## Certified Sharing and Visibility Architect - Mock Exam 1

### Access to other Data

#### Question 1/6

Auto Car has established a specialized team to support the sales team during the electric vehicles (EVs) sales process. This team comprises individuals from various profiles who need access to opportunity records specific to EVs, identifiable by a flag on the opportunity record. How can access to these EV opportunities be provided to the specialized team? Select three options.

- A) Create a public group for the specialized team members.
- B) Manually share the EV opportunities with specific users.
- C) Create a custom list view with a filter to display only EV opportunities.
- D) Use Apex sharing to implement a custom program that shares the opportunities with specific users.
- E) Share the custom list view with the public group created.

#### Correct Answers:

Create a public group for the specialized team members: Creating a public group for the specialized team members enables the administrator to collectively manage access for team members spread across different profiles, simplifying the sharing process.

Create a custom list view with a filter to display only EV opportunities: Creating a custom list view with a filter to display only EV opportunities provides a tailored view that focuses on the relevant opportunities for the specialized team, making it easier for them to access the necessary records directly from their Salesforce interface.

Share the custom list view with the public group created: Sharing the custom list view with the public group created ensures that all members of the specialized team have access to the custom list view, streamlining their workflow and ensuring they have the information needed to support the EV sales process.

#### Explanation for Incorrect Options:

Manually share the EV opportunities with specific users: While manually sharing EV opportunities with specific users is possible, it is not the most efficient or scalable solution for sharing records with a team. This process can become cumbersome and time-consuming as the number of opportunities and team members grows.

Use Apex sharing to implement a custom program that shares the opportunities with specific users: Using Apex sharing to create a custom program for sharing opportunities with specific users might be an overcomplication for a requirement that can be met with standard Salesforce functionality. Apex sharing is typically reserved for complex sharing scenarios that cannot be addressed through the platform's declarative sharing options.

#### Question 2/6

Which library permissions can be assigned to members of a library? Select three options.

- A) Library Administrator
- B) Authors

## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q22-Q27):

### NEW QUESTION # 22

UniversalContainers(UC)service reps are assigned to a profile which has "ViewAll" in Case object (Private OWD). To make sure service reps have access to all relevant information to attend to customer requests, which two details should a Salesforce Architect consider? Choose 2 answers:

- A. Service reps will be able to access all the UC Account records due to Implicit Sharing.
- **B. Service reps will not be able to access all the UC Account records because Account OWD is private.**
- C. Service reps will be able to access all UC contact records if they are controlled by parent.
- **D. Service reps will not be able to access all UC contact records if they are controlled by parent.**

**Answer: B,D**

### NEW QUESTION # 23

A sales rep at Universal Containers was added to an opportunity team with Read/Write permissions. Which action is she allowed to perform in the opportunity?

- A. Update opportunity stage.
- **B. Add/remove members in the opportunity team.**
- C. Replace opportunity owner.

**Answer: B**

### NEW QUESTION # 24

Who can view a PDF that is uploaded to the Files Home private library by a user?

- **A. Only the user**
- B. The user and users with View All Data permission
- C. The user and users above them in the Role Hierarchy

**Answer: A**

### NEW QUESTION # 25

In order to allow community users to collaborate on Opportunities, which license type must the users.

- A. Customer Community
- B. Customer Community plus
- C. Sales Community
- **D. Partner Community**

**Answer: D**

Explanation:

Explanation

The license type that must be used by community users who want to collaborate on opportunities is Partner Community. As mentioned above, Partner Community licenses allow users to access standard CRM objects such as opportunities and collaborate with other partners and internal users using Chatter and Communities.

Sales Community licenses do not exist as a separate license type. Customer Community and Customer Community Plus licenses do not allow users to access opportunities, as they are intended for customer service scenarios rather than sales scenarios.

## NEW QUESTION # 26

Universal Containers has selected a small and diverse group of users to review inactive accounts. Given the Private sharing model, a public group was created and made available to this group of users. A sharing rule was created to make inactive accounts visible to the public group. However, some of these users are reporting they do not see any of the accounts that were shared with the public group.

What is the underlying issue for these users?

- A. The page layout assigned to these users is different than the Account owner.
- **B. The users are in profiles that have no access to the Account object.**
- C. The accounts are owned by users higher in the Role Hierarchy.

**Answer: B**

Explanation:

In Salesforce, users must have object-level access (Read permission) to see records shared through sharing rules or any other mechanism. If some users in the public group lack the Read permission for the Account object, they will not be able to see the accounts, even though they are part of the public group with a sharing rule granting access.

\* Option A (Correct): Lack of object-level permissions for the Account object explains why some users cannot view the shared accounts.

\* Option B: Page layouts only affect how records are displayed, not record visibility.

\* Option C: Role Hierarchy does not impact this issue, as it is related to public group sharing.
