

NSE7_SSE_AD-25無料過去問 & NSE7_SSE_AD-25更新版

2026年GoShikenの最新NSE7_SSE_AD-25 PDFダンプおよびNSE7_SSE_AD-25試験エンジンの無料共有: https://drive.google.com/open?id=15Xxb2V_wSb3NasrNV33gkVrvf4hQtr4a

NSE7_SSE_AD-25認定試験についてのことですが、GoShikenは素晴らしい資質を持っていて、最も信頼できるソースになることができます。何千何万の登録された部門のフィードバックによって、それに大量な突っ込んだ分析を通じて、我々はどのサプライヤーがお客様にもっと新しいかつ高品質のNSE7_SSE_AD-25資料を提供できるかを確かめる存在です。GoShikenのFortinetのNSE7_SSE_AD-25トレーニング資料は絶え間なくアップデートされ、修正されていますから、FortinetのNSE7_SSE_AD-25試験のトレーニング経験を持っています。現在、認証試験に合格したいのならGoShikenのFortinetのNSE7_SSE_AD-25トレーニング資料を利用してください。さあ、最新のGoShikenのFortinetのNSE7_SSE_AD-25問題集にショッピングカートに入れましょう。あなたに予想外の良い効果を見せられますから。

Fortinet NSE7_SSE_AD-25 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Monitoring, Logging, and Troubleshooting	15-20%	- Common troubleshooting scenarios - Diagnostic commands and tools - Log analysis and reporting - Performance monitoring
Topic 2: FortiSASE Configuration and Administration	25-30%	- Security profiles and policies - Initial setup and configuration - Tunnel mode and web proxy configurations - Bandwidth and traffic management - SSL inspection configuration
Topic 3: Security Services	20-25%	- Threat protection features - Sandbox integration - Web filtering and DNS filtering
Topic 4: Identity and Access Management	15-20%	- Certificate-based authentication - User authentication methods - SSO integration with identity providers - Policy-based access control
Topic 5: FortiSASE Architecture and Components	15-20%	- FortiSASE overview and deployment models - Components: FortiGate SASE, FortiProxy, FortiClient - Zero Trust Network Access (ZTNA) fundamentals - SASE topology and network design

GoShiken FortinetのNSE7_SSE_AD-25問題集

現在の社会で、NSE7_SSE_AD-25試験に参加する人がますます多くなる傾向があります。市場の巨大な練習材料からNSE7_SSE_AD-25の学習教材を手に入れようとする人も増えています。私たちのNSE7_SSE_AD-25試験問題を利用し、ほかの資料が克服できない障害を克服できます。多くの受験者は、私たちのNSE7_SSE_AD-25練習試験をすることに特権を感じています。そして、私たちのウェブサイトは、市場でのとても有名で、インターネット上で簡単に見つけられます。

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator 認定 NSE7_SSE_AD-25 試験問題 (Q29-Q34):

質問 # 29

Refer to the exhibits. Antivirus is installed on a Windows 10 endpoint, but the windows application firewall is stopping it from running.

What will the endpoint security posture check be?

The screenshot shows the 'FortiSASE Non-Compliant' configuration page in the Fortinet management console. The page is titled 'EDIT RULE SET'. The 'Name' field is set to 'FortiSASE-Non-Compliant' and the 'Enabled' toggle is turned on. Below this, a section titled 'When the following rules match' contains a table with one rule. The rule is named 'AntiVirus' and has a status of 'NOT'. The rule's parameters are 'AV Software is installed and running' and the matching criteria is 'All parameters must pass'. At the bottom, the 'Apply the following tag' section shows a dropdown menu with 'FortiSASE-Non-Compliant' selected. The Fortinet logo and 'Activate Windows' watermark are visible at the bottom of the interface.

Type	Parameters	Matching Criteria
Windows	AntiVirus	AV Software is installed and running

Apply the following tag

Tag Name: FortiSASE-Non-Compliant

EDIT RULE SET

Name

Enabled ☒

When the following rules match

☐	Type	Parameters	Matching Criteria
☒	Windows ²		
☐	OS Version	☒ Windows Server 2019 ☒ Windows 10	At least one parameter must pass
☐	AntiVirus	AV Software is installed and running	All parameters must pass

Apply the following tag

Tag Name

- A. FortiClient will tag the endpoint as FortiSASE-Non-Compliant.
- B. FortiClient will be unmanaged from FortiSASE due to failed compliance.
- C. FortiClient will trigger network lockdown on the endpoint.
- D. FortiClient will prompt the user to enable antivirus.

正解: A

解説:

Although the antivirus is installed, it is not running due to the Windows application firewall blocking it. According to the FortiSASE-Non-Compliant rule, antivirus software must be both installed and running. Since this condition fails, FortiClient assigns the FortiSASE-Non-Compliant tag to the endpoint.

質問 # 30

Which secure internet access (SIA) use case minimizes individual workstation or device setup, because you do not need to install FortiClient on endpoints or configure explicit web proxy settings on web browser-based endpoints?

- A. SIA for agentless remote users
- B. SIA for site-based remote users
- C. SIA for SSLVPN remote users
- D. SIA for inline-CASB users

正解: A

解説:

The Secure Internet Access (SIA) use case that minimizes individual workstation or device setup is SIA for agentless remote users.

This use case does not require installing FortiClient on endpoints or configuring explicit web proxy settings on web browser-based endpoints, making it the simplest and most efficient deployment.

* SIA for Agentless Remote Users:

* Agentless deployment allows remote users to connect to the SIA service without needing to install any client software or configure browser settings.

* This approach reduces the setup and maintenance overhead for both users and administrators.

* Minimized Setup:

* Without the need for FortiClient installation or explicit proxy configuration, the deployment is straightforward and quick.

* Users can securely access the internet with minimal disruption and administrative effort.

References:

FortiOS 7.6 Administration Guide: Details on different SIA deployment use cases and configurations.

FortiSASE 23.2 Documentation: Explains how SIA for agentless remote users is implemented and the benefits it provides.

質問 # 31

Which two of the following can release the network lockdown on the endpoint applied by FortiSASE? (Choose two.)

- A. When the endpoint connects to the FortiSASE tunnel
- B. When the endpoint is determined as on-net
- C. When the endpoint is determined as compliant using ZTNA tags
- D. When the endpoint is rebooted

正解: A、C

解説:

FortiSASE releases network lockdown when the endpoint re-establishes the tunnel connection or when it is verified as compliant through ZTNA tag evaluation, ensuring it meets security posture requirements.

質問 # 32

Drag and Drop Question

When configuring the DLP rule in FortiSASE using Regex format, what would be the correct order for the configuration steps?

Select the step in the left column, hold and drag it to a blank position in the column on the right.

Place the four correct steps in order, placing the first step in the first position at the top of the column. Once you place a step, you can move it again if you want to change your answer before moving to the next question. You need to drop four steps in the work area.

Select and drag the screen divider to change the viewable area of the source and work areas.

Answer Area

Configuration Steps

DLP Rule	
DLP Dictionary	
DLP Data Pattern	
DLP Sensor	
DLP Profile	

正解:

解説:

Answer Area

Explanation:

First, you define sensitive information types in a DLP Dictionary, then create the DLP Data Pattern using regex or predefined patterns. Next, you create the DLP Rule that uses the pattern to detect data. The DLP Sensor is then configured to apply the rule to traffic.

質問 #33

A FortiSASE administrator is configuring a Secure Private Access (SPA) solution to share endpoint information with a corporate FortiGate.

Which three configuration actions will achieve this solution? (Choose three.)

- A. Apply the FortiSASE zero trust network access (ZTNA) license on the corporate FortiGate.
- B. Add the FortiGate IP address in the secure private access configuration on FortiSASE.
- C. Register FortiGate and FortiSASE under the same FortiCloud account.
- D. Authorize the corporate FortiGate on FortiSASE as a ZTNA access proxy.
- E. Use the FortiClient EMS cloud connector on the corporate FortiGate to connect to FortiSASE

正解: B、C、E

解説:

To configure a Secure Private Access (SPA) solution to share endpoint information between FortiSASE and a corporate FortiGate, you need to take the following steps:

- * Add the FortiGate IP address in the secure private access configuration on FortiSASE:
- * This step allows FortiSASE to recognize and establish a connection with the corporate FortiGate.
- * Use the FortiClient EMS cloud connector on the corporate FortiGate to connect to FortiSASE:
- * The EMS (Endpoint Management Server) cloud connector facilitates the integration between FortiClient endpoints and FortiSASE, enabling seamless sharing of endpoint information.
- * Register FortiGate and FortiSASE under the same FortiCloud account:
- * By registering both FortiGate and FortiSASE under the same FortiCloud account, you ensure centralized management and synchronization of configurations and policies.

References:

FortiOS 7.6 Administration Guide: Provides details on configuring Secure Private Access and integrating with FortiGate.

FortiSASE 23.2 Documentation: Explains how to set up and manage connections between FortiSASE and corporate FortiGate.
