

JN0-452 Exam Materials & New JN0-452 Exam Questions

BONUS!!! Download part of TestPassed JN0-452 dumps for free: <https://drive.google.com/open?id=1Syzjs8q6-aKHMgIebS44xLsL3zpEJIYB>

The JN0-452 examination certification, as other world-renowned certification, will get international recognition and acceptance. People around the world prefer JN0-452 exam certification to make their careers more strengthened and successful. In TestPassed, you can choose the products which are suitable for your learning ability to learn.

The accuracy rate of TestPassed JN0-452 exam certification training materials is high with wide coverage. It not only can improve your cultural knowledge, but also improve your operation level. It not only makes you become IT elite, but also make you have a well-paid job that others admire. Before buying our JN0-452 Certification Training materials, you can download JN0-452 free demo and answers on probation on TestPassed website.

New JN0-452 Exam Questions | Premium JN0-452 Exam

Some people are inclined to read paper materials. Do not worry. Our company has already taken your thoughts into consideration. Our PDF version of the JN0-452 practice materials support printing on papers. All contents of our JN0-452 Exam Questions are arranged reasonably and logically. In addition, the word size of the JN0-452 study guide is suitable for you to read. And you can take it conveniently.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q114-Q119):

NEW QUESTION # 114

You must define VLANs as untagged, tagged, or using VLAN pooling.
In this scenario, where would you accomplish this task in the Juniper Mist UI?

- A. organization settings
- B. site settings
- C. policy settings
- D. WLAN settings

Answer: D

NEW QUESTION # 115

Click the Exhibit button.

Referring to the exhibit, in the USA, which two statements are correct? (Choose two.)

- A. The WLAN with SSID Eero1234 is configured to industry best practices.
- B. The WLAN with SSID NETGEAR24 is not configured to industry best practices.
- C. The WLAN with SSID Eero1234 is not configured to industry best practices.
- D. The WLAN with SSID NETGEAR24 is configured to industry best practices.

Answer: C,D

Explanation:

Referring to the exhibit and considering that it is in the USA, the WLAN with SSID Eero1234 is not configured to industry best practices while the WLAN with SSID NETGEAR24 is configured to industry best practices.

NEW QUESTION # 116

Referring to the exhibit, what is the site ID?

□

- A. 978c48e6-6ef6-11e6-8bbf-02e208b2d34f
- B. 02e208b2d34f
- C. 9777c1a0-6ef6-11e6-8bbf-02e208b2d34
- D. 02e208b2d34

Answer: A

Explanation:

Reference: <https://www.mist.com/documentation/find-org-site-id/>

NEW QUESTION # 117

A Mist AP is placed on the floorplan in the UI, but its orientation is incorrect, causing location accuracy issues. What AP setting needs to be adjusted?

- A. The AP height
- B. The AP's channel assignment
- C. The AP's rotation or direction
- D. The AP's transmit power

Answer: C

NEW QUESTION # 118

Which pair of Wireless Assurance SLEs have a classifier on DHCP?

- A. Coverage and Throughput
- B. Roaming and Coverage
- C. Successful Connects and Time to Connect
- D. Time to Connect and Roaming

Answer: C

Explanation:

In Juniper Networks Mist AI Wireless, Service Level Expectations (SLEs) are used to measure and assure real user experience across the wireless network. Each SLE is built on specific classifiers, which break down failures into root causes such as DHCP, DNS, authentication, RF conditions, or application issues.

Understanding which SLEs rely on DHCP classification is essential for accurate troubleshooting.

The two Wireless Assurance SLEs that include a DHCP classifier are Successful Connects and Time to Connect.

The Successful Connects SLE measures whether client devices are able to complete the full connection process successfully. This process includes association, authentication, and critically, DHCP address assignment. If a client fails to obtain an IP address, the connection is considered unsuccessful, and the failure is explicitly classified as a DHCP issue within this SLE.

The Time to Connect SLE measures how long it takes for a client to connect from the moment it initiates association until it is fully usable on the network. One of the key components of this timeline is the DHCP transaction time. Slow DHCP responses, retransmissions, or server delays directly increase the overall connection time, and Mist classifies these delays under DHCP within the Time to Connect SLE.

The other options are incorrect for the following reasons:

* Roaming SLE focuses on re-association, authentication, and mobility events, not DHCP, since IP addressing is typically retained during roaming.

* Coverage SLE evaluates RF signal strength, SNR, and cell overlap, with no dependency on DHCP.

* Throughput SLE measures data transfer performance after connectivity is established and does not analyze DHCP behavior.

Therefore, the correct answer is Successful Connects and Time to Connect, as both SLEs directly depend on and classify DHCP-related performance and failures within Mist Wireless Assurance.

NEW QUESTION # 119

.....

A second format is a JN0-452 web-based practice exam that can take for self-assessment. However, it differs from desktop-based JN0-452 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Juniper JN0-452 web-based practice exam does not require any other plugins. You can take this JN0-452 self-assessment test on Windows, iOS, Linux, Mac, and Android. It also includes all of the functionalities of desktop JN0-452 software and will assist you in passing the JN0-452 certification test.
