企業IT治理認證（CGEIT）考試是IT專業人員的全球認可認證，負責管理、諮詢並提供對組織IT治理的保證。CGEIT考試旨在驗證候選人在IT治理、風險管理和合規性方面的知識和技能。考試涵蓋廣泛的主題，包括IT治理框架，戰略對齊，價值交付，風險管理，資源管理和績效測量。

CGEIT認證適用於負責企業IT（EGIT）的治理和管理的專業人士。這包括C級高管、IT經理、領導者、董事以及其他在組織中擔任戰略角色的IT專家，例如開發、管理和審計IT流程、政策、程序和實踐。該認證賦予專業人士必要的知識和技能，以在組織的IT資產成功治理方面做出顯著貢獻。

要參加CGEIT考試，候選人必須至少擁有五年IT治理、風險管理和控制方面的經驗，其中至少一年在企業級別管理IT資源的經驗。候選人還必須遵守ISACA職業道德標準並成功通過CGEIT考試。該考試由150道多選題組成，考試時間為四個小時。總的來說，CGEIT考試對於希望在IT治理和管理方面推進職業生涯的專業人士來說是一項具有挑戰性但值得的認證。

最新的 Isaca Certificaton CGEIT 免費考試真題 (Q358-Q363):

問題 #358

Which of the following architecture domains for TOGAF describes the structure of an organization's logical and physical data assets and the associated data management resources?

- A. Technical architecture

- B. Data architecture
- C. Applications architecture
- D. Business architecture

答案： B

問題 #359

Which of the following is the PRIMARY role of the governance function in enabling an enterprise to achieve its business objectives?

- A. Providing a means to effectively manage stakeholders
- B. Preparing business continuity and resiliency plans
- C. Monitoring strategic plans to reach the desired target state
- D. Determining risk thresholds that the enterprise can sustain

答案： C

問題 #360

An enterprise is planning a change in business direction. As a result, IT risk will significantly increase. Which of the following should be the GO'S FIRST course of action?

- A. Report the risk to executive management
- B. Plan for the corresponding IT reorganization.
- C. Recommend delaying the business change.
- D. Implement IT changes to align with the plan.

答案： A

問題 #361

Which of the following MUST be established before implementing an information architecture that restricts access to data based on sensitivity?

- A. Probability and impact analysis
- B. Classification and ownership
- C. Security and privacy policies
- D. Risk and control frameworks

答案： B

解題說明：

Before implementing an information architecture that restricts access to data based on sensitivity, the enterprise must establish the classification and ownership of the data. Classification is the process of tagging data according to its type, sensitivity, and value to the organization if altered, stolen, or destroyed. It helps the organization understand the risk and impact of data breaches and comply with relevant regulations.

Ownership is the process of assigning roles and responsibilities for data creation, maintenance, protection, and disposal. It helps the organization ensure accountability and governance of data throughout its lifecycle

問題 #362

Which of the following is a non repetitive set of tasks that lead to the achievement of a new objective?

- A. Plan
- B. Techniques
- C. Tactics
- D. Strategy

答案： A
