

Real NCP-EUC Torrent | Exam Questions NCP-EUC Vce

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by PrepAwayExam: https://drive.google.com/open?id=1RYCCjw7dKlvAFVJgcFFU4axUqN_nGJ2

Every Nutanix aspirant wants to pass the Nutanix NCP-EUC exam to achieve high-paying jobs and promotions. The biggest issue NCP-EUC exam applicants face is that they don't find credible platforms to buy real NCP-EUC exam dumps. When candidates don't locate actual Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam questions they prepare from outdated material and ultimately lose resources. If you are also facing the same problem then you are at the trusted spot.

Nutanix NCP-EUC (Nutanix Certified Professional - End-User Computing) certification exam is designed to test the skills and knowledge of IT professionals who specialize in end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is intended for professionals who want to validate their expertise in designing, deploying, and managing Nutanix end-user computing solutions. The NCP-EUC Certification Exam is one of the most in-demand certifications in the IT industry, as it recognizes the proficiency of professionals in the field of end-user computing.

>> Real NCP-EUC Torrent <<

Pass Guaranteed 2026 Nutanix NCP-EUC: Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam –High-quality Real Torrent

Obtaining a NCP-EUC certificate can prove your ability so that you can enhance your market value. When you want to correct the answer after you finish learning, the correct answer for our NCP-EUC test prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the NCP-EUC Exam Torrent, and you can flexibly and freely choose these two modes according to your habit. In short, you will find the convenience and practicality of our NCP-EUC quiz guide in the process of learning. We will also continue to innovate and improve functions to provide you with better services.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q119-Q124):

NEW QUESTION # 119

Refer the exhibit

An administrator is getting complaints from users regarding virtual desktop performance. The user base is a mixture of task workers, knowledge workers, and power users. The administrator suspects there are user Virtual desktops that are consuming resources and are starving the other virtual desktops from performing adequately.

How many virtual desktops are contributing to this issue?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

The CPU usage percentage indicates how much of the allocated CPU resources the virtual desktop is consuming.

A high CPU usage percentage means that the virtual desktop is using a lot of CPU resources, which can affect the performance of other virtual desktops on the same host or cluster.

According to Nutanix best practices, the recommended CPU usage percentage for virtual desktops is less than 80%.

VM-0001 (99%)
VM-0002 (98%)
VM-0003 (97%)
VM-0004 (96%)
VM-0005 (95%)
VM-0010 (85%)
VM-0016 (81%)

These virtual desktops are likely contributing to the performance issue by consuming too much CPU resources and starving other virtual desktops from performing adequately.

NEW QUESTION # 120

An administrator is analyzing performance of an application VM hosted on AHV. The administrator is currently viewing the metrics page on a VM in Prism Central, and wants to be able to quickly review the Storage Controller IOPS graph at a later date.

How can the administrator accomplish this task?

- **A. Add the metric to an available analysis session.**
- B. Generate a dashboard summary report.
- C. Use Prism Element to refresh the graph.
- D. Export the current view as a scheduled email.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to the Prism Central User Guide (Analysis and Planning):

* Analysis Sessions: Prism Central includes a feature called "Analysis" (or Performance Analysis). It allows administrators to create "Sessions" which are essentially saved workspaces.

* Workflow: An administrator can select a specific metric (like Storage Controller IOPS), click "Add to Analysis," and save it to a new or existing session. This allows them to "quickly review... at a later date" by simply opening the saved Analysis Session, which retrieves the data dynamically, rather than relying on static exports or reports.

NEW QUESTION # 121

An administrator needs to apply changes via Active Directory Group Policies for an environment using Office365 in Cache Exchanged mode on VMware Horizon.

Which profile management toolset will provide the most effective solution?

- A. Liquidware Profile Management
- B. Citrix Profile Management
- **C. Microsoft FSLogix Profile Management**
- D. AWS WorkSpaces Profile Management

Answer: C

Explanation:

VMware Horizon is a solution that delivers Windows and Linux virtual desktops and published applications to end users from centralized servers.

One of the best practices for delivering Microsoft Office 365 in VMware Horizon is to disable Cached Exchange Mode for Outlook3. This can improve performance and reduce storage requirements.

There are different profile management toolsets that can be used with Office 365 and VMware Horizon. One of them is Horizon Persona Management4, which is a feature that synchronizes user profiles with a remote repository and provides a personalized desktop experience.

Another option is FSLogix Profile Management5, which is a Microsoft solution that enhances Office 365 performance in non-persistent VDI environments by redirecting user profiles to virtual disks.

NEW QUESTION # 122

A network team is designing a new switch infrastructure and wants to keep VM traffic and Storage resiliency traffic separate while minimizing the number of physical ports in use on the switch.

What best practice design choice will work?

- A. Connect breakout cables to multiple node interfaces
- B. Separate CVM and VM NICs in different virtual switches
- **C. Use the native VLAN for CVMs and tagged VLAN for VMs**
- D. Configure traffic shaping to distribute traffic between VLANs

Answer: C

Explanation:

To achieve logical traffic separation while minimizing physical ports (using the same physical uplinks for multiple traffic types), Nutanix AHV networking best practices recommend the use of 802.1Q VLAN tagging.

The standard validated design is to:

- * Place the CVM and AHV Host management/storage interfaces on the Native VLAN (untagged) or a specific management VLAN.
- * Place User VM (Guest) traffic on Tagged VLANs.

This configuration allows storage replication traffic (CVM) and user traffic (VMs) to share the same physical cables (minimizing port usage) while remaining logically isolated at the switch level. Options like separate virtual switches (Option B) often require dedicated physical uplinks, which violates the requirement to minimize ports.

NEW QUESTION # 123

An administrator has been evaluating a performance issue with the current Citrix VD¹ solution on Nutanix.

During the evaluation, the administrator finds out there is a feature that is enabled called Shadow Clones.

What would happen if an administrator disabled Shadow Clones within a company's VDI environment?

- A. Boot storms would be eliminated due to desktop resource contention.
- B. Deployment times would decrease when deploying additional desktops.
- **C. Deployment times would increase as the number deployed desktops increase,**
- D. Boot storms would be eliminated because the number of desktops would be throttled.

Answer: C

Explanation:

Nutanix's Shadow Clones feature is used to create linked clones or snapshots of base VMs, which can improve VM provisioning time and storage efficiency by reducing the amount of duplicated data.

If an administrator disables Shadow Clones within a company's VDI environment, it is likely that deployment times would increase as the number of deployed desktops increases. This is because linked clones or snapshots would no longer be used, so each new

desktop deployment would require creating a full copy of the base VM.

Nutanix Shadow Clones allow for distributed caching of a particular disk or VM data, which are in a 'multi-reader' scenario. This can help in scenarios such as VDI or private clone boot storms, where VMs on multiple nodes read from the same set of base disks¹²

NEW QUESTION # 124

Do you want to catch up with the trend in the IT industry? Being certified by Nutanix NCP-EUC exam certification means a large possibility of success. While our NCP-EUC exam targeted training will help you step ahead of others. The valid NCP-EUC study practice will make your thoughts more clear, and you will have the ability to deal with problem in the practical application. Then, passing the NCP-EUC Actual Test is an easy and simple thing. If you still have some doubts, please download PrepAwayExam NCP-EUC free demo for a try. You will be surprised.
