100% Pass 2026 Efficient Microsoft MB-330: Latest Microsoft Dynamics 365 Supply Chain Management Functional Consultant Test Sample

You will notice the above features in the Microsoft MB-330 Web-based format too. But the difference is that it is suitable for all operating systems. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the Microsoft Dynamics 365 Supply Chain Management Functional Consultant (MB-330) certification test. Above all, it operates on all browsers.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q149-Q154):

NEW QUESTION # 149

A company opens a new warehouse facility.

You need to receive items on a transfer order by using an arrival overview.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□

NEW QUESTION # 150

A company uses the nonconformance functionality in Dynamics 365 Supply Chain Management.

When a manufactured part fails a quality test, a quality clerk creates a nonconformance. You determine that additional items are needed to correct the issue.

You must record the additional items for the nonconformance.

What should you do?

- A. Reject the nonconformance and add the items to the quality order.
- B. Approve the nonconformance and add the items to the quality order.
- **C. Approve the nonconformance and add a related operation.**
- D. Reject the nonconformance and add a related operation.

Answer: C

Explanation:

Add items to an operation

To add items to an operation, follow these steps.

1. Go to Inventory management > Periodic tasks > Quality management > Non conformances.

2. In the list, select the nonconformance that you want to update.

Note: You can add or update operations only for nonconformances that are approved.

3. On the Action Pane, select Related operations.

4. On the Related operations page, select the operation that you want to add items to.

5. On the Action Pane, select Items.

6. On the Related operations page, on the Action pane, select New to add a row to the grid. Then set the following fields for new row:

Item number - Select the product that will be consumed as part of the selected operation.

Quantity - Enter the number of items that will be consumed.

7. Repeat the previous step for each additional item that you must add.

8. Close the pages.

NEW QUESTION # 151

You need to configure item pricing and discounts.

How should you complete the setup? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

NEW QUESTION # 152

A company manufactures and sells speaker boxes. The speaker boxes can be silver or black with a basic or upgraded wiring harness assembly.

The speaker box must be created in the item master so that the variables for colors and harness type can be assigned at order entry.

You need to create a new item that supports multiple variables.

What should you do?

- A. Create a new product. Select predefined variant as the configuration technology.
- **B. Create a new product master. Select predefined variant as the configuration technology.**

- C. Create a new product master. Select constraint-based configuration as the configuration technology.
- D. Create a new product. Select constraint-based configuration as the configuration technology.

Answer: B

NEW QUESTION # 153

An employee at a company needs to lay out the various component builds for bicycles.

You need to identify which constraints the employee should use to set up the bicycles.

Which two types of constraints achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- **A. table constraints that are used generically among product configuration models**
- B. expression constraints that are used generically among product configuration models
- C. table constraints that are always unique to each product configuration model
- **D. expression constraints that are unique to each product configuration model**

Answer: A,D

Explanation:

Section: Implement Product information management
