Microsoft 365 Administrator 認定 MS-102 試験問題 (Q360-Q365):

質問 #360

You have a Microsoft 365 subscription.

You have the retention policies shown in the following table.

Name	Location	Retain items for a specific period	Start the retention period based on	At the end of the retention period
Policy1	SharePoint sites	1 years	When items were created	Delete items automatically
Policy2	SharePoint sites	2 years	When items were last modified	Do nothing

Both policies are applied to a Microsoft SharePoint site named Site1 that contains a file named File1.docx.

File1.docx was created on January 1, 2022 and last modified on January 31,2022. The file was NOT modified again.

When will File1.docx be deleted automatically?

- A. January 1,2024
- B. January 31, 2023
- C. never
- D. January 1,2023
- E. January 31, 2024

正解: E

解説:

Retention wins over deletion.

Note:

Explanation for the four different principles:

1. Retention wins over deletion. Content won't be permanently deleted when it also has retention settings to retain it. While this principle ensures that content is preserved for compliance reasons, the delete process can still be initiated (user-initiated or system-initiated) and consequently, might remove the content from users' main view. However, permanent deletion is suspended.
2. Etc.

質問 # 362

HOTSPOT

You have a Microsoft 365 E5 subscription.

You need to meet the following requirements:

Automatically encrypt documents stored in Microsoft OneDrive and SharePoint.

Enable co-authoring for Microsoft Office documents encrypted by using a sensitivity label.

Which two settings should you use in the Microsoft Purview compliance portal? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

正解:

解説:

Explanation:

Answer Area

Box 1: Information protection

Automatically encrypt documents stored in Microsoft OneDrive and SharePoint.

How to integrate Microsoft Purview Information Protection with Defender for Cloud Apps Enable Microsoft Purview Information Protection All you have to do to integrate Microsoft Purview Information Protection with Defender for Cloud Apps is select a single checkbox. By enabling automatic scan, you enable searching for sensitivity labels from Microsoft Purview Information Protection on your Office 365 files without the need to create a policy. After you enable it, if you have files in your cloud environment that are labeled with sensitivity labels from Microsoft Purview Information Protection, you'll see them in Defender for Cloud Apps.

To enable Defender for Cloud Apps to scan files with content inspection enabled for sensitivity labels:

In the Microsoft Defender XDR portal, select Settings. Then choose Cloud Apps. Then go to Information Protection - > Microsoft Information Protection.

Note: Encryption of data at rest

Encryption at rest includes two components: BitLocker disk-level encryption and per-file encryption of customer content.

BitLocker is deployed for OneDrive for Business and SharePoint Online across the service. Per-file encryption is also in OneDrive for Business and SharePoint Online in Microsoft 365 multi-tenant and new dedicated environments that are built on multi-tenant technology.

Box 2: Settings

Enable co-authoring for Microsoft Office documents encrypted by using a sensitivity label.

1. Sign in to the Microsoft Purview compliance portal as a global admin for your tenant.
2. From the navigation pane, select Settings > Co-authoring for files with sensitivity files.

3. On the Co-authoring for files with sensitivity labels page, read the summary description, prerequisites, and what to expect.
4. Then select Turn on co-authoring for files with sensitivity labels, and Apply.
5. Wait 24 hours for this setting to replicate across your environment before you use this new feature for co- authoring.

質問 # 364

You have a Microsoft 365 E5 subscription and an Azure AD tenant named contoso.com.

All users have computers that run Windows 11, are joined to contoso.com, and are protected by using BitLocker Drive Encryption (BitLocker).

You plan to create a user named Admin1 that will perform following tasks:

* View BitLocker recovery keys.

* Configure the usage location for the users in contoso.com.

You need to assign roles to Admin1 to meet the requirements. The solution must use the principle of least privilege. Which two roles should you assign? To answer, select the appropriate roles in the answer area.

NOTE: Each correct selection is worth one point
