

EMC DEP-3CR1 PowerProtect Cyber Recovery Exam

질문 #26

An enterprise customer needs a Cyber Recovery solution to be implemented. As an outcome from a previous workshop, the following backup environment needs to be protected to the CR Vault.

Location 1: 4 PowerProtect DDs
Location 2: 4 PowerProtect DDs
Location 3: 2 PowerProtect DDs
Location 4: 2 PowerProtect DDs

The customer wants to implement a CR Vault in a 5th location.
How many Cyber Recovery systems must be installed at a minimum level?

• A. 0
• B. 1
• C. 2
• D. 3

정답 B

질문 #27

What vault status is displayed if none of the PowerProtect DD systems in the CR Vault are able to communicate with the Cyber Recovery software?

• A. Unknown
• B. Unlocked
• C. Locked
• D. Degraded

정답 B

질문 #28

Salesforce 인증 AP-207 시험을 패스하기가 어렵다고 하면 합습가이드를 선택하여 간단히 통과하실 수 있습니다. 우

리Pass4Test에서는 무조건 여러분을 위하여 관련 자료덤프 즉 문제와 답을 만들어낼 것입니다. 우리덤프로 Salesforce인증 AP-207시험준비를 잘하시면 100%Salesforce인증 AP-207시험을 패스할 수 있습니다. Pass4Test덤프로 여러분은 Salesforce인증 AP-207시험을 패스는 물론 여러분의 귀중한 간도 절약하실 수 있습니다.

최신 Accredited Professional Certification AP-207 무료샘플문제 (Q52-Q57):

질문 # 52

An Administrator needs help generating an accurate report to identify the average response time to installing new electricity connections.

What two elements need to be defined during the discovery phase of the implementation?

- A. Identify the data sources to generate the customer's new connections reports and dashboards
- B. Define the metrics to measure the customer's new connections process.
- C. Define the business stakeholders for the customer's new connections process.
- D. Define the data to be migrated for the customer's connections process

정답: A,B

설명:

During the discovery phase of implementing Salesforce Energy and Utilities Cloud, focusing on generating an accurate report for the average response time to installing new electricity connections, two critical elements need to be defined. Firstly, identifying the data sources is essential for generating comprehensive customer new connections reports and dashboards. These data sources could include service request records, installation records, and any other related datasets that capture the timeline from request to connection establishment. Secondly, defining the metrics to measure the process is crucial. Metrics might include average response time, number of installations completed within a target time frame, and customer satisfaction levels post-connection. By focusing on these elements, an organization can ensure that they are capturing and evaluating the right data to improve and report on their new connections process effectively.

Reference = Salesforce Energy and Utilities Cloud documentation emphasizes the importance of understanding the customer lifecycle and enhancing operational efficiency through accurate data management and metric evaluation. Specific references to setting up reports and dashboards, and defining success metrics can be found under topics related to data management and analytics within the Energy and Utilities Cloud resources.

질문 # 53

An energy company wants to send to its customers various types of communication via digital channels. Which is the preferred cloud that works in conjunction with Energy and Utilities Cloud to achieve mass communication?

- A. Marketing Cloud
- B. Sales Cloud
- C. Communications Cloud
- D. Service Cloud

정답: A

설명:

Salesforce Marketing Cloud is the preferred solution for energy companies looking to send various types of communication via digital channels to their customers in conjunction with Energy and Utilities Cloud. Marketing Cloud provides a comprehensive suite of tools designed for mass communication, allowing for the creation, management, and delivery of personalized customer communications across multiple digital channels. This integration enhances customer engagement and satisfaction by delivering timely and relevant information. Reference = Salesforce Marketing Cloud documentation highlights its capabilities for mass communication and integration with other Salesforce products, including Energy and Utilities Cloud, to provide a unified platform for customer engagement: <https://www.salesforce.com/products/marketing-cloud/overview/>

질문 # 54

A customer has recently installed Energy and Utilities Cloud Which specific license enables an energy company's partners to access applications via a web portal?

- A. Energy and Utilities Base Service

- B. Energy and Utilities Base
- C. Energy and Utilities Cloud for Digital Experience User
- D. Energy and Utilities Base for Digital Experience Partner

정답: D

설명:

The Energy and Utilities Cloud by Salesforce enables energy companies to connect with their partners through dedicated licenses that cater to digital experiences. The "Energy and Utilities Base for Digital Experience Partner" license is specifically designed for partner users who need access to applications via a web portal. This license type provides the necessary access rights and functionalities tailored for partners, ensuring they can efficiently use the Energy and Utilities Cloud's resources in a collaborative environment tailored to the unique needs of energy sector partnerships.

Reference = The details about licensing and partner access can be found under the Salesforce Energy and Utilities Cloud documentation, specifically in the sections discussing user licensing and partner portal configurations. More comprehensive information is available on Salesforce's official resources and documentation regarding the Energy and Utilities Cloud product, focusing on configuration and user license management.

질문 # 55

The project team wants to use the Customer Acquisition Management application to set up and automate the customer enrollment and selling of utility products, services and offers to new customers. A concern is raised about the final UI layout, which needs to be adapted to the branding of the company.

What two processes can modify the look and feel of the application?

- A. Modify the VEEDigitalOrder Omniscrypt to adapt the look and feel to suit the company's requirements
- B. Modify the VEEConsumerLandingScreen FlexCard to change the background color, text font size, and style.
- C. Modify the application Page Layout to change/add/remove selected elements
- D. Modify the VEELogoCard FlexCard to change the customer logo.

정답: A,B

설명:

In the Salesforce Energy and Utilities Cloud, customizing the UI to align with company branding during the customer acquisition process is crucial for maintaining a consistent user experience. Modifying the VEEDigitalOrder Omniscrypt allows for detailed customization of the customer journey and interaction points within the application, aligning it with the company's branding requirements. Additionally, altering the VEEConsumerLandingScreen FlexCard provides the capability to adjust visual elements such as background color, text font size, and style directly, ensuring the interface reflects the company's visual identity effectively.

Reference = These customization processes are supported by Salesforce Energy and Utilities Cloud documentation, specifically in sections related to Omniscrypt and FlexCard configurations for enhancing user interfaces in utility applications. https://developer.salesforce.com/docs/atlas.en-us.omniscrypt_developer_guide/meta/omniscrypt_developer_guide/omniscrypt

질문 # 56

An energy company provides gas and electricity services to some of its customers, but not all. When a new customer moves in, what object is used to determine what type of service is available at the premise?

- A. Asset
- B. Meter
- C. Account
- D. Service Point

정답: D

설명:

In Salesforce Energy and Utilities Cloud, the Service Point object is used to determine the type of service available at a premise.

This object represents a physical location where utility services are delivered, such as electricity or gas. By associating service points with specific types of utility services, energy companies can effectively manage and track the availability of different services for new and existing customers. This enables precise and efficient service provisioning, ensuring that customers receive the appropriate utility services based on their location and service point characteristics. Reference = The Salesforce Energy and Utilities Cloud documentation provides detailed information on the data model, including the role of the Service Point object in managing utility

service delivery and availability: https://developer.salesforce.com/docs/atlas.en-us.industries_energy_and_utilities.meta/industries_energy_and_utilities/
