With 300-710 Learning Materials, you will not need to purchase any other review materials. Please be assured that with the help of 300-710 learning materials, you will be able to successfully pass the exam.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q344-Q349):

NEW QUESTION # 344

Cisco Security Analytics and Logging SaaS licenses come with how many days of data retention by default?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Cisco Security Analytics and Logging (SaaS) licenses come with a default data retention period of 90 days. This retention period allows organizations to store and analyze their security event data for up to 90 days, providing sufficient time for security monitoring and forensic investigations.

NEW QUESTION # 345

An engineer is using the configure manager add <FMC IP> Cisc402098527 command to add a new Cisco FTD device to the Cisco FMC; however, the device is not being added. Why Is this occurring?

- A. The IP address used should be that of the Cisco FTD, not the Cisco FMC.
- **B. The NAT ID is required since the Cisco FMC is behind a NAT device.**
- C. DONOTRESOLVE must be added to the command
- D. The registration key is missing from the command

Answer: B

NEW QUESTION # 346

Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

Enter the "configure manager add" command at the CLI of the affected device.

Step 1

Unregister the device from the standby Cisco FMC.

Step 2

Register the affected device on the active Cisco FMC.
