Oracleの1Z0-1122-25試験問題には3つの異なるバージョン（PDF、ソフトウェア、APPオンライン）があるため、1Z0-1122-25学習ガイドのバージョンには複数の選択肢があり、興味や習慣に応じて選択できます。OracleソフトウェアまたはAPPオンラインバージョンの1Z0-1122-25準備資料は、コンピューターまたは電話で練習できます。それらは、エレクトロニクス製品が私たちの生活や仕事のスタイルに広く適用されているという理由で開発された新しいものです。1Z0-1122-25の実際のOracle Cloud Infrastructure 2025 AI Foundations Associate試験のPDFバージョンは印刷をサポートしており、論文で練習してメモを取ることができます。

Oracle 1Z0-1122-25 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Intro to ML Foundations: This section evaluates the knowledge of Machine Learning Engineers in understanding machine learning principles and methodologies. It explores the basics of supervised learning, focusing on regression and classification techniques, along with unsupervised learning methods such as clustering and anomaly detection. It also introduces reinforcement learning fundamentals, helping professionals grasp the different approaches used to train AI models.
トピック 2	Intro to Generative AI & LLMs: This section tests the abilities of AI Developers to understand generative AI and large language models. It introduces the principles of generative AI, explains the fundamentals of large language models (LLMs), and discusses the core workings of transformers, prompt engineering, instruction tuning, and LLM fine-tuning for optimizing AI-generated content.

トピック 3	Intro to DL Foundations: This section assesses the expertise of Deep Learning Engineers in understanding deep learning frameworks and architectures. It covers fundamental concepts of deep learning, introduces convolutional neural networks (CNN) for image processing, and explores sequence models like recurrent neural networks (RNN) and long short-term memory (LSTM) networks for handling sequential data.
トピック 4	Get started with OCI AI Portfolio: This section measures the proficiency of Cloud AI Specialists in exploring Oracle Cloud Infrastructure (OCI) AI services. It provides an overview of OCI AI and machine learning services, details AI infrastructure capabilities and explains responsible AI principles to ensure ethical and transparent AI development.
トピック 5	Intro to OCI AI Services: This section tests the expertise of AI Solutions Engineers in working with OCI AI services and related APIs. It provides insights into key AI services such as language processing, computer vision, document understanding, and speech recognition, allowing professionals to leverage Oracle's AI ecosystem for building intelligent applications.
トピック 6	OCI Generative AI and Oracle 23ai: This section evaluates the skills of Cloud AI Architects in utilizing Oracle's generative AI capabilities. It includes a deep dive into OCI Generative AI services, Autonomous Database Select AI for enhanced data intelligence and Oracle Vector Search for efficient information retrieval in AI-driven applications.

Oracle 1Z0-1122-25 Exam | 1Z0-1122-25試験問題集 - 無料デモのダウンロード 1Z0-1122-25日本語

私たちは、このキャリアの中で、10年以上にわたりプロとして1Z0-1122-25練習資料を作りました。1Z0-1122-25練習資料が最も全面的な参考書です。そして、私たちは十分な耐久力を持って、ずっと1Z0-1122-25練習資料の研究に取り組んでいます。私たちの1Z0-1122-25練習資料を利用したら、1Z0-1122-25試験に合格した人がかなり多いです。だから、弊社の1Z0-1122-25練習資料を早く購入しましょう！

Oracle Cloud Infrastructure 2025 AI Foundations Associate 認定 1Z0-1122-25 試験問題 (Q40-Q45):

質問 # 40

Which statement describes the Optical Character Recognition (OCR) feature of Oracle Cloud Infrastructure Document Understanding?

- A. It provides real-time translation of text.
- B. It enhances the visual quality of documents.
- C. It converts audio files into text.
- **D. It recognizes and extracts text from a document.**

正解: D

解説:

The Optical Character Recognition (OCR) feature of Oracle Cloud Infrastructure (OCI) Document Understanding recognizes and extracts text from documents. This capability is fundamental for converting printed or handwritten text into a machine-readable format, allowing for further processing, such as text analysis, search, and archiving. OCI's OCR is an essential tool in automating document processing workflows, enabling businesses to digitize and manage their documents efficiently.

質問 # 41

What is the main function of the hidden layers in an Artificial Neural Network (ANN) when recognizing handwritten digits?

- A. Storing the input pixel values
- **B. Capturing the internal representation of the raw image data**

- C. Directly predicting the final output
- D. Providing labels for the output neurons

正解: B

解説:

In an Artificial Neural Network (ANN) designed for recognizing handwritten digits, the hidden layers serve the crucial function of capturing the internal representation of the raw image data. These layers learn to extract and represent features such as edges, shapes, and textures from the input pixels, which are essential for distinguishing between different digits. By transforming the input data through multiple hidden layers, the network gradually abstracts the raw pixel data into higher-level representations, which are more informative and easier to classify into the correct digit categories.

質問 # 42

What would you use Oracle AI Vector Search for?

- A. Store business data in a cloud database.
- B. Query data based on semantics.
- C. Query data based on keywords.
- D. Manage database security protocols.

正解: B

解説:

Oracle AI Vector Search is designed to query data based on semantics rather than just keywords. This allows for more nuanced and contextually relevant searches by understanding the meaning behind the words used in a query. Vector search represents data in a high-dimensional vector space, where semantically similar items are placed closer together. This capability makes it particularly powerful for applications such as recommendation systems, natural language processing, and information retrieval where the meaning and context of the data are crucial.

質問 # 43

Which feature is NOT supported as part of the OCI Language service's pretrained language processing capabilities?

- A. Sentiment Analysis
- B. Language Detection
- C. Text Generation
- D. Text Classification

正解: C

解説:

The OCI Language service offers several pretrained language processing capabilities, including Text Classification, Sentiment Analysis, and Language Detection. However, it does not natively support Text Generation as a part of its core language processing capabilities. Text Generation typically involves creating new content based on input prompts, which is a feature more commonly associated with models specifically designed for natural language generation.

質問 # 44

You are part of the medical transcription team and need to automate transcription tasks. Which OCI AI service are you most likely to use?

- A. Language
- B. Vision
- C. Document Understanding
- D. Speech

正解: D

解説:

For automating transcription tasks in a medical transcription team, the most appropriate OCI AI service to use would be the
