Microsoft AI Business Professional Sample Questions (Q10-Q15):

NEW QUESTION # 10

What are two limitations of prompt scheduling in Microsoft 365 Copilot? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 11

A colleague from another company shares a link to a prompt.

When you select the link, you receive the following response: "Prompt not found. Sorry, it looks like the prompt is no longer available."

What is a possible cause of the response?

- A. The prompt is outdated.

- B. The prompt is outside of your organization.
- C. The prompt contains a file that has a sensitivity label applied.
- D. The prompt is a scheduled prompt.
- E. The prompt contains a reference to a file that you do NOT have access to.

Answer: B

Explanation:

Microsoft 365 Copilot operates within the security, compliance, and identity boundaries of a Microsoft 365 tenant. Shared prompts, prompt links, and Copilot artifacts are governed by organizational access controls and tenant isolation. If a prompt is created and shared from outside your organization, cross-tenant access may not be supported depending on the sharing configuration and administrative policies.

When a user attempts to open a prompt that resides in another organization's tenant without proper cross-tenant sharing permissions, Copilot cannot locate or validate the resource within the user's own environment. As a result, the system displays a "Prompt not found" message.

Option B would typically result in an access or permissions error rather than the prompt being unavailable entirely. Sensitivity labels and scheduled prompts do not inherently cause a "not found" error. Therefore, the most likely cause is that the prompt exists outside your organization's tenant boundary and is not accessible to you.

NEW QUESTION # 12

You need to access Microsoft 365 Copilot from a web browser. Which URL should you use?

- A. <https://myaccount.microsoft.com>
- B. <https://m365.cloud.microsoft>
- C. <https://copilotstudio.microsoft.com>
- D. <https://myapps.microsoft.com>

Answer: B

Explanation:

Microsoft 365 Copilot can be accessed via its dedicated web experience for enterprise users. The correct web entry point for Microsoft 365 Copilot is <https://m365.cloud.microsoft>, which provides authenticated access to Copilot features within the Microsoft 365 environment.

This URL routes users into the Microsoft 365 ecosystem where Copilot integrates with organizational data such as SharePoint, OneDrive, Teams, and Outlook. It ensures that users are authenticated through Microsoft Entra ID and that access controls are enforced according to tenant policies.

Option B refers to Copilot Studio, which is used to build and manage custom copilots and agents rather than access the Microsoft 365 Copilot chat experience. Option C (My Apps) is a general application launcher portal. Option D is an incorrect account management URL and does not provide Copilot access.

Therefore, to access Microsoft 365 Copilot from a web browser, the correct URL is <https://m365.cloud.microsoft>.

NEW QUESTION # 13

You are a business user who uses Microsoft 365 apps and services, including Microsoft Teams. You have a work account.

You want to use Microsoft 365 Copilot to help with meetings.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
