### Fortinet FCP\_FML\_AD-7.4 認定試験の出題範囲:

| トピック   | 出題範囲                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| トピック 1 | <ul style="list-style-type: none"><li>• Server Mode and Transparent Mode: This section of the exam measures skills of a Network Security Administrator and explains how to deploy and manage FortiMail in different operation modes. It includes configuring server mode to handle mail directly and deploying FortiMail in transparent mode where it acts as a gateway to filter email traffic without altering the existing mail infrastructure.</li></ul> |
| トピック 2 | <ul style="list-style-type: none"><li>• Email Security: This section of the exam measures skills of a Network Security Administrator and deals with implementing security controls to filter and manage email threats. Candidates must configure session-based filtering, spam detection methods, malware protection, APT mitigation, and content filtering. The section also includes email archiving configurations for compliance and storage.</li></ul>  |

|        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| トピック 3 | <ul style="list-style-type: none"> <li>• Encryption: This section of the exam measures skills of a Messaging Security Engineer and addresses the implementation of encryption methods in FortiMail. It covers traditional SMTP encryption and identity-based encryption (IBE). Candidates are expected to configure these technologies and manage IBE users for secure email communication.</li> </ul>                                                                                            |
| トピック 4 | <ul style="list-style-type: none"> <li>• Initial Deployment and Basic Configuration: This section of the exam measures skills of a Network Security Administrator and covers the foundational setup of FortiMail. It includes understanding SMTP and email flow, performing initial configurations such as selecting operation mode, system settings, and defining protected domains. It also involves deploying FortiMail in high-availability clusters to ensure service continuity.</li> </ul> |
| トピック 5 | <ul style="list-style-type: none"> <li>• Email Flow and Authentication: This section of the exam measures skills of a Messaging Security Engineer and focuses on configuring FortiMail to handle email flow securely. It includes enabling and matching authentication protocols, setting up secure MTA features, and implementing access control, IP policies, and recipient-based policies to control mail delivery and security.</li> </ul>                                                    |

## FCP\_FML\_AD-7.4資格問題集、FCP\_FML\_AD-7.4復習時間

毎年のFCP\_FML\_AD-7.4試験問題は、テストの目的に基づいてまとめられています。すべての回答はテンプレートであり、2つのパートの主観的および客観的なFCP\_FML\_AD-7.4試験があります。この目的のために、認定試験のFCP\_FML\_AD-7.4トレーニング資料では、問題解決スキルを要約し、一般的なテンプレートを紹介しています。ユーザーは、提供された回答テンプレートに基づいて回答をスカウトし、スコアをスカウトできます。そのため、ユニバーサルテンプレートは、ユーザーがFCP\_FML\_AD-7.4試験を勉強して合格するための貴重な時間を大幅に節約できます。

## Fortinet FCP - FortiMail 7.4 Administrator 認定 FCP\_FML\_AD-7.4 試験問題 (Q34-Q39):

### 質問 #34

| Access Control Rule   |                                     |
|-----------------------|-------------------------------------|
| Status                | <input checked="" type="checkbox"/> |
| Sender                | User Defined                        |
| Recipient             | User Defined                        |
| Source                | IP/Netmask<br>0.0.0.0/0             |
| Reverse DNS pattern   | *                                   |
| Authentication status | Any                                 |
| TLS profile           | --None--                            |
| Action                | Reject                              |
| Comment               |                                     |

Refer to the exhibits, which show a topology diagram (Topology) and a configuration element (Access Control Rule.) An administrator wants to configure an access receive rule to match authentication status on FML-1 for all outbound email from the example. co- domain.

Which two access receive rule settings must the administrator configure? (Choose two.)

- A. A TLS profile must be configured and applied.
- B. The Sender IP/netmask must be set to 10.29.1.0/24.
- C. The Authentication status must be set to Authenticated
- D. The Recipient pattern must be set to \*@example. com

正解: C、D

### 質問 # 35

An organization has different groups of users with different needs in email functionality, such as address book access, mobile device access, email retention periods, and disk quotas.

Which FortiMail feature specific to server mode can be used to accomplish this?

- A. Domain-level service settings
- B. Email group profiles
- C. Access profiles
- D. Resource profiles

正解: D

解説:

In FortiMail's server mode, Resource Profiles let you group mailboxes by things like disk-quota limits and message-retention periods, while corresponding Access Profiles control services such as address-book and mobile (ActiveSync) access. By defining different resource profiles for each user class, you can give each group its own quota and retention settings (and pair them with matching access profiles for service access).

### 質問 # 36

Refer to the exhibit, which shows the output of an email transmission using a telnet session.

```
220 mx.internal.lab ESMTP Smtpd
EHLO 10.0.1.10
250-mx.internal.lab Hello [10.0.1.10]
250-SIZE 10485760
250-DSN
250-AUTH LOGIN PLAIN DIGEST-MD5 CRAM-MD5
MAIL FROM: <extuser@external.lab>
250 2.1.0 <extuser@external.lab>... Sender ok
RCPT TO: <user1@internal.lab>
250 2.1.5 <user1@internal.lab>... Recipient ok
DATA
354 Enter mail, end with "." on a line by itself
From: External User 1 <extuser@external.lab>
To: Mail User 1 <user1@internal.lab>
Date: 30 Jan 2024 12:24:54 +0100
Subject: Hello, World!
The quick brown fox jumped over the lazy dog.
.
250 Message accepted for delivery
QUIT
221 mx.internal.lab closing connection
```

What are two correct observations about this SMTP session? (Choose two.)

- A. The "Subject" is part of the message header.
- B. The SMTP envelope addresses are different from the message header addresses.
- C. The "220 mx. internal, lab ESMTPSmtpd" message is part of the SMTP banner.
- D. The "250 Message accepted for delivery" message is part of the message body.

正解: A、C

### 質問 # 37

A mail user wants the ability to subscribe or publish to and from their FortiMail calendar using Thunderbird as their mail user agent (MUA). What information does this mail user need from their webmail User Preferences section?

- A. Message tags
- B. Service URLs
- C. Free busy URL
- D. Secondary account configurations

正解: D

### 質問 # 38

Which SMTP command lists the supported SMTP service extensions of the recipient MTA?

- 正解: C

The EHLO command (Extended HELO) prompts the recipient MTA to respond with a list of all supported SMTP service extensions, enabling the sender to use features like SMTP authentication, pipelining, and STARTTLS.
