100% Pass Perfect Plat-Arch-206 - High Salesforce Certified Heroku Architect Passing Score

As we all know, the latest Plat-Arch-206 quiz prep has been widely spread since we entered into a new computer era. The cruelty of the competition reflects that those who are ambitious to keep a foothold in the job market desire to get the Plat-Arch-206 certification. Our Plat-Arch-206 exam guide engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies. Our laTest Plat-Arch-206 Quiz prep aim at assisting you to pass the Plat-Arch-206 exam and making you ahead of others.

Salesforce Certified Heroku Architect Sample Questions (Q83-Q88):

NEW QUESTION # 83

Universal Containers has a microservices architecture on Heroku. One microservice, named the Metrics Microservice, periodically fetches metrics from a fleet of IoT sensors. Then, the Metrics Microservice is required to send relevant metrics to each of the other microservices using REST. When a new microservice is added to the architecture, the Metrics Microservice must send metrics to that new microservice too. As a result, adding microservices to the architecture causes performance issues. How should an Architect recommend changing this architecture to improve its scalability?

- A. Configure each microservices to directly fetch the sensor metrics that are relevant to it.
- B. Use Private Space DNS Service Discovery to reduce the amount of time required for the Metrics Microservice to obtain each other microservice's IP address
- **C. Use Apache Kafka on Heroku to publish metrics to a topic that the other microservices can consume.**
- D. Configure the other microservices to pull the Metrics Microservice for updates every five seconds

Answer: C

NEW QUESTION # 84

A healthcare client is creating a web portal for their customers on Heroku, which is sourced from a Salesforce instance. Some of the Salesforce data they wish to display falls under HIPAA compliance, and their auditors have determined this data must be stored encrypted-at-rest. To satisfy this requirement, they have enabled Platform Encryption on Salesforce.

They are investigating Heroku Shield Private Spaces, Shield Dynos, Shield Postgres, and Shield HerokuConnect.

How will Shield Heroku Connect interact with the encrypted fields in Salesforce?

- A. Shield Heroku Connect requires customization on the Salesforce side to decrypt the data before transmitting to Heroku.
- **B. Shield Heroku Connect will be able to synchronize data from fields in Salesforce without additional customization, but any writes will need to be encrypted using the Salesforce encryption key first before being written.**
- C. Shield Heroku Connect will be able to synchronize data bidirectionally without additional customization.
- D. Shield Heroku Connect will be able to access only cypher text in the fields from Salesforce. They will need to import the encryption key from Salesforce to decrypt to store in Shield Postgres.

Answer: B

NEW QUESTION # 85

A customer wants to sync data between their Salesforce org and Heroku Postgres.

Which two limitations should an Architect remember when recommending Heroku Connect? (Choose two.)

- **A. HerokuConnect can only access fields and objects that its associated Salesforce integration user can access.**
- B. Heroku Connect does not support all Salesforce objects and fields.
- **C. Heroku Connect does not provide an API.**
- D. Heroku Connect cannot sync custom objects.

Answer: A,C

NEW QUESTION # 86

A customer's Heroku Redis instance regularly reaches its storage limit. Besides upgrading to a bigger plan, what solution should an Architect recommend for this scenario?

- **A. Explore a different key eviction scheme.**
- B. Create a fork of the primary Heroku Redis instance.
- C. Failover to ephemeral filesystem for the running dyno
- D. Migrate the data to a Heroku Postgres database

Answer: A

NEW QUESTION # 87

A customer runs Production Check on an application from the Dashboard. Which two runtime issues does it check for? Choose 2 answers.

- **A. Production-tier database: ensuring a production-tier database is being used**
- **B. Dyno redundancy: ensuring at least 2 web dynos are available**
- C. Worker dyno scale: ensuring at least 1 worker dyno is available.
- D. CDN ensuring a CDN is available to the web dynos

Answer: A,B
