

2026 Trustable 1z0-1080-25 Braindump Pdf | 100% Free

New 1z0-1080-25 Test Braindumps

BONUS!!! Download part of RealValidExam 1z0-1080-25 dumps for free: <https://drive.google.com/open?id=1BCr2cDafMTsdxDmmdqabwl70-xjsIIDG>

On the one hand, Oracle Planning 2025 Implementation Professional test torrent is revised and updated according to the changes in the syllabus and the latest developments in theory and practice. On the other hand, a simple, easy-to-understand language of 1z0-1080-25 test answers frees any learner from any learning difficulties - whether you are a student or a staff member. These two characteristics determine that almost all of the candidates who use 1z0-1080-25 Guide Torrent can pass the test at one time. This is not self-determination. According to statistics, by far, our 1z0-1080-25 guide torrent has achieved a high pass rate of 98% to 99%, which exceeds all others to a considerable extent. At the same time, there are specialized staffs to check whether the Oracle Planning 2025 Implementation Professional test torrent is updated every day.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 2	<ul style="list-style-type: none">• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.

Topic 3	<ul style="list-style-type: none"> • Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 4	<ul style="list-style-type: none"> • Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 5	<ul style="list-style-type: none"> • This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 6	<ul style="list-style-type: none"> • Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 7	<ul style="list-style-type: none"> • Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 8	<ul style="list-style-type: none"> • Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 9	<ul style="list-style-type: none"> • Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 10	<ul style="list-style-type: none"> • Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 11	<ul style="list-style-type: none"> • Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 12	<ul style="list-style-type: none"> • Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 13	<ul style="list-style-type: none"> • Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 14	<ul style="list-style-type: none"> • Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 15	<ul style="list-style-type: none"> • Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 16	<ul style="list-style-type: none"> • Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 17	<ul style="list-style-type: none"> • Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 18	<ul style="list-style-type: none"> • Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 19	<ul style="list-style-type: none"> • Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 20	<ul style="list-style-type: none"> • Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.

Topic 21	<ul style="list-style-type: none"> • Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 22	<ul style="list-style-type: none"> • Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 23	<ul style="list-style-type: none"> • Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 24	<ul style="list-style-type: none"> • Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 25	<ul style="list-style-type: none"> • Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 26	<ul style="list-style-type: none"> • Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 27	<ul style="list-style-type: none"> • Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 28	<ul style="list-style-type: none"> • Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 29	<ul style="list-style-type: none"> • Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.

New 1z0-1080-25 Test Braindumps & Exam 1z0-1080-25 Format

No doubt Oracle 1z0-1080-25 exam practice test questions are the recommended Oracle Planning 2025 Implementation Professional 1z0-1080-25 exam preparation resources that make the Oracle 1z0-1080-25 exam preparation simple and easiest. To do this you need to download updated and real 1z0-1080-25 exam questions which you can get from the RealValidExam platform easily. At the RealValidExam you can easily download valid, updated, and real 1z0-1080-25 Exam Practice questions. All these Oracle 1z0-1080-25 PDF Dumps are verified and recommended by qualified Oracle 1z0-1080-25 exam trainers. So you rest assured that with the Oracle 1z0-1080-25 exam real questions you will get everything that you need to prepare, learn and pass the difficult Oracle 1z0-1080-25 exam with confidence.

Oracle Planning 2025 Implementation Professional Sample Questions (Q72-Q77):

NEW QUESTION # 72

Which set of steps do you perform to enable each Planning module?

- A. Run pre-configuration tasks, enable the module, and configure the module.
- **B. Enable the module, configure the module, and run post-configuration tasks.**
- C. Configure the module and refresh the database.
- D. Enable the module and refresh the database.

Answer: B

NEW QUESTION # 73

What feature can Service Administrators use to automatically complete all the actions required to create an exact copy of the current

application in a target environment?

This includes the removal of the current application and data, if any, from the target environment.

- A. Replicate Snapshot
- B. Migration Backup
- C. Migration Export
- **D. Clone Snapshot**

Answer: D

Explanation:

In Oracle Planning 2024, Service Administrators can use the Clone Snapshot feature to create an exact copy of the current application in a target environment. This feature automates all actions required for cloning, including removing the existing application and data in the target environment (if any) and replacing it with a snapshot of the source environment. The process involves exporting a snapshot from the source, deleting the target environment's current application and data, and then importing and applying the snapshot to recreate the application identically.

* A. Replicate Snapshot: This is incorrect because "Replicate Snapshot" is not a defined feature in Oracle Planning. Replication typically implies duplicating data without necessarily overwriting the target, which doesn't align with the requirement of removing existing content.

* B. Migration Export: This is incorrect because Migration Export only exports application artifacts (e.g., metadata, data) to a file for manual transfer or backup, but it does not automate the removal of the target environment's content or the import process.

* C. Clone Snapshot: This is correct. The Clone Snapshot feature, available under the Environment management tools, fully automates the cloning process, including deletion of the target environment's application and data, followed by the recreation of the source application.

* D. Migration Backup: This is incorrect because Migration Backup creates a backup file for recovery purposes but does not involve cloning or overwriting a target environment.

The Oracle Planning 2024 documentation specifies that Clone Snapshot is designed for such end-to-end automation, making it the ideal choice for Service Administrators to replicate an application across environments efficiently.

Oracle EPM Cloud Documentation: "Cloning Environments in Planning" (docs.oracle.com, Published 2023-10-20, updated for 2024).

NEW QUESTION # 74

You want to import data into your application. You import data from a file and want to save the import operation as a job. Which two statements are true about import data jobs?

- **A. Select the option to clear data before import.**
- **B. Upload your data file to the Inbox before running the Import Data job.**
- C. Reference a data file stored locally when creating the Import Data job.
- D. Include the path for the data file stored on the server.

Answer: A,B

Explanation:

In Oracle Planning 2024, importing data from a file and saving the operation as a job involves specific steps and options. The two true statements about Import Data jobs are:

* A. Reference a data file stored locally when creating the Import Data job: Incorrect. Oracle EPM Cloud does not allow referencing files stored locally on a user's machine for Import Data jobs. Files must be uploaded to the cloud environment (e.g., Inbox) for processing.

* B. Select the option to clear data before import: Correct. When configuring an Import Data job, you can choose to clear existing data in the target before importing new data. This option ensures a clean slate for the import, avoiding data duplication or overlap, and is a standard feature in the job setup.

* C. Upload your data file to the Inbox before running the Import Data job: Correct. Oracle requires that data files be uploaded to the Inbox (or another cloud storage location like the Outbox) before scheduling or running an Import Data job. The job then references this uploaded file for execution.

* D. Include the path for the data file stored on the server: Incorrect. While you specify a file name in the job definition, you do not manually include a server path. The system automatically manages file locations within the cloud environment (e.g., Inbox), and users select files from there, not via explicit server paths.

The documentation confirms that uploading the file to the Inbox and optionally clearing data are key aspects of setting up an Import Data job, making B and C the true statements.

References:

Oracle Planning 2024 Implementation Study Guide: "Importing Data and Creating Jobs" (docs.oracle.com, Published 2024-10-20).
Oracle EPM Cloud Documentation: "Managing Data Import Jobs" (docs.oracle.com, Published 2023-11-05, updated for 2024).

NEW QUESTION # 75

Which three features would you need to enable in order to perform indirect cash flow statement planning?

- A. Balance Sheet
- B. Income Statement
- C. Cash Flow Statement
- D. Revenue
- E. Expense

Answer: A,B,C

NEW QUESTION # 76

Which two can be used to push data between cubes?

- A. Data Integration
- B. Import Data
- C. Data Maps
- D. Copy Data

Answer: C,D

Explanation:

In Oracle Planning 2024, pushing data between cubes (e.g., from one cube to another within the same application) can be accomplished using specific tools. The two methods that facilitate this are:

* A. Data Integration: Incorrect. Data Integration is used to import data from external sources (e.g., files, other systems) into Planning, not to push data between cubes within the same application.

* B. Data Maps: Correct. Data Maps allow you to define mappings and push data between cubes (or applications) using Smart Push or manual execution. This is a primary method for intra-application data movement.

* C. Copy Data: Correct. The Copy Data feature enables administrators to copy data from one cube to another within the same Planning application, specifying dimensions and members to transfer.

* D. Import Data: Incorrect. Import Data is designed to bring external data into a cube from a file, not to push data between existing cubes.

Both Data Maps (with Smart Push for real-time updates) and Copy Data (for batch-style transfers) are explicitly supported for moving data between cubes, as per Oracle's documentation, making B and C the correct answers.

NEW QUESTION # 77

.....

The quality of our 1z0-1080-25 exam questions is very high and we can guarantee to you that you will have no difficulty to pass the exam. The content of the questions and answers of 1z0-1080-25 study braindumps is refined and focuses on the most important information. To let the clients be familiar with the atmosphere and pace of the real exam we provide the function of stimulating the exam. Our expert team updates the 1z0-1080-25 training guide frequently to let the clients practice more. Every detail of our 1z0-1080-25 learning prep is perfect.
