Die echten und originalen Prüfungsfragen und Antworten zu C_BCBTP_2502 (SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite) bei ZertPruefung wurden verfasst von unseren SAP-Experten mit den Informationen von C_BCBTP_2502 (SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite) aus dem Testcenter wie PROMETRIC oder VUE.

SAP C_BCBTP_2502 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> • Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP’s portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

Thema 2	<ul style="list-style-type: none"> • Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

SAP C_BCBTP_2502 Prüfungsaufgaben, C_BCBTP_2502 Zertifizierungsantworten

Heutzutage, wo Zeit in dieser Gesellschaft sehr geschätzt wird, schlage ich Ihnen vor, die effizienten SAP C_BCBTP_2502 (SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite) Fragenkataloge von ZertPruefung zu wählen. Sie können mit weniger Zeit und Geld die SAP C_BCBTP_2502 Zertifizierungsprüfung nur einmalig bestehen können.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C_BCBTP_2502 Prüfungsfragen mit Lösungen (Q36-Q41):

36. Frage

Which of the following capabilities does SAP AI Core provide?

- A. Strictly rule-based automation without AI capabilities.
- B. Transactional data management for ERP systems.
- C. Hardware infrastructure for AI development.
- **D. Predictive analytics and machine learning model deployment.**

Antwort: D

Begründung:

SAP AI Core is a vital service within the "Intelligent Technologies" pillar of SAP BTP, designed to handle the heavy lifting of artificial intelligence at an enterprise scale. Its primary capability is providing a standardized, highly scalable runtime for predictive analytics and machine learning (ML) model deployment. In the modern SAP Business Suite, "intelligence" is no longer just a buzzword; it is a functional requirement. SAP AI Core allows businesses to take raw data from their systems, train sophisticated models, and then deploy those models into production environments where they can serve real-time predictions.

This service is unique because it supports the full lifecycle of an AI model, including execution and monitoring. It allows developers to integrate AI features into their applications while maintaining "AI Ethics" and transparency, which are critical for enterprise compliance. Unlike standard transactional databases that focus on record-keeping, SAP AI Core focuses on "inference"-using data to generate new insights and automate complex decisions. By positioning SAP AI Core as the engine for intelligence, SAP BTP ensures that organizations can move beyond basic automation toward advanced, self-learning processes that improve over time, such as predictive maintenance in manufacturing or intelligent lead scoring in sales.

37. Frage

What is the primary function of SAP BTP's SAP Fiori tools?

- **A. To build user-friendly applications with a consistent UI/UX experience.**
- B. To develop backend APIs for database integration.
- C. To deploy third-party CRM solutions.
- D. To replace SAP S/4HANA transactional screens.

Antwort: A

Begründung:

User adoption is often the biggest hurdle in enterprise software deployment. The primary function of SAP Fiori tools on BTP is to solve this by enabling the creation of user-friendly applications with a consistent UI/UX experience. SAP Fiori is the design language

for all modern SAP applications, moving away from complex, menu-heavy traditional screens toward a role-based, intuitive interface that works seamlessly across desktops, tablets, and smartphones.

On SAP BTP, Fiori tools (integrated within SAP Business Application Studio) provide templates and floorplans that help developers quickly build applications that look and behave exactly like standard SAP S

/4HANA apps. This consistency is vital for the SAP Business Suite because it reduces training time and minimizes user error. When an employee moves from an HR task in SuccessFactors to a finance task in S

/4HANA, the interface remains familiar. By positioning Fiori as the "face" of the platform, SAP ensures that the complex technical capabilities of BTP-such as AI insights or real-time data-are delivered to the end- user in a simple, actionable, and modern way, ultimately increasing productivity and employee satisfaction.

38. Frage

Which SAP BTP capability is crucial for supply chain resilience in the logistics industry?

- A. Restricting logistics data visibility to local servers.
- **B. Real-time data exchange and tracking with SAP Integration Suite.**
- C. Limiting automation in fleet management.
- D. Manual coordination of supply chain operations.

Antwort: B

Begründung:

Supply chain resilience depends on visibility and the ability to react to disruptions in real-time. The SAP Integration Suite on BTP is crucial here because it enables real-time data exchange and tracking across a global network of suppliers, carriers, and warehouses. In the logistics industry, delays at a single port or a shortage of specific raw materials can have a cascading effect. By integrating IoT (Internet of Things) sensors, GPS tracking, and carrier management systems through the BTP Integration Suite, companies can gain a

"control tower" view of their entire supply chain.

This connectivity allows for "event-driven" logistics. For example, if a shipment is delayed, the system can automatically trigger a notification in the SAP S/4HANA system, recalculate production schedules, and notify customers-all without manual intervention.

This level of automation and visibility is what builds resilience; it allows businesses to pivot quickly when faced with unexpected challenges. Positioning SAP BTP as the integration hub for logistics ensures that data flows smoothly between the "digital core" and the physical world of shipping and receiving. This transforms the supply chain from a linear, often opaque process into a dynamic, responsive network that can withstand the pressures of modern global commerce.

39. Frage

Which SAP BTP solution can be used to streamline handling of blocked sales orders?

- A. SAP Analytics Cloud
- **B. SAP Build Process Automation**
- C. SAP Datasphere
- D. SAP Integration Suite

Antwort: B

Begründung:

Blocked sales orders often represent a significant bottleneck in the "Order-to-Cash" process, usually requiring manual intervention from credit managers or sales administrators. SAP Build Process Automation is the ideal BTP solution to streamline this task. It combines the capabilities of workflow management and Robotic Process Automation (RPA) to automate the evaluation and release (or escalation) of these orders based on predefined business rules and real-time data from SAP S/4HANA.

By positioning SAP Build Process Automation as the solution, businesses can implement "exception-based" management. Instead of a human reviewing every blocked order, the BTP service can automatically release orders that meet certain low-risk criteria or route high-value/high-risk blocks to the appropriate manager's mobile device for instant approval. This significantly reduces the "Day Sales Outstanding" (DSO) and improves customer satisfaction by accelerating fulfillment. This approach highlights the value of SAP BTP as an extension layer for the SAP Business Suite; it allows for the optimization of core ERP processes without the need for complex, custom ABAP development, maintaining a "clean core" while achieving high levels of operational efficiency.

40. Frage

Which of the following SAP BTP components enhances enterprise data governance?

- A. SAP Concur
- B. SAP AppGyver
- **C. SAP Data Intelligence**
- D. SAP BusinessObjects BI

Antwort: C

Begründung:

Data governance is the practice of ensuring that data is accurate, available, and secure across an organization.

SAP Data Intelligence is the primary component within SAP BTP that addresses this need. It provides advanced metadata management and data cataloging capabilities, which are the foundations of governance. A data catalog acts like a "search engine" for enterprise data, allowing users to understand the origin (lineage), quality, and sensitivity of the information they are working with. In a complex SAP Business Suite environment, data often moves through multiple stages and systems. SAP Data Intelligence tracks this "data lineage," showing how data was transformed as it moved from an ERP system to a reporting dashboard. This transparency is crucial for regulatory compliance (like GDPR) and for building trust in the data used for decision-making. If a financial report looks incorrect, governance tools allow IT to trace the data back to its source to find the error. By positioning Data Intelligence as the governance hub, SAP BTP ensures that the "Intelligent Enterprise" is built on a foundation of high-quality, trusted data. This is a significant differentiator from tools like SAP BusinessObjects (which focuses on reporting) or SAP Concur (which focuses on expenses), as Data Intelligence provides the underlying control layer for the entire data ecosystem.

41. Frage

.....

Mit Hilfe der Schulungsunterlagen zur SAP C_BCBTP_2502 Zertifizierungsprüfung können Sie ganz schnell und leicht die Prüfung bestehen. Das haben viele Kandidaten uns gesagt. Mit den Schulungsunterlagen zur SAP C_BCBTP_2502 Zertifizierungsprüfung können Sie Ihre Gedanken ordnen und sich ganz gelassen auf die Prüfung vorbereiten. Das reduziert nicht nur Stress, sondern hilft Ihnen, die SAP C_BCBTP_2502 Prüfung zu bestehen. ZertPruefung hat auch kostenlose Fragen und Antworten als Probe. Meines Erachtens nach können Sie die Demo zuerst benutzen, dann wird sie Ihnen ganz passen. Sie werden selber ihre Wirkung kennen.
