Salesforce CRT-450 Reliable Exam Simulations | Latest CRT-450 Test Simulator

The VCEPrep is committed to making the Salesforce CRT-450 exam preparation journey simple, smart, and swift. To meet this objective the VCEPrep is offering CRT-450 practice test questions with top-rated features. These features are updated and real CRT-450 exam questions, availability of Salesforce CRT-450 Exam real questions in three easy-to-use and compatible formats, three months free updated CRT-450 exam questions download facility, affordable price and 100 percent Salesforce Certified Platform Developer I CRT-450 exam passing money back guarantee.

Salesforce Certified Platform Developer I Sample Questions (Q163-Q168):

NEW QUESTION # 163
A developer creates a new Visualforce page and Apex extension, and writes test classes that exercise 95% coverage of the new Apex extension. Change set deployment to production fails with the test coverage warning: "Average test coverage across all Apex classes and triggers is 74%, at least 75% test coverage is required." What can the developer do to successfully deploy the new Visualforce page and extension?

- A. Create test classes to exercise the Visualforce page markup.
- B. Select "Disable Parallel Apex Testing" to run all the tests.
- C. Select "Fast Deployment" to bypass running all the tests.
- D. Add test methods to existing test classes from previous deployments.

Answer: D

NEW QUESTION # 164

A developer is tasked to perform a security review of the ContactSearch Apex class that exists in the system.

Whithin the class, the developer identifies the following method as a security threat: List<Contact> performSearch(String lastName){ return Database.query('Select Id, FirstName, LastName FROM Contact WHERE LastName Like %'+lastName+'%'); } What are two ways the developer can update the method to prevent a SOQL injection attack? Choose 2 answers

- A. Use the @Readonly annotation and the with sharing keyword on the class.
- B. Use the escapeSingleQuote method to sanitize the parameter before its use.
- C. Use variable binding and replace the dynamic query with a static SOQL.
- D. Use a regular expression on the parameter to remove special characters.

Answer: B,C

Explanation:

The developer can update the method to prevent a SOQL injection attack by using variable binding and replacing the dynamic query with a static SOQL, or by using the escapeSingleQuote method to sanitize the parameter before its use. These are two ways to avoid concatenating user input directly into the query string, which can allow malicious input to alter the query logic and expose sensitive data. For example, the developer can rewrite the method as follows:

// Using variable binding and static SOQL List<Contact> performSearch(String lastName){ String queryName = '%' + lastName + '%'; return [SELECT Id, FirstName, LastName FROM Contact WHERE LastName LIKE :queryName]; }

// Using escapeSingleQuote method List<Contact> performSearch(String lastName){ String sanitizedLastName = String.escapeSingleQuotes(lastName); return Database.query('SELECT Id, FirstName, LastName FROM Contact WHERE LastName LIKE '%' + sanitizedLastName + '%'); } Using a regular expression on the parameter to remove special characters is not a reliable way to prevent a SOQL injection attack, because it may not cover all possible scenarios and may also remove valid input. Using the @Readonly annotation and the with sharing keyword on the class is not relevant to the SOQL injection issue, because they affect the data access and performance of the class, not the security of the query.

NEW QUESTION # 165

Universal Containers recently transitioned from Classic to Lighting Experience. One of its business processes requires certain value from the opportunity object to be sent via HTTP REST callout to its external order management system based on a user-initiated action on the opportunity page. Example values are as follow

* Name
* Amount
* Account

Which two methods should the developer implement to fulfill the business requirement? (Choose 2 answers)

- A. Create an after update trigger on the Opportunity object that calls a helper method using @Future(Callout=true) to perform the HTTP REST callout.
- B. Create a Lightning component that performs the HTTP REST callout, and use a Lightning Action to expose the component on the Opportunity detail page.
- C. Create a Process Builder on the Opportunity object that executes an Apex immediate action to perform the HTTP REST callout whenever the Opportunity is updated.
- D. Create a Visualforce page that performs the HTTP REST callout, and use a Visualforce quick action to expose the component on the Opportunity detail page.

Answer: B,D

Explanation:

The developer should implement either a Lightning component or a Visualforce page that performs the HTTP REST callout, and use a Lightning Action or a Visualforce quick action to expose the component on the Opportunity detail page. These methods allow the developer to create a user interface that can capture the user input and trigger the callout based on a user-initiated action. The Lightning component or the Visualforce page can use the Apex controller to invoke the HTTP callout using the built-in HTTP classes, such as HttpRequest, HttpResponse, and Http. The Lightning Action or the Visualforce quick action can be added to the page layout of the Opportunity object and configured to display the component in a modal dialog or a panel.

Creating a Process Builder or an after update trigger to perform the HTTP REST callout is not a suitable method for this business requirement, because these methods do not provide a user interface or a user-initiated action. The Process Builder or the trigger would execute the callout whenever the Opportunity is updated, regardless of the user input or intention. This could result in

unnecessary or unwanted callouts, as well as hitting the governor limits for callouts.

NEW QUESTION # 166

A developer is implementing an Apex class for a financial system. Within the class, the variables 'creditAmount' and 'debitAmount' should not be able to change once a value is assigned.
In which two ways can the developer declare the variables to ensure their value can only be assigned one time?
Choose 2 answers

- A. Use the final keyword and assign its value when declaring the variable.
- B. Use the final keyword and assign its value in the class constructor.
- C. Use the static keyword and assign its value in the class constructor.
- D. Use the static keyword and assign its value in a static initializer.

Answer: A,B

NEW QUESTION # 167

A developer must implement a CheckPaymentProcessorclass that provides check processing payment capabilities that adhere to what is defined for payments in the PaymentProcessorinterface.
public interface PaymentProcessor {
void pay(Decimal amount);
}
Which is the correct implementation to use the PaymentProcessorinterface class?
public class CheckPaymentProcessor implements PaymentProcessor {

- A. publicvoid pay(Decimal amount){}
  public class CheckPaymentProcessor extends PaymentProcessor {
- B. publicvoid pay(Decimal amount);
  public class CheckPaymentProcessor implements PaymentProcessor {
- C. publicvoid pay(Decimal amount);
- D. publicvoid pay(Decimal amount){}
  public class CheckPaymentProcessor extends PaymentProcessor {

Answer: A

NEW QUESTION # 168

......

Compared with other training materials, why VCEPrep's Salesforce CRT-450 exam training materials is more welcomed by the majority of candidates? First, this is the problem of resonance. We truly understand the needs of the candidates, and comprehensively than any other site. Second, focus. In order to do the things we decided to complete, we have to give up all the unimportant opportunities. Third, the quality of the product. People always determine a good or bad thing based on the surface. We may have the best products of the highest quality, but if we shows it with a shoddy manner, it naturally will be as shoddy product. However, if we show it with both creative and professional manner, then we will get the best result. The VCEPrep's Salesforce CRT-450 Exam Training materials is so successful training materials. It is most suitable for you, quickly select it please.
