EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q222-Q227):

NEW QUESTION # 222

Which of the following indicators refers to potential risk exposures that attackers can use to breach the security of an organization?

- A. Key risk indicators
- B. Indicators of attack
- C. Indicators of compromise
- **D. Indicators of exposure**

Answer: D

NEW QUESTION # 223

CSMA/CD is specified in which of the following IEEE standards?

- A. 802.2
- B. 802.15
- C. 802.1
- **D. 802.3**

Answer: D

NEW QUESTION # 224

Which of the following tools scans the network systems for well-known and often exploited vulnerabilities?

- A. SAINT
- B. HPing
- **C. SATAN**
- D. Nessus

Answer: C

NEW QUESTION # 225

What is the response of an Xmas scan if a port is either open or filtered?

- A. FIN
- B. RST
- **C. No response**
- D. PUSH

Answer: C

NEW QUESTION # 226

Tom works as a network administrator in a multinational organization having branches across North America and Europe. Tom wants to implement a storage technology that can provide centralized data storage and provide free data backup on the server. He should be able to perform data backup and recovery more efficiently with the selected technology. Which of the following storage technologies best suits Tom's requirements?

- **A. NAS**
- B. RAID
- C. PAS

- Answer: A**

Network-attached storage (NAS) is the most suitable technology for Tom's requirements. NAS systems are designed to provide centralized data storage, allowing multiple clients or computers to access the same storage space. This centralization simplifies data management, protection, and backup. NAS systems typically include features that support efficient data backup and recovery, such as automatic backup to other devices and fault tolerance through RAID configurations. Unlike direct-attached storage (DAS), which is limited to one user at a time, NAS allows multiple users to access the storage simultaneously, making it ideal for a multinational organization with dispersed teams. NAS also offers remote data availability, which is beneficial for Tom's organization that spans across different regions.
