack can encrypt files, Anti-Ransomware backs up your files to a safe location. After the attack is stopped, it deletes files involved in the attack and restores the original files from the backup location." This indicates that ransomware encrypts files, confirming that the attacker encrypts the files and demands a payment for a decryption key.

Reference:Check Point Harmony Endpoint Specialist R81.20 Administration Guide, Section: "Anti- Ransomware".

### NEW QUESTION # 30

The Remote Help tool can be used to assist users in password recovery. What type of assistance does this tool provide

- A. The Remote Help tool provides
  - a) Link to the secret location of encrypted password file
  - b) Key to decrypt the password file
- B. The Remote Help only provides procedural information and FAQs about the Endpoint Security Client including procedure to reset password
- C. The Remote Help tool provides
  - a) User Logon Pre-boot Remote Help
  - b) Media Encryption Remote Help
- D. The Remote Help tool unlocks admin accounts on SmartEndpoint
