To pass the HP HPE7-A08 exam on the first try, candidates need HPE Aruba Networking Switching Professional Exam updated practice material. Preparing with real HPE7-A08 exam questions is one of the finest strategies for cracking the exam in one go. Students who study with HP HPE7-A08 Real Questions are more prepared for the exam, increasing their chances of succeeding. Finding original and latest HPE7-A08 exam questions however, is a difficult process. Candidates require assistance finding the HPE7-A08 updated questions.

HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.

Topic 2	• Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.
Topic 3	• Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.
Topic 4	• Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.

We have experienced education technicians and stable first-hand information to provide you with high quality & efficient HPE7-A08 training dumps. If you are still worried about your exam, our exam dumps may be your good choice. Our HPE7-A08 training dumps cover nearly 85% real test materials so that if you master our dumps questions and answers you can clear exams successfully. Don't worry over trifles. If you purchase our HPE7-A08 training dumps you can spend your time on more significant work.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which CLI command resets all dynamic MAC addresses learned on a switch port?

- A. reset mac-port
- B. remove mac-table
- C. flush mac-address-table
- D. clear mac-address-table dynamic

Answer: D

Explanation:

The clear mac-address-table dynamic command deletes dynamically learned MAC addresses, helping troubleshoot port security issues and connectivity problems.

NEW QUESTION # 65

Which CLI command resets all network counters on an Aruba CX switch?

- A. show interfaces reset
- B. flush network metrics
- C. reset statistics
- D. clear counters

Answer: D

Explanation:

The clear counters command resets all traffic and error statistics, allowing accurate troubleshooting of performance problems after making configuration changes.

NEW QUESTION # 66

Refer to the exhibit from an HPE Aruba Networking CX6000:

Two CX 6000 switches are configured with the same configuration for LAG 1. What needs to be done to remove the LACP block state?

- A. Change the LACP mode from passive to static on one of the switches
- **B. Change the LACP mode from passive to active on one of the switches**
- C. On one of the switches, change the LACP mode to passive
- D. On both of the switches, change the LACP timeout to short

Answer: B

Explanation:

LACP (Link Aggregation Control Protocol) modes can be active or passive. When two switches are both configured in passive mode, no LACP packets are initiated, causing the link aggregation to fail or go into a block state.

Changing one side from passive to active causes that switch to initiate LACP negotiation, resolving the block state.

Changing to static mode disables LACP negotiation, which is not recommended unless both sides are static.

Changing timeout does not solve LACP block issues caused by mode mismatches.

Therefore, changing one switch's LACP mode from passive to active is necessary to resolve the block.

NEW QUESTION # 67

A user reports slow access to a cloud application. The switch shows normal CPU utilization. What should be checked next?

Response:

- A. QoS policies
- **B. End-to-end latency**
- C. STP configuration
- D. VLAN assignments

Answer: B

NEW QUESTION # 68

An engineer has applied the above configuration to R1 and R2. However, the router's OSPF adjacency never progresses past the "EXSTART/DR" state.

Which configuration action on either router will allow R1 and R2 to progress past the "EXSTART/DR" state?

- A. Change R1 and R2 to a network type of point-to-point
- **B. Remove the layer 3 MTU configuration**
- C. Ensure the OSPF process is not configured with passive-interface default
- D. Change the IP address and mask applied to interface 1/1/1

Answer: B

NEW QUESTION # 69

.....

In a knowledge-based job market, learning is your quickest pathway, your best investment. Knowledge is wealth. Modern society needs solid foundation, broad knowledge, and comprehensive quality of compound talents. It is our goal that you study for a short

time but can study efficiently. At present, thousands of candidates have successfully passed the HPE7-A08 Exam with less time input. In fact, there is no point in wasting much time on invalid input. As old saying goes, all work and no play makes jack a dull boy. Our HPE7-A08 certification materials really deserve your choice. Contact us quickly. We are waiting for you.
