## Free PDF 2026 Valid HITRUST CCSFP: Latest Certified CSF Practitioner 2025 Exam Exam Practice

The passing rate of our CCSFP test torrent is high but if you fail in the exam we will refund you in full immediately. Some people may worry that the refund procedure is complicate but we guarantee to the client that the refund procedure is very simple. If only you provide the screenshot or the scanning copy of CCSFP exam failure marks list we will refund you immediately and the process is really simple. It is very worthy for you to buy our CCSFP Guide questions and we can help you pass the exam successfully. If you have any problems please contact us by the online customer service or the mails, and we will reply and solve your problem immediately.

### HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q25-Q30):

#### NEW QUESTION # 25

The A1 Security Assessment requirements can only be added to the r2 assessment type.

- A. True
- B. False

**Answer: B**

Explanation:

The A1 Security Assessment factor is an optional module that introduces requirements for evaluating the security and governance of AI-based systems. These requirements are mapped into HITRUST CSF across domains like risk management, monitoring, and governance. Importantly, the A1 factor is not restricted solely to r2 assessments. While r2 provides the most comprehensive assurance model, A1 can also be added to other eligible assessment types such as i1 when the scope involves AI risks. The factor is treated like any other regulatory or organizational factor in MyCSF-its selection generates additional tailored requirement statements. Therefore, the claim that A1 canonlybe added to r2 is inaccurate. The correct understanding is that A1 can apply tomultiple assessment types, depending on scoping decisions.

References:HITRUST CSF Extensions - A1 Security Assessment Factor; CCSFP Study Materials - "Emerging Risks & Add-On Factors."

#### NEW QUESTION # 26

For an r2 assessment, what is the minimum number of days an organization should wait before a new or updated Policy and/or Procedure can be reconsidered for testing?

- A. Immediately
- B. 60 Days
- C. 30 Days
- D. 90 Days

**Answer: C**

Explanation:

ForPolicy and Procedure maturity levels, HITRUST requires a minimum of30 daysbetween creation or updates and reconsideration for testing in an r2 assessment. This ensures that the policies and procedures are not just newly drafted but have beenapproved, communicated, and adoptedwithin the organization. Thirty days allows time for staffawareness, training, and initial application, which HITRUST views as necessary evidence of operationalization. Unlike Implementation maturity (which requires 90 days of operational evidence for reconsideration), documentation-based maturity levels require a shorter validation window. This distinction reflects the

difference between proving written governance documents exist versus proving operational controls function consistently.  
References: HITRUST Assurance Program - "Retesting Policies and Procedures"; CCSFP Study Guide - "30- Day Rule for Policy and Procedure."

#### NEW QUESTION # 27

Which assessment type allows users to select any HITRUST authoritative source?

- A. e1 Assessment
- B. Validated Assessment
- C. None of the above
- D. r2 Assessment
- E. Readiness Assessment

**Answer: E**

Explanation:

The Readiness Assessment is designed to give organizations flexibility when evaluating their security and compliance posture. Unlike validated assessments, which are bound by specific methodologies, thresholds, and QA requirements, the readiness format allows entities to scope assessments more freely. This includes the ability to select any HITRUST authoritative source, such as HIPAA, PCI-DSS, NIST, ISO, or GDPR, for self-assessment purposes. The readiness option is often used for gap analysis, remediation planning, and preparing for a future validated assessment. Since the results are not submitted to HITRUST QA, organizations can tailor the assessment to their needs without external restrictions. Neither e1, i1, nor r2 assessments provide this level of flexibility, as those validated assessments are standardized and tightly controlled.

#### NEW QUESTION # 28

Control Reference scores are averaged to determine Domain scores.

- A. False
- B. True

**Answer: B**

Explanation:

Scoring in HITRUST follows a roll-up model. Requirement Statements are scored at the most granular level.

These scores are then averaged to determine the score of the Control Reference. Once all control references within a domain are scored, their averages are rolled up to calculate the Domain Score. Domain scores are critical because HITRUST requires each domain in an r2 assessment to achieve at least a 71 to qualify for certification. This hierarchical scoring ensures that weaknesses in individual controls impact the higher-level domain score, maintaining balance across domains. Without averaging, entities could potentially offset poor control performance in one area with excellence in another, which would distort the overall risk picture.

References: HITRUST CSF Scoring Rubric - "Roll-Up of Scores"; CCSFP Practitioner Guide - "From Requirement Statements to Domain Scores."

#### NEW QUESTION # 29

Is the Payment Card Industry - Data Security Standard (PCI-DSS) a Risk Management Framework (RMF)?

- A. Yes
- B. No

**Answer: B**

Explanation:

PCI-DSS is not considered a Risk Management Framework (RMF). Instead, it is a prescriptive security standard developed by the Payment Card Industry Security Standards Council to protect cardholder data. PCI-DSS specifies detailed control requirements such as encryption, access control, and monitoring, but it does not provide a holistic risk management structure for identifying, analyzing, and responding to risks. RMFs, such as NIST RMF or HITRUST's risk-based approach, focus on identifying risks, applying controls proportionally, and managing risk over time. HITRUST includes PCI-DSS as a regulatory factor that can generate

applicable requirements in assessments, but PCI-DSS itself is not classified as an RMF.

References: PCI-DSS Overview - "Prescriptive Control Standard"; HITRUST CSF Methodology - "Risk- Based Approach vs. Compliance Standards"; CCSFP Study Guide - "RMF vs. Regulatory Frameworks."

## NEW QUESTION # 30

.....

Although the HITRUST CCSFP exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our HITRUST CCSFP Study Materials, you will cope with it like a piece of cake. So our CCSFP learning questions will be your indispensable practice materials during your way to success.
