Our AP-201 Exam Quiz will offer you the best help. And our AP-201 training material will never let you down.

Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which field type cannot be added as a Searchable field?

- A. Text Area
- B. Currency
- C. Picklist
- D. Text
- E. Formula

Answer: E

Explanation:

The field type that cannot be added as a Searchable field is C. Formula. Formula fields are calculated fields that do not store data themselves but rather display data based on the formula's logic and the values of other fields. Due to their dynamic nature and lack of stored data, they cannot be indexed or made searchable like other static field types.

NEW QUESTION # 116

Which two places can an Administrator go to set up Variation products using the B2B Commerce App's navigation menu?

- A. Catalogs

- B. Product Workspace
- C. Commerce Setup
- D. Products
- E. Entitlement Policies

Answer: B,D

Explanation:

To set up Variation products in Salesforce B2B Commerce, an Administrator can navigate to Product Workspace (A) and Products (B) within the B2B Commerce App's navigation menu. The Product Workspace provides a comprehensive area for managing individual products and their variations, allowing for detailed configuration of product attributes and relationships. The Products section offers a broader view of all products, including the ability to access and manage variation relationships. While Catalogs (C), Entitlement Policies (D), and Commerce Setup (E) are important for overall store configuration, they are not the primary locations for setting up product variations.

NEW QUESTION # 117

An Administrator is trying to figure out what steps remain before their store can be deployed. They have completed assigning a Catalog to the Store and assigning Buyer Groups to the Store.

Which two steps must the administrator complete as part of the Store setup wizard?

- A. Assign Price Books to a store
- B. Load shipping costs
- C. Load tax rates
- D. Build the search index
- E. Configure checkout flow

Answer: A,E

Explanation:

As part of the Store setup wizard, the remaining steps the Administrator must complete include:

B) Assign Price Books to a store: This ensures that the correct pricing is applied to products within the store.

E) Configure checkout flow: This involves setting up the steps and processes that customers will go through during checkout, including payment and shipping options.

Completing these steps ensures that the store is fully functional and ready for deployment, providing a seamless shopping experience for customers.

NEW QUESTION # 118

An Administrator needs to support a unique use case with an exclusive line of products. Only certain stores designated as "premier" status should contain an exclusive list of products. All of the other products outside of the exclusive product line should be available in all stores.

Is it possible to support this use case of store-specific products in B2B Commerce?

- A. Yes. This is supported by the B2B Commerce data model.
- B. No. The data model does not support this type of configuration.
- C. Yes. There is an exclusive line checkbox on the Product entity which supports this scenario.
- D. No. The products must be filtered with custom code.

Answer: A

Explanation:

Supporting store-specific products, including an exclusive line of products for "premier" status stores, is supported by the B2B Commerce data model (C). This capability allows for the configuration of product availability and visibility based on store status or other criteria, enabling differentiated product offerings across various store types.

NEW QUESTION # 119

An Administrator wants to change the layout of search results and category detail pages.

Which two options are available out-of-the-box?

- A. List
- B. Grid
- C. Tree
- D. Chart
- E. Matrix

Answer: A,B

Explanation:

To change the layout of search results and category detail pages in Salesforce B2B Commerce, two out-of-the-box options available are D. List and E. Grid. These layout options allow administrators to present products in a structured list or a grid format, enhancing the user experience by providing clear and organized views of products.

NEW QUESTION # 120

.....
