The DSCI Assessment Framework for Privacy (DAF-P©) outlines three key approaches for privacy assessment:

- * Principle-based assessment (evaluates implementation of privacy principles like purpose limitation, data minimization, etc.)

- B. Privacy authorization process is established
- C. Responsibilities of function, process and relationship owners are defined towards privacy

It is reactive and indirect in the context of privacy enforcement.

- A. Use Limitation
- **B. Storage Limitation**
- C. Collection Limitation

- D. Security safeguards

Answer: B

Explanation:

The "Storage Limitation" principle ensures that personal data is retained only for as long as necessary for the purposes for which it was collected.

The DSCI Privacy Framework and DAF-P define this principle as:

"Personal data should be kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed." This prevents over-retention, minimizes risks of data breaches, and complies with legal and regulatory mandates for data minimization. Retention schedules and secure disposal practices are assessed under this principle in privacy audits.
