

HPE7-A06 Exam Pass Exam & Newest HPE7-A06 Exam Guide Pass Success

2026 Latest Actual4Cert HPE7-A06 PDF Dumps and HPE7-A06 Exam Engine Free Share: <https://drive.google.com/open?id=1PuRZykUUYSBtXbfy8aN-995X-MeMiTuX>

For the challenging HPE Campus Access Switching Expert Written Exam (HPE7-A06) exam, they make an effort to locate reputable and recent Treasury with HPE Campus Access Switching Expert Written Exam (HPE7-A06) practice questions. The high anxiety and demanding workload the candidate must face being qualified for the Treasury with HPE Campus Access Switching Expert Written Exam (HPE7-A06) certification are more difficult than only passing the HPE Campus Access Switching Expert Written Exam (HPE7-A06) exam.

Many people may worry that the HPE7-A06 guide torrent is not enough for them to practice and the update is slowly. We guarantee you that our experts check whether the HPE7-A06 study materials is updated or not every day and if there is the update the system will send the update to the client automatically. So you have no the necessity to worry that you don't have latest HPE7-A06 Exam Torrent to practice. We provide the best service to you and hope you are satisfied with our product and our service.

>> Pass HPE7-A06 Exam <<

Marvelous HP Pass HPE7-A06 Exam - HPE7-A06 Free Download

Our HPE7-A06 test braindumps can help you improve your abilities. Once you choose our learning materials, your dream that you have always been eager to get HPE7-A06 certification which can prove your abilities will realized. You will have more competitive advantages than others to find a job that is decent. We are convinced that our HPE7-A06 Exam Questions can help you gain the desired social status and thus embrace success. When you start learning, you will find a lot of small buttons, which are designed carefully. You can choose different ways of operation according to your learning habits to help you learn effectively.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q92-Q97):

NEW QUESTION # 92

Exhibit.

After an initial setup of CX 8325 VSX configuration, the active gateway is set up for SVI 10. For testing purposes. SVI 10 on sw-agg1 is shut down while traffic from the client connected to Edge-1 is initiated towards the default route.

What is the expected behavior white performing this test?

- A. Traffic is potentially dropped between the client and the destination.
- B. Traffic is forwarded over the ISL without the risk of dropped packets.
- C. Traffic Is unaffected and a 50ms failover time is expected for agg-sw2 to start traffic forwarding.
- D. Traffic is dropped and vsx-sync will disable SVI10 on agg-sw2 automatically.

Answer: C

Explanation:

The question involves a VSX configuration with CX 8325 switches (agg-sw1 and agg-sw2) where SVI 10's active-gateway is set up. For testing, SVI 10 on agg-sw1 is shutdown, and traffic from a client connected to Edge-1 is initiated toward the default route. The task is to determine the expected behavior.

* Analysis of Options:

* Option A: Incorrect. Traffic is not dropped, as VSX ensures redundancy via the active-gateway on agg-sw2.

* Option B: Incorrect. Traffic does not traverse the ISL unnecessarily; agg-sw2 takes over directly.

* Option C: Correct. Traffic continues unaffected, with a 50ms failover time for agg-sw2 to assume forwarding responsibilities for SVI 10.

* Option D: Incorrect. Traffic is not dropped, and vsx-sync does not disable SVI 10 on agg-sw2; it ensures consistency.

* Why Option C is Correct: In a VSX cluster with active-gateway, both switches (agg-sw1 and agg-sw2) share a virtual IP and vMAC for SVI 10, allowing either to respond to ARP requests and forward traffic. Shutting down SVI 10 on agg-sw1 triggers agg-sw2 to take over Layer 3 forwarding, leveraging the active-gateway configuration. VSX's fast failover mechanism ensures a typical failover time of approximately 50ms, making the transition seamless for clients on Edge-1. The vsx-sync feature ensures SVI configurations remain consistent, preventing traffic disruption. This behavior aligns with HPE Aruba Networking's VSX high-availability design.

* Relevance to Certification Objectives:

* Network Resiliency and Virtualization (8%): Designing and troubleshooting VSX for high availability.

* Routing (16%): Ensuring seamless Layer 3 forwarding in VSX environments.

* Troubleshooting (10%): Diagnosing failover behavior in campus networks.

NEW QUESTION # 93

Exhibit.

An end-to-end QoS design needs to be implemented for wired and wireless. What is needed on the LAN side to maintain the correct DSCP tags?

- A. to trust at DSCP-marked packets in the QoS interior ports
- B. to create a WMM to DSCP mapping on the LAN Edge
- C. to create a WMM to DSCP mapping on the WLAN side
- D. to create a custom DSCP mapping as WLAN DSCP values are different

Answer: A

NEW QUESTION # 94

A customer tasked you with creating a new design for the IDFs in a large office building. A junior member of your staff took all of the technical requirements and produced a design to meet those requirements. You were asked to review the portion of the design below:

CUSTOMER REQUIREMENTS:

preference for stackable switches

Each closet should contain a single virtual switch.

dual 10Gbps fiber uplinks from each closet

capacity for 500 edge ports in each closet; no additional capacity required

lowest-cost AOS-CX switch that meets all requirements

PROPOSED DESIGN:

nine (9) AOS-CX 6200M (R8Q69A: Class4 PoE 4SFP+ switch (R8Q68A) HPE Aruba

Networking 6200M 46G 4SFP+ switch) in each closet

switches configured in a VSF (Virtual Switching Framework) stack, with auto-stacking enabled

uplinks configured on the first and last members of the stack

Does the proposed solution meet the technical requirements?

- A. No. The proposed design is not the lowest-cost AOS-CX switch for this project.

- B. No. The proposed design does not meet the requirements for uplink connectivity.
- **C. No. The proposed design does not meet the capacity requirements.**
- D. Yes. The proposed design meets the customer's requirements.

Answer: C

Explanation:

Nine CX 6200M access switches provide at most $9 \times 48 = 432$ edge ports (even fewer if it's the 46G variant), which is below the 500-port capacity requirement. All other requirements (stackable single virtual switch via VSF, dual 10G uplinks, and lowest-cost stackable CX platform) are met.

NEW QUESTION # 95

Match the AOS-CX switch BGP keepalive and holddown timersto the default.

Answer:

Explanation:

□ Explanation:

□ The question requires matching the default BGP keepalive and hold-down timers on AOS-CX switches to their respective values.

* Analysis of Options:

* Keepalive Timer: The keepalive timer determines how often BGP keepalive messages are sent to maintain a session. The default value on AOS-CX switches is 60 seconds.

* Hold-down Timer: The hold-down timer specifies the maximum time a BGP session can remain active without receiving a keepalive or update message before it is considered down. The default value on AOS-CX switches is 180 seconds.

* Why This Mapping is Correct: Per BGP standards (RFC 4271) and HPE Aruba Networking AOS-CX documentation, the default BGP keepalive timer is 60 seconds, and the hold-down timer is 180 seconds (three times the keepalive interval). These timers ensure BGP sessions remain stable while allowing timely detection of peer failures. The AOS-CX implementation adheres to these defaults unless explicitly configured otherwise.

* Relevance to Certification Objectives:

* Routing (16%): Involves designing and troubleshooting BGP routing topologies, including timer configurations.

* Troubleshooting (10%): Includes diagnosing BGP session issues related to timers.

References:

HPE Aruba Networking AOS-CX Configuration Guide: BGP Configuration, detailing default timer values.

HPE7-A06 Study Guide: Covers BGP session management and timers.

RFC 4271: A Border Gateway Protocol 4 (BGP-4), specifying default keepalive and hold-down timers.

NEW QUESTION # 96

A pair of CX 8325 series switches are configured in a VSX cluster. Which function is executed on both VSX members during normal operation?

- **A. replies to ARP requests with the cluster vMAC**
- B. routes PIM and PIM-DR
- C. relays DHCP requests or serves DHCP offer
- D. periodically sends gratuitous ARP and broadcast hello packets

Answer: A

Explanation:

The question asks which function is executed on both VSX members (CX 8325 switches) during normal operation in a VSX cluster.

* Analysis of Options:

* Option A: Correct. Both VSX switches reply to ARP requests with the cluster's virtual MAC (vMAC) for SVIs configured with active-gateway, ensuring consistent Layer 3 forwarding.

* Option B: Incorrect. PIM (Protocol Independent Multicast) and PIM-DR roles are typically handled by one switch, not both, in a VSX cluster.

* Option C: Incorrect. DHCP relay or server functions are not necessarily performed by both switches simultaneously.

* Option D: Incorrect. Gratuitous ARP and broadcast hello packets are typically sent by the primary switch or specific protocols, not both VSX members for all cases.

* Why Option A is Correct: In a VSX cluster, the active-gateway feature allows both switches to respond to ARP requests for

Switched Virtual Interfaces (SVIs) using a shared virtual MAC address (vMAC). This ensures seamless Layer 3 forwarding and high availability, as clients receive consistent ARP replies regardless of which VSX switch processes the request. The vsx-sync feature ensures the vMAC is synchronized, enabling both switches to perform this function during normal operation, as per HPE Aruba Networking's VSX architecture.

* Relevance to Certification Objectives:

* Network Resiliency and Virtualization (8%): Designing and troubleshooting VSX for redundancy and active-active forwarding.

* Switching (19%): Implementing Layer 2/3 technologies, including ARP handling in VSX.

* Routing (16%): Ensuring consistent Layer 3 operations in VSX environments.

NEW QUESTION # 97

.....

HPE7-A06 exam is a new turning point in the IT industry. Get this examination certification, you will become the IT industry's professional high-end person. With the spread and progress of information technology, you will see hundreds of online resources which provide HP HPE7-A06 Questions and answers. While Actual4Cert ahead. The reason people choose Actual4Cert HP HPE7-A06 exam training materials is that it can really bring benefits to them, and to help you come true your dreams as soon as possible!

HPE7-A06 Exam Guide: <https://www.actual4cert.com/HPE7-A06-real-questions.html>

Actual4Cert HPE7-A06 Exam Guide providing 100% reliable Exam dumps that are verified by experts panel, In this cut-throat competitive world of HP, the HP HPE7-A06 certification is the most desired one, More challenging than just passing the HP HPE7-A06 certification are the intense anxiety and heavy workload that the candidate must endure to be eligible for the HP HPE7-A06 certification, Our HPE7-A06 Exam Questions are regularly updated, and we provide a range of attractive features to enhance your preparation, including PDF format, an online practice test engine.

Offers exceptionally usable tools and templates based in real HPE7-A06 organizational practice, Maybe he would have been better off just turning in early and arriving at the exam well rested.

Actual4Cert providing 100% reliable Exam dumps that are verified by experts panel, In this cut-throat competitive world of HP, the HP HPE7-A06 Certification is the most desired one.

Free PDF 2026 Updated HP Pass HPE7-A06 Exam

More challenging than just passing the HP HPE7-A06 certification are the intense anxiety and heavy workload that the candidate must endure to be eligible for the HP HPE7-A06 certification.

Our HPE7-A06 Exam Questions are regularly updated, and we provide a range of attractive features to enhance your preparation, including PDF format, an online practice test engine.

We guarantee that if you take our provided HP HPE7-A06 exam dumps you will crack the HPE7-A06 Exam in a single try.
