Our C_BCBAl_2509 Guide materials provide such a learning system where you can improve your study efficiency to a great extent.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q46-Q51):

NEW QUESTION # 46

Match the key personas of an organization to the impact of SAP Business AI on their organization.

- A. Chief Procurement Officer (CPO) → Improve sourcing, forecasting disruptions, and managing suppliers
- B. Chief Human Resources Officer (CHRO) → Enhance hiring, developing employees, and streamlining HR agility
- C. Chief Financial Officer (CFO) → Improve financial efficiency, forecasting, and managing risk
- D. Chief Information Officer / CTO (CIO/CTO) → Integrate seamlessly with current technological infrastructure in a secure way

Answer: A,B,C,D

Explanation:

SAP Business AI delivers tailored impacts for key organizational personas, as outlined in SAP documentation. For the Chief Human Resources Officer (CHRO), AI enhances hiring, employee development, and HR agility through predictive analytics and automation in SAP SuccessFactors. The Chief Procurement Officer (CPO) benefits from improved sourcing, disruption forecasting, and supplier management via AI-driven insights in SAP Ariba. The Chief Information Officer/CTO (CIO/CTO) leverages seamless integration with existing infrastructure, ensuring secure and scalable AI adoption across SAP systems. The Chief Financial Officer (CFO) gains improved financial efficiency, forecasting, and risk management through AI-enhanced analytics in SAP S/4HANA. These persona-specific benefits demonstrate SAP Business AI's ability to drive value across diverse roles.

NEW QUESTION # 47

Match the outcomes in the dropdown lists to the capabilities of Joule

Enable every employee to achieve more in a faster way.

SAP
Make every customer touchpoint count. ®

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Answer:

Explanation:

Get the insights you need, when you need them.

Make every customer touchpoint count.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

Increased workforce productivity, fewer operational errors, and quicker task completion
Higher NPS, better conversion rates, and stronger customer retention
Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

NEW QUESTION # 48

Match the SAP LeanIX activities in the dropdown lists to the SAP Activate phases.

	Discover	Explore	Realize	Prepare	Deploy
Discover	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously
Realize	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously
Run	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously	Achieve architecture transparency Support business case creation Define target architecture Define transformation roadmap Track architecture transformation Improve architecture continuously

Answer:

Explanation:

SAP Activate Phases and LeanIX Activities

SAP Activate Phase	LeanIX Activity
Discover	Achieve architecture transparency
Prepare	Support business case creation
Explore	Define target architecture
Realize	Define transformation roadmap
Deploy	Track architecture transformation
Run	Improve architecture continuously

NEW QUESTION # 49

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Reduce sales outstanding
- B. Generate creative accounting solutions
- C. Guard against fraud

- D. Simplify error resolution
- E. Enforce compliance

Answer: C,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com "Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C_BCBAl_2502 certification materials.

NEW QUESTION # 50

Which tool in the Integrated Tolchhain is specifically intended to give organizations a consolidated view of their enterprise architecture and IT landscape?

- A. SAP Cloud ALM
- B. SAP Joule for Developers
- C. SAP Signavio
- D. SAP LeanIX

Answer: D

NEW QUESTION # 51

.....
