Reliable 350-701 Test Bootcamp & Hottest 350-701 Certification

We try to meet different requirements by setting different versions of our 350-701 question dumps. The first one is online 350-701 engine version. As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on. You can practice online anytime and check your test history and performance review, which will do help to your study. The second is 350-701 Desktop Test Engine. As an installable 350-701 software application, it simulated the real 350-701 exam environment, and builds 200-125 exam confidence. The third one is Practice PDF version. PDF Version is easy to read and print. So you can study anywhere, anytime.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q519-Q524):

NEW QUESTION # 519
A security engineer must add destinations into a destination list in Cisco Umbrella. What describes the application of these changes?

- A. The destination list must be removed from the policy before changes are made to It.
- B. The user role of Block Page Bypass or higher is needed to perform these changes.
- C. The changes are applied immediately it the destination list is part or a policy.
- D. The changes are applied only after the configuration is saved in Cisco Umbrella.

Answer: C

Explanation:

A destination list is a list of internet destinations: domains, URLs, and CIDRs. To control identity access to specific destinations, you can add destination lists to Umbrella and then select them when configuring your Web and DNS policies12. When you add or edit a destination list, the changes are applied immediately if the destination list is part of a policy3. This means that any identities that are associated with the policy will be affected by the changes in the destination list. You do not need to save the configuration or remove the destination list from the policy to apply the changes. However, you do need to have the appropriate user role to manage destination lists. The user role of Block Page Bypass or higher is needed to perform these changes4. References ≔

NEW QUESTION # 520
An organization is implementing URL blocking using Cisco Umbrella. The users are able to go to some sites but other sites are not accessible due to an error. Why is the error occurring?

- A. Client computers do not have an SSL certificate deployed from an internal CA server.
- B. IP-Layer Enforcement is not configured.
- C. Client computers do not have the Cisco Umbrella Root CA certificate installed.
- D. Intelligent proxy and SSL decryption is disabled in the policy

Answer: C

Explanation:
Explanation:
Other features are dependent on SSL Decryption functionality, which requires the Cisco Umbrella root certificate. Having the SSL Decryption feature improves:
Custom URL Blocking-Required to block the HTTPS version of a URL.
...
Umbrella's Block Page and Block Page Bypass features present an SSL certificate to browsers that make connections to HTTPS sites. This SSL certificate matches the requested site but will be signed by the Cisco Umbrella certificate authority (CA). If the CA is not trusted by your browser, an error page may be displayed.
Typical errors include "The security certificate presented by this website was not issued by a trusted certificate authority" (Internet Explorer), "The site's security certificate is not trusted!" (Google Chrome) or
"This
Connection is Untrusted" (Mozilla Firefox). Although the error page is expected, the message displayed can be confusing and you may wish to prevent it from appearing.
To avoid these error pages, install the Cisco Umbrella root certificate into your browser or the browsers of your users-if you're a network admin.

NEW QUESTION # 522

Drag and drop the deployment models from the left onto the explanations on the right.

routed		A GRE tunnel is utilized in this solution.
(CISCO) passive		This solution allows inspection between hosts on the same subnet.
(CISCO) passive with ERSPAN		Attacks are not prevented with this solution.
transparent		This solution does not provide filtering between hosts on the same subnet.

Answer:

Explanation:

routed	(CISCO) passive
passive	routed
passive with ERSPAN	passive with ERSPAN
transparent	transparent

passive
routed
passive with ERSPAN
transparent (CISCO)
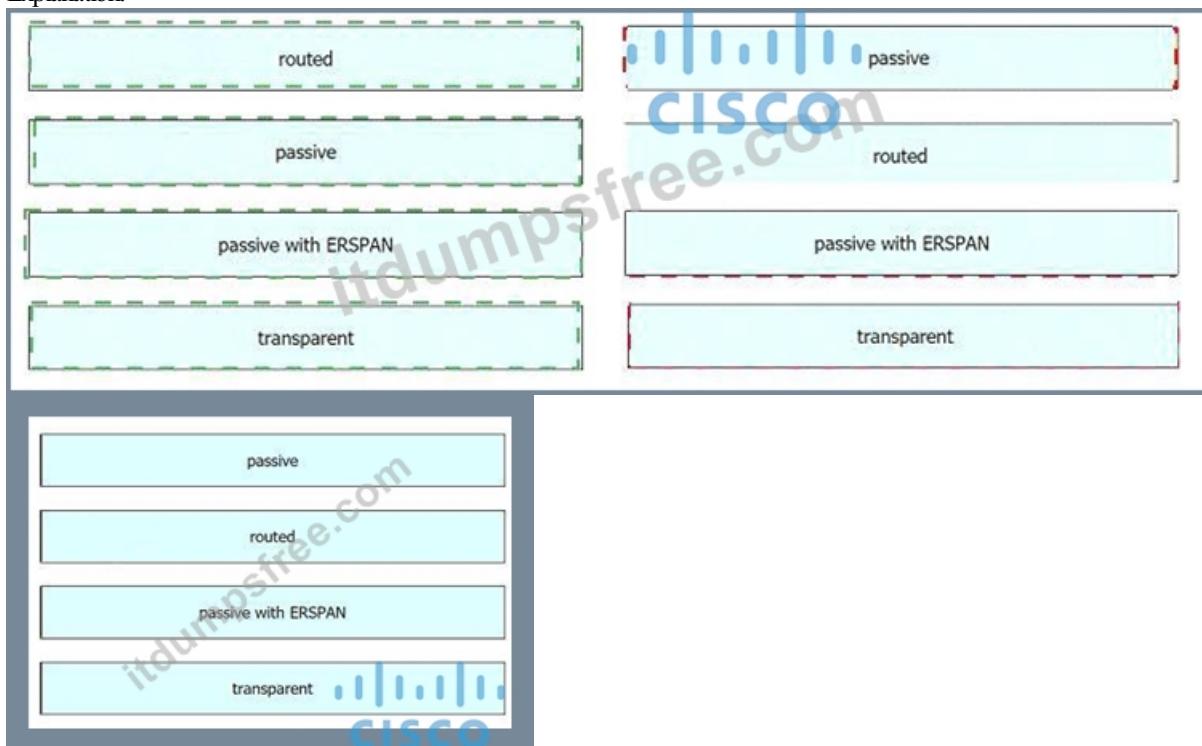

NEW QUESTION # 523

Due to a traffic storm on the network, two interfaces were error-disabled, and both interfaces sent SNMP traps.
Which two actions must be taken to ensure that interfaces are put back into service? (Choose two)

- A. Have Cisco Prime Infrastructure issue an SNMP set command to re-enable the ports after the preconfigured interval.
- B. Ensure that interfaces are configured with the error-disable detection and recovery feature
- C. Use EEM to have the ports return to service automatically in less than 300 seconds.
- D. Enter the shutdown and no shutdown commands on the interfaces.
- E. Enable the snmp-server enable traps command and wait 300 seconds

Answer: B,D

Explanation:
Explanation:
You can also bring up the port by using these commands:
+ The "shutdown" interface configuration command followed by the "no shutdown" interface configuration command restarts the disabled port.
+ The "errdisable recovery cause ..." global configuration command enables the timer to automatically recover error-disabled state,

and the "errdisable recovery interval interval" global configuration command specifies the time to recover error-disabled state.

NEW QUESTION # 524

......

For candidates who will attend the exam, some practice is quite necessary. Our 350-701 training materials contain both questions and answers, and you can have a quickly check after practicing. 350-701 training materials cover most knowledge points for the exam, and you can have a good command of the exam if you choose us. Besides, in the process of ing, you professional ability will also be improved. We offer you free update for 365 days if you buying 350-701 Exam Dumps from us. And the latest version will be sent to your email automatically.
