## Best Exam Materials HashiCorp Terraform-Associate-003 Study Guide are useful for you - ExamsTorrent

Once you have any questions about our Terraform-Associate-003 actual exam, you can contact our staff online or send us an email. We have a dedicated all-day online service to help you solve problems. Before purchasing, you may be confused about what kind of Terraform-Associate-003 guide questions you need. You can consult our staff online. After the consultation, your doubts will be solved and you will choose the Terraform-Associate-003 Learning Materials that suit you. Our online staff is professionally trained and they have great knowledge on the Terraform-Associate-003 exam questions to help you pass the Terraform-Associate-003 exam.

# HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q142-Q147):

## NEW QUESTION # 142
Terraform configuration can only call modules from the public registry.

- A. True
- B. False

**Answer: B**

Explanation:
Terraform can call modules from various sources including the public Terraform Registry, private registries, local file paths, or version control systems like GitHub.
Reference:
Terraform Modules

## NEW QUESTION # 143
What command can you run to generate DOT (Graphviz) formatted data to visualize Terraform dependencies?

- A. terraform show
- B. terraform refresh
- C. terraform output
- D. terraform graph

**Answer: D**

Explanation:
* terraform graph generates Graphviz DOT format output, which allows visualization of resource dependencies in Terraform.
* A (terraform refresh) - Incorrect, as it only updates the state file.
* C (terraform output) - Incorrect, as it only displays Terraform output values.
* D (terraform show) - Incorrect, as it only displays the Terraform state.
Official Terraform Documentation Reference:
terraform graph - HashiCorp Documentation

## NEW QUESTION # 144
How could you reference an attribute from the vsphere_datacenter data source for use with the datacenter_id argument within the vsphere_folder resource in the following configuration?

- A. Data.vsphere_datacenter.DC.id

- B. Data,dc,id
- C. Vsphere_datacenter.dc.id
- D. Data.vsphere_datacenter,dc

**Answer: A**

Explanation:
The correct way to reference an attribute from the vsphere_datacenter data source for use with the datacenter_id argument within the vsphere_folder resource in the following configuration is data.vsphere_datacenter.dc.id. This follows the syntax for accessing data source attributes, which is data.TYPE.NAME.ATTRIBUTE. In this case, the data source type is vsphere_datacenter, the data source name is dc, and the attribute we want to access is id. The other options are incorrect because they either use the wrong syntax, the wrong punctuation, or the wrong case.
References = [Data Source: vsphere_datacenter], [Data Source: vsphere_folder], [Expressions: Data Source References]

## NEW QUESTION # 145
The_____determines how Terraform creates, updates, or delete resources.

- A. Terraform core
- B. Terraform provisioner
- C. Terraform provider
- D. Terraform configuration

**Answer: C**

Explanation:
Explanation
This is what determines how Terraform creates, updates, or deletes resources, as it is responsible for understanding API interactions with some service and exposing resources and data sources based on that API.

## NEW QUESTION # 146
A provider configuration block is required in every Terraform configuration.
Example:

- A. True
- B. False

**Answer: B**

Explanation:
A provider configuration block is not required in every Terraform configuration. A provider configuration block can be omitted if its contents would otherwise be empty. Terraform assumes an empty default configuration for any provider that is not explicitly configured. However, some providers may require some configuration arguments (such as endpoint URLs or cloud regions) before they can be used. A provider's documentation should list which configuration arguments it expects. For providers distributed on the Terraform Registry, versioned documentation is available on each provider's page, via the "Documentation" link in the provider's header1.
References = [Provider Configuration]1

## NEW QUESTION # 147
......

Once you have selected the Terraform-Associate-003 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the Terraform-Associate-003 study materials. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the Terraform-Associate-003 study materials. The whole payment process only lasts a few seconds as long as there has money in your credit card. Then our system will soon deal with your orders according to the sequence of payment. Usually, you will receive the Terraform-Associate-003 Study Materials no more than five minutes. Then you can begin your new learning journey of our study materials. All in all, our payment system and delivery system are highly efficient.
