

# 100% Pass Quiz Updated SAP - C-BCBTP-2502 - Valid SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Exam Question

P.S. Free & New C-BCBTP-2502 dumps are available on Google Drive shared by Exam4PDF: <https://drive.google.com/open?id=1HYOm2hdnWglvm6xAfSGhrHQdDIqr6aCa>

Our experts are working hard on our C-BCBTP-2502 exam questions to perfect every detail in our research center. Once they find it possible to optimize the C-BCBTP-2502 study guide, they will test it for many times to ensure the stability and compatibility. Under a series of strict test, the updated version of our C-BCBTP-2502 learning quiz will be soon delivered to every customer's email box since we offer one year free updates so you can get the new updates for free after your purchase.

## SAP C-BCBTP-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.</li></ul>

## SAP C-BCBTP-2502 Key Concepts | C-BCBTP-2502 Exam Vce

The scoring system of our C-BCBTP-2502 exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the C-BCBTP-2502 test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the C-BCBTP-2502 Exam guides quickly and correctly. At the same time, there is specific space below every question for you to make notes. So you can quickly record the important points or confusion of the C-BCBTP-2502 exam guides.

### SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

Which SAP BTP tool helps organizations manage sustainability risks and compliance?

- A. SAP BusinessObjects
- B. SAP Workflow Management
- C. SAP Sustainability Control Tower
- D. SAP Integration Suite

**Answer: C**

Explanation:

As global regulations regarding Environmental, Social, and Governance (ESG) standards become more stringent, organizations must move beyond manual reporting to automated sustainability management. SAP Sustainability Control Tower, which runs on SAP BTP, is designed specifically for this purpose. It helps organizations manage sustainability risks and compliance by providing a centralized "control center" that collects and processes ESG data from across the enterprise and its supply chain. The tool leverages the data management and analytics capabilities of BTP (specifically SAP Datasphere and SAP Analytics Cloud) to provide a transparent view of a company's sustainability performance against its targets. It allows for the integration of non-financial data-such as carbon emissions, water usage, and labor statistics-with traditional financial data from the SAP Business Suite. This positioning is vital because it enables "holistic steering," where sustainability is treated with the same rigor as financial profitability. By using SAP Sustainability Control Tower on BTP, businesses can ensure they are meeting legal compliance requirements while also building trust with investors and customers through verified, data-driven sustainability disclosures.

#### NEW QUESTION # 28

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By providing enterprise architecture visualization and analysis.
- B. By preventing real-time integration with business processes.
- C. By enforcing manual IT infrastructure tracking.
- D. By restricting governance of IT landscapes.

**Answer: A**

Explanation:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals. The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

### NEW QUESTION # 29

Which SAP BTP component helps businesses extract insights from structured and unstructured data?

- A. SAP Data Intelligence
- B. SAP Business Network
- C. SAP Integration Suite
- D. SAP SuccessFactors

**Answer: A**

Explanation:

In today's data landscape, business value is hidden not just in "structured" databases (like tables and spreadsheets) but also in "unstructured" data (like images, sensor logs, and social media feeds). SAP Data Intelligence is the specific component of SAP BTP designed to manage this diversity. It is a comprehensive data management solution that provides data orchestration, data cataloging, and powerful machine learning integration. It allows data scientists and engineers to create "data pipelines" that ingest, transform, and analyze data regardless of its source or format.

The role of SAP Data Intelligence within the SAP Business Suite is to turn "dark data" into actionable insights. For example, it can take unstructured maintenance logs from factory machinery and combine them with structured financial data to predict the total cost of ownership of an asset. By providing a unified view of the entire data landscape-whether that data resides in an SAP HANA database, a non-SAP data warehouse, or a cloud "data lake"-it ensures that decision-makers have a complete picture. This capability is vital for advanced AI and machine learning projects, as it provides the robust data foundation required to train accurate models, thereby positioning SAP BTP as a leader in enterprise data orchestration.

### NEW QUESTION # 30

Which SAP BTP service allows businesses to create low-code/no-code applications?

- A. SAP BusinessObjects
- B. SAP Build Apps
- C. SAP Concur
- D. SAP Business Network

**Answer: B**

Explanation:

To accelerate digital transformation, SAP has introduced the SAP Build portfolio on BTP, which is specifically designed to democratize application development. SAP Build Apps (formerly AppGyver) is the primary service within this portfolio that enables the creation of enterprise-grade applications using a no-code visual environment. This service allows users to build sophisticated user interfaces for mobile and web applications by simply dragging and dropping components. It also includes a visual logic editor, which eliminates the need to write traditional code for defining how the application behaves.

The strategic importance of SAP Build Apps within the SAP Business Technology Platform is its ability to reduce the backlog of IT departments. By allowing business experts-who understand the process but may not know how to code-to build their own solutions, SAP ensures that innovation can happen at the "front lines" of the business. These apps can easily be connected to SAP S/4HANA or other backend systems through secure APIs, ensuring that data integrity is maintained. This contrasts with tools like SAP BusinessObjects, which is focused on business intelligence and reporting, or SAP Concur, which is a specific SaaS application for travel and expense management. SAP Build Apps is a foundational service for positioning BTP as an agile platform for rapid extension and innovation.

### NEW QUESTION # 31

What is a competitive advantage of SAP BTP for businesses?

- A. Prevents integration with multi-cloud environments.
- B. Provides a unified platform for AI, analytics, and automation.
- C. Limits businesses to SAP ERP-only solutions.
- D. Eliminates the need for AI-driven automation.

**Answer: B**

Explanation:

The primary competitive advantage of SAP BTP lies in its unified nature, bringing together AI, analytics, integration, and automation
