To pass the Appian ACD201 Exam is a dream who are engaged in IT industry. If you want to change the dream into reality, you only need to choose the professional training. DumpsTests is a professional website that providing IT certification training materials. Select DumpsTests, it will ensure your success. No matter how high your pursuit of the goal, DumpsTests will make your dreams become a reality.

Appian Senior Developer Sample Questions (Q45-Q50):

NEW QUESTION # 45

You're inspecting the items in a deployment package for issues you might have missed during package preparation. Which two objects can be in your list of missing precedents for an application? (Choose two.)

- A. Group Type Custom
- B. Connected System
- C. Document
- D. System Knowledge Center

Answer: A,B

Explanation:

Connected System and Group Type Custom can both be missing precedents in an Appian deployment package, meaning dependent objects required by the application may not have been included.

NEW QUESTION # 46

You're designing a file upload process that integrates with an external document management system.

Part of this process is to develop a start form with a file upload component, so that the user can upload multiple files.

The business has requested that the maximum file size that can be uploaded through this process is 1GB.

Additionally, you're aware that the integration's API can accept files with a maximum file size of 3GB, but recommends no larger than 1GB.

Can the process be more performant without straining the application or integration?

- A. Yes. Request the business allows for these files to be uploaded as an overnight process by storing large files in a staging table, so that adequate resources are available.
- B. No. The file upload component is capable of accepting 1 GB files and the integration can handle this.
- C. Yes. Request the business reconsiders its requirements and find manual workarounds as it is not recommended to upload files of this size in both Appian and the integration.

Answer: A

Explanation:

While Appian and the integration technically support 1 GB file uploads, handling such large files during interactive sessions can negatively impact application performance, user experience, and resource utilization.

A better approach is to request that the business allow these files to be uploaded asynchronously (e.g., overnight batch process), by temporarily storing them (e.g., in a staging table or folder) and processing them when system load is lower. This makes the process more performant and reliable without straining Appian or the external system.

NEW QUESTION # 47

One of your expressions uses too much memory and has poor performance.

Which two steps should you perform to improve its memory efficiency and performance?

- A. Avoid dynamically generating components.
- B. Don't use deeply nested looping functions
- C. Limit the number of rule inputs to the expression to 'less than 10'.
- D. Avoid writing test cases to expressions

Answer: A,B

NEW QUESTION # 48

You're creating an application which has integrations with multiple systems using different protocols.

Match each process model component or node to the appropriate protocol.

Note: Each protocol will be used once. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Call Web Service smart service

Select a match:

REST	<input type="checkbox"/>
SOAP	<input type="checkbox"/>
SMTP	<input type="checkbox"/>

Start event and a receive message trigger

Select a match:

REST	<input type="checkbox"/>
SOAP	<input type="checkbox"/>
SMTP	<input type="checkbox"/>

Call Integration smart service

Select a match:

REST	<input type="checkbox"/>
SOAP	<input type="checkbox"/>
SMTP	<input type="checkbox"/>

Answer:

Explanation:

Call Web Service smart service

NEW QUESTION # 49

You're refining a story for a centralized distribution center that extends the current application by allowing inventory managers to review orders.

These orders are created through a record action that various workshops access from a shared Appian site.

Which consideration best suits this use case?

- A. What are the personas that will be utilizing this application so that an Appian group structure can be developed and maintained?
- B. How will you handle errors resulting from a failed integration as a result of the workshops using an external system to place orders?
- C. What components have already been built relating to this piece of functionality so that you can reuse them and speed up development?

Answer: C

Explanation:

Identifying the personas (such as inventory managers and workshop users) ensures you can design and maintain an appropriate Appian group structure for managing access and permissions, which is critical for a centralized application accessed by multiple roles.

NEW QUESTION # 50

.....

In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of ACD201. Our study tool can meet your needs. Once you use our ACD201 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our ACD201 learning material, you will have a good result. After years of development practice, our ACD201 test torrent is absolutely the best. You will embrace a better future if you choose our ACD201 exam materials.
