IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q73-Q78):

NEW QUESTION # 73
SCENARIO
Kyle is a new security compliance manager who will be responsible for coordinating and executing controls to ensure compliance with the company's information security policy and industry standards. Kyle is also new to the company, where collaboration is a core value. On his first day of new-hire orientation, Kyle's schedule included participating in meetings and observing work in the IT and compliance departments.
Kyle spent the morning in the IT department, where the CIO welcomed him and explained that her department was responsible for IT governance. The CIO and Kyle engaged in a conversation about the importance of identifying meaningful IT governance metrics. Following their conversation, the CIO introduced Kyle to Ted and Barney. Ted is implementing a plan to encrypt data at the transportation level of the organization's wireless network. Kyle would need to get up to speed on the project and suggest ways to monitor effectiveness once the implementation was complete. Barney explained that his short-term goals are to establish rules governing where data can be placed and to minimize the use of offline data storage.
Kyle spent the afternoon with Jill, a compliance specialist, and learned that she was exploring an initiative for a compliance program to follow self-regulatory privacy principles. Thanks to a recent internship, Kyle had some experience in this area and knew where Jill could find some support. Jill also shared results of the company's privacy risk assessment, noting that the secondary use of personal information was considered a high risk.
By the end of the day, Kyle was very excited about his new job and his new company. In fact, he learned about an open position for someone with strong qualifications and experience with access privileges, project standards board approval processes, and application-level obligations, and couldn't wait to recommend his friend Ben who would be perfect for the job.
Ted's implementation is most likely a response to what incident?

- A. Cyber criminals accessed proprietary data by running automated authentication attacks on the organization's network.
- B. Signatureless advanced malware was detected at multiple points on the organization's networks.
- C. Confidential information discussed during a strategic teleconference was intercepted by the organization's top competitor.
- D. Encryption keys were previously unavailable to the organization's cloud storage host.

Answer: A

Explanation:
In the scenario, Ted implemented a new security measure that requires all employees to use two-factor authentication when accessing the organization's network. This measure is most likely a response to an incident where cyber criminals accessed proprietary data by running automated authentication attacks on the organization's network.

NEW QUESTION # 74
What is the main benefit of using dummy data during software testing?

- A. The data comes in a format convenient for testing.
- B. The data enables the suppression of particular values in a set.
- C. Developers do not need special privacy training to test the software.
- D. Statistical disclosure controls are applied to the data.

Answer: B

NEW QUESTION # 75
Implementation of privacy controls for compliance with the requirements of the Children's Online Privacy Protection Act (COPPA) is necessary for all the following situations EXCEPT?

- A. An interactive toy copies a child's behavior through gestures and kid-friendly sounds. It runs on battery power and automatically connects to a base station at home to charge itself.
- B. A note-taking application converts hard copies of kids' class notes into audio books in seconds. It does so by using the

processing power of idle server farms.
- C. A math tutoring service commissioned an advertisement on a bulletin board inside a charter school. The service makes it simple to reach out to tutors through a QR-code shaped like a cartoon character.
- D. A virtual jigsaw puzzle game marketed for ages 5-9 displays pieces of the puzzle on a handheld screen. Once the child completes a certain level, it flashes a message about new themes released that day.

Answer: C

Explanation:
The Children's Online Privacy Protection Act (COPPA) is designed to protect the privacy of children under 13 by regulating the collection of personal information online.
* COPPA Applicability: COPPA applies to websites, online services, and apps directed at children under 13 or those that knowingly collect personal information from children under 13.
* Advertisement Context: In option C, the math tutoring service advertises through a bulletin board within a charter school, which is not an online activity. Since COPPA focuses on online collection of data, this situation falls outside its scope.
The other options (A, B, and D) involve direct interaction with children through online platforms or devices, hence falling under COPPA's jurisdiction. References: IAPP Certification Textbooks, Section on COPPA and Children's Privacy Regulations.

NEW QUESTION # 76
SCENARIO
Clean-Q is a company that offers house-hold and office cleaning services. The company receives requests from consumers via their website and telephone, to book cleaning services. Based on the type and size of service, Clean-Q then contracts individuals that are registered on its resource database - currently managed in- house by Clean-Q IT Support. Because of Clean-Q's business model, resources are contracted as needed instead of permanently employed.
The table below indicates some of the personal information Clean-Q requires as part of its business operations:
Clean-Q has an internal employee base of about 30 people. A recent privacy compliance exercise has been conducted to align employee data management and human resource functions with applicable data protection regulation. Therefore, the Clean-Q permanent employee base is not included as part of this scenario.
With an increase in construction work and housing developments, Clean-Q has had an influx of requests for cleaning services. The demand has overwhelmed Clean-Q's traditional supply and demand system that has caused some overlapping bookings.
Ina business strategy session held by senior management recently, Clear-Q invited vendors to present potential solutions to their current operational issues. These vendors included Application developers and Cloud-Q's solution providers, presenting their proposed solutions and platforms.
The Managing Director opted to initiate the process to integrate Clean-Q's operations with a cloud solution (LeadOps) that will provide the following solution one single online platform: A web interface that Clean-Q accesses for the purposes of resource and customer management. This would entail uploading resource and customer information.
* A customer facing web interface that enables customers to register, manage and submit cleaning service requests online.
* A resource facing web interface that enables resources to apply and manage their assigned jobs.
* An online payment facility for customers to pay for services.
If Clean-Q were to utilize LeadOps' services, what is a contract clause that may be included in the agreement entered into with LeadOps?

- A. A provision prescribing technical and organizational controls that LeadOps must implement.
- B. A provision that allows Clean-Q to conduct audits of LeadOps' information processing and information security environment, at LeadOps' cost and at any time that Clean-Q requires.
- C. A provision that requires LeadOps to notify Clean-Q of any suspected breaches of information that involves customer or resource information managed on behalf of Clean-Q.
- D. A provision that holds LeadOps liable for a data breach involving Clean-Q's information.

Answer: B

NEW QUESTION # 77
Properly configured databases and well-written website codes are the best protection against what online threat?

- A. SQL injection.
- B. Pharming.
- C. System modification.
- D. Malware execution.

Answer: A

NEW QUESTION # 78

......

People can achieve great success without an outstanding education and that the IAPP qualifications a successful person needs can be acquired through the study to get some professional certifications.
